Customer Issue

along this road people are travelling at great speeds, coming down from Richardson Rd. there have been a accidents at the intersection of Ellis Rd and John Davis Rd, when people are turn out of Ellis onto John Davis and they were hit by on coming traffic, seeing whether an investigation can be done to see if speed humps can be put on the length of the road.

Site Visit

Site Visit Date

29/06/2016 12:00 p.m.

Site Notes

Went for preliminary site investigation and identified that it was a fast road with vehicles exceeding speed limit in both directions

road already has a bit of signage and treatment on the bottom end with signage and a central island and flush

Recommendation To perform new LATM investigation

Customer Key Points LATM Results: Speeds: 54.1 kph
