

Southern Corridor Improvements Project Update 2 September 2019

An overview of the Southern Corridor Improvements project

- Improved journey reliability on the Southern Motorway
- More lanes to improve motorway capacity and traffic flow
- Upgraded Takanini Interchange to improve safety and traffic flow
- Improved connections between the local roads and state highway network to ease congestion
- Better connections for freight and public transport
- Improved walking and cycling facilities to connect communities

Highlights

- 24 Bridges and 22 retaining walls
 - Pahurehure Inlet Bridge an environmental achievement
 - New foot bridge over motorway at Pescara Point
- Shared use path connecting Papakura to Takanini interchanges and local communities
- 4,370 metres of noise wall installed along corridor
- 140,000 plants (mostly natives) creating a green corridor
- Takanini Interchange
 - Redesign and build
 - Stormwater treatment pond
- Great South Road improvements to ease onramps
- Median works - building safer, solid concrete barriers
- Green retaining wall at Botanic Gardens

Pescara Point

Landmark bridge at Pescara Point

Shared use paths

Original scope:

- New shared paths along Great South Road at Takanini Interchange
- New shared path alongside SH1 between Takanini and Papakura
- Local connections at Brylee Drive, Walter Stevens Drive and Gardone Terrace
- New bridge at Pescara Point

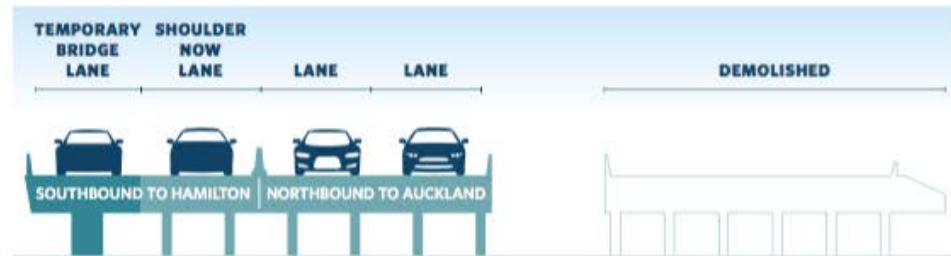

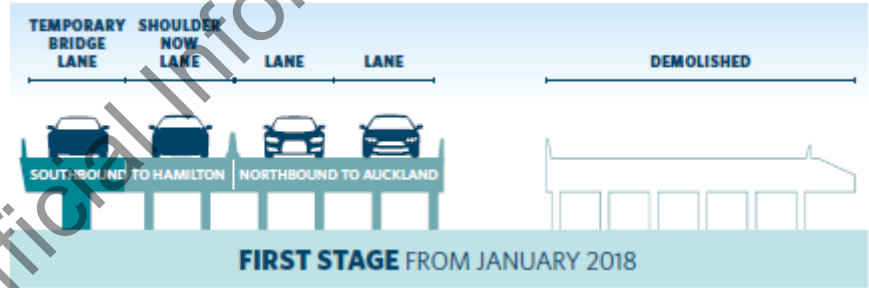

Recent addition:

- Walter Stevens Drive ramp link
