Thanks Susan. The reduced wording looks ok to me, but Gavin and Nick need to be comfortable also. With Matt away I cannot check if anything has been done on the metadata, so let's leave that out.

Nick, Gavin – are you ok with Susan's revisions?

Kind regards

Chris.

Subject: RE: Key datasets for resilience and climate change - Suburbs

Hi Chris

Thanks very much for sending this through.

This wording is much longer than the updates for the other datasets in the quarterly report. To maintain the style of the report, but without wishing to take away key information from your update, could I propose summarising this to the draft below.

Also, is there any update on adding the two fields (spatial extent and purpose) to the metadata, as that would be an additional good news story worth sharing that the metadata was now compliant.

Fire and Emergency New Zealand understands the importance of the **suburbs** dataset and is

working with LINZ to establish options regarding the dataset by December 2019.

Q2 Fire and Emergency NZ received legal advice on the potential to transition NZ Localities to a Creative Commons licence and measures to ensure the integrity of the dataset for operational purposes.

Q3 Fire and Emergency will participate in the NZ Geographic Board's workshop to consider a 'single point of truth' for suburbs and localities, and reiterate the need to ensure that any Public Risk in this space can be mitigated in order to ensure the safety of the New Zealand public in the context of emergency response services.

Thanks, Susan

Subject: RE: Key datasets for resilience and climate change - Suburbs

Hi Susan

Here is our proposed wording for the update:

Q2 Fire and Emergency New Zealand received legal advice on both the potential to transition the NZ Localities Dataset to a Creative Commons licence and measures to ensure the integrity of the dataset for operational purposes. Fire and Emergency New Zealand also continued ongoing discussions with LINZ. Those discussions led to Fire and Emergency:

- (i) obtaining advice from LINZ regarding the suitability of Creative Commons license variants appropriate for the NZ Localities Dataset, and
- (ii) obtaining advice from the New Zealand Geographic Board (**NZGB**) that they do not oppose NZ Localities being released as an open dataset.

Q3. In late 2019, LINZ and the NZGB sought Fire and Emergency New Zealand's input into developing a 'single point of truth' for suburbs and localities in New Zealand that will be publicly available. During Q3 FENZ intends to provide LINZ and the NZGB with requested input into the discussions, and appraise the agencies of the nature of the Localities Dataset, the use of the Dataset, and the need to ensure that any Public Risk in this space can be mitigated in order to ensure the safety of the New Zealand public in the context of emergency response services.

Any questions, let us know.

Kind regards

Chris.

Hi Chris

Just checking in about sign off for the key data quarterly report, which I'm hoping to approve by the end of this week.

Thanks, Susan

Hi Susan

From your end of December email, we have drafted updated wording – it will be significantly different to what you proposed. It is being reviewed internally, and hopefully we will be able to provide it to you in the timeframe you have requested.

We can discuss after that and prior to you sharing further.

Thanks.

Kind regards

Chris.

Hi Chris and Matt

Hope you are settling into the new year ok and that all is well.

Please find attached the draft key datasets for resilience and climate change quarter 2 update. This incorporates the wording I originally drafted at the end of December, for your review.

It would be good if we could also add that the metadata has been updated to include extent

Subject: RE: Key datasets for resilience and climate change - Suburbs

Hi Susan

Happy New Year!

When do you need wording for Q2 and Q3 by?

Thanks.

Kind regards

Chris.

Subject: Key datasets for resilience and climate change - Suburbs

Hi Chris & Matt

I realise this may well reach you in the new year now, and if so I hope you have had a lovely break.

Another three months have gone by, and it is time to prepare the next quarterly update for the key datasets for resilience and climate change project.

The text in the last update is included below. I've also drafted text for this quarter for your review (Oct to Dec 2019).

Matt, it would be good to say the metadata now complies with the metadata guidance if you have added in extent and purpose as previously discussed.

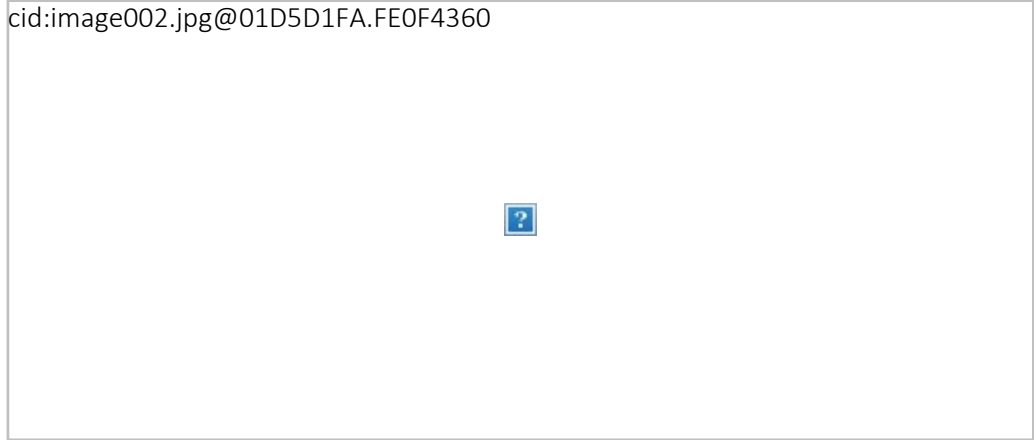

You can see I'm not certain what to put for quarter 3 (Jan to Mar 2020) so I've added the ideal solution for you to comment on.

Q2 The Open Data Team at Stats NZ have provided advice to Fire and Emergency NZ on the recommended Creative Commons license for publishing NZ Localities. The Fire and Emergency NZ legal team, with support from LINZ, prepared a response to an Official Information Act request relating to the publication of NZ Localities.

Q3 Fire and Emergency to publish NZ Localities under Creative Commons licensing (CC BY 4.0).

Previous update:
