Hello Chris and Matt

Hope all is well with you, and thanks again for keeping in touch while I've been overseas.

I'm emailing to confirm we are ok to meet on Monday at 3:30pm, and that I should delete the original meeting scheduled for 2pm?

During our most recent conference call I took a couple of actions:

1. Lead agency representation

Some of the key datasets have straight forward improvements. A good example of this is the building outlines, where the improvement plan is helping guide their work programme to provide additional attribution. In this instance this is only one representative for the key dataset.

For key datasets where the improvements require some level of organisational change, such as Stats NZ and NZTA, two representatives are invited to each meeting to represent technical issues and organisational or political issues. It therefore might be appropriate for you both to represent Fire and Emergency NZ at the meetings in future. Perhaps we can discuss this further on Monday, as I recognise this would be a significant commitment of your time.

2. Liability

Gavin asked about the risk of Fire and Emergency NZ being liable if the data was more readily available. The Creative Commons licence Section 5 - Disclaimer of Warranties and Limitation of Liability, confirms the data is supplied as-is and that in no event will the licensor be liable. <https://creativecommons.org/licenses/by/4.0/legalcode> Publishing the data as a service, as Matt said at the time, will ensure that users have access to the most up to date information which will also minimise the risk that a user is making decisions based on outdated information.

I look forward to seeing you on Monday.

Thanks, Susan
