

DC7 Transportation Projects – January 2019 Monitoring Report

Transport Committee

Date: 26 February 2019

Objective ID No:
A9674251

Executive summary

Recommendation	That the Transport Committee receive DC7 Transportation Projects January 2019 Monitoring Report.
Summary of issue	Tauranga City is continuing to experience growth and pressure on the transport network. The Government Policy Statement gives strong direction on how transport capacity should be provided and managed. Dealing with the impact of these factors on the transportation network is a significant issue for Council. This report enables Elected Members to monitor progress on key transportation projects.
Broader benefit / impact	Elected Members are informed of the progress on key transportation projects being undertaken.
Strategic context	These key transportation projects facilitate improved network performance and safety.
Next steps	Council will continue to progress the projects and works identified.

Discussion

1. Tauranga City is continuing to experience growth and also needs to respond to the direction of the Government Policy Statement. Managing the impacts on the transportation network is a significant challenge for Council.
2. The attached report (Appendix A) outlines progress being made in relation to a number of projects that are necessary to facilitate improvements to network performance and safety.

Options

3. There are no options; this report is for information only.

Significance and engagement

4. This report does not require any decisions and is not significant in itself.

Next steps

5. No further action is required. Council will continue to progress the projects and works identified.
