Description: DCC ANIMAL Sea lions

VO: New Zealand sea lions are one of the rarest seal species in the world, and they live right here in Dunedin.

The main breeding areas are Smails Beach; Tomahawk Beach; Middle Beach, which is Moana Rua; and Warrington Beach.

Sea lion pups could be born at any of these beaches, so if you're a dog owner visiting these areas, remember you must keep your dog on a leash within 20 metres of protected wildlife.

... Please. Help protect our sea lions.

... Thank you.
