

# The technology will scale with vaccine delivery

How the technologies will change over time

The technology will develop iteratively addressing the changing requirements throughout delivery. The **drivers** of our technology programme are:

Citizen Experience

Intuitive and Efficient Workflow for Healthcare Workers

Secure and Private by Design

Sector Collaboration

## Phase 1: Establishment

Rapidly deployed first generation systems with manual processes on the edges

225,000  
people vaccinated

## Phase 2: Ramp up with multiple vaccines

Highly complex and evolving environment

1,500,000  
people vaccinated

## Phase 3: Open access

Sustainable and scaled enabling technologies for the long term

3,900,000  
people vaccinated

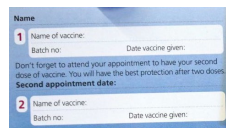

Covid-19 Immunisation Register (CIR)

GP Notifications

Health Provider Integration

National Immunisation Solution

A single national state of the art immunisation registry

Paper receipts

Localised booking and scheduling

National booking, scheduling and campaigns

Digital channels to view personal vaccination information

Inventory and distribution spreadsheets and email

Automation & forecasting

Sector Integration

Adverse event process uplift

Real time visibility and tracking

State of the art pharmacovigilance

Reports and dashboards

National Integrated Intelligence and Surveillance
