***Data is a case count using the start and end of the entire case. Cases that were declined are not included.**
***Cases will change age bands throughout the year as the paitent ages, age calculated at month end**

FOR THE DHB

• Number of hospitalisations for mental health per year, emergency and non-emergency, by age group (five year bands), 2015 – 2020 calendar year

***Data based on first admission to a MH ward (Acute or Subacute) and ward transfers/new MH Hospital Episodes that happen within 2 days of previous episode ending are treated as a continuation of the initial Hospitalisation**
***Data is a count of events (episodes) not individual patients so same patient can be counted multiple times (with the 2 day new episodes being excluded as per note above)**

• Number of people seeing a psychologist, per year, by age group (five year bands), 2015 – 2020 calendar year

***Unique patients counts the number of individuals having a record of a face to face contact (inc Video call) or group session where the clinician involved is recorded as a psychologist, However if a paitent changes age bands within the year they may be counted twice as sessions later in the year would place them in the higher age bracket.**
***Sessions is the number of patient events, so a group session would count the number of patients in the group as individual sessions not one event.**
