

Stats NZ's Integrated Data Infrastructure (IDI) is a large research database containing de-identified microdata about people and households.

The IDI contains person-centred microdata from a range of government agencies, Stats NZ surveys including the 2013 Census, and non-government organisations. For more information about data in the IDI, see

The Longitudinal Business Database (LBD) complements the IDI with microdata about businesses. For more information about data in the LBD, see
