Kia ora Andrew et al

Thanks for all your work so far on this. The reason the TAG wanted to remove the station names was because some TAs were of the view that potentially not all of the stops on these lines would be considered rapid transit stops as per the NPS UD definition. So adding in the suggested additions below would be counterproductive to the concerns raised. Does that make sense?

Fleur

Subject: RE: Rapid transit definition for RLTP

Hi Fleur and friends,

Kate Pascall and I agree it's a good idea to fix up the Map 6 by removing the station names and icons. This should also remove the issue of the circle highlighting Tawa, Linden, Kenepuru and Porirua stations ... but missing Takapu Road and Redwood stations. Also the stations in the Johnsonville line and some stations in Porirua City are missing.

To balance the removing of the stations from Map 6, can we please amend the text above in the fourth paragraph, for clarity, to read:

“The rapid transit network, stops and services for the Wellington region comprise the Kāpiti, Hutt, Melling and Johnsonville rail lines, and all stations on those lines.” Of course my colleagues in other councils may recommend further changes; for example if Kapiti was concerned about this description and Map 6 so that stations north of Pukerua Bay are “passenger rail network” not “rapid transit network”, I defer to those councils on this!

Subject: RE: Rapid transit definition for RLTP

Kia Ora all,

For RMA land use planning purposes, PCC has been working under the assumption that the stops on the Kapiti Line within or very close to the District will meet the definition of a 'rapid transit stop' as defined by the NPS UD (the stops in question are Kenepuru, Porirua, Paremata, Mana, Plimmerton and Pukerua Bay). Trains run at a 20min frequency during peak times and during the day, with express services between Plimmerton - Wellington and Porirua - Wellington at peak times. Overall this frequency appears to support the assumption that these are 'rapid transit stops' servicing a 'rapid transit service'.

However, as services run at an hourly frequency at night and stop by midnight, there is a question mark over whether this service still meets the definition of a 'rapid transit service', or if night time frequency even needs to be considered. We are likely to be challenged on this through an RMA Schedule 1 process. We would be interested in knowing more about investment signalled through the RLTP aimed at increasing off-peak frequency and peak time capacity to accommodate growth on the Kapiti Line.

Bearing the above in mind, PCC can tentatively support the definition of rapid transit service proposed to be appended to the RLTP, although note this is not a formal endorsement from our Council.

Kind regards,

Stewart

Subject: [EXTERNAL] Rapid transit definition for RLTP

Importance: High

Kia ora koutou

The Regional Land Transport Plan TAG met this morning and discussed how the RLTP will define 'rapid transit' in the Wellington region, using the guidance on the NPS UD and various national transport documents. The TAG agreed to include the attached text, with amendments to the map to remove the names of the stops (so just referring to the names of the rail lines) and remove the purple lines. This document was developed by the GW Transport team with input from WCC, Waka Kotahi and me.

Can you please provide any feedback by **5pm tomorrow (Thursday 28 January)**? Apologies for the short turnaround time.

The attached text and map will be included in an Appendix to the RLTP in a section called 'Our Transport System'. It will be one of a series of maps.

Keep in mind the context for this definition and that being considered a rapid transit stop doesn't automatically mean 6 storeys, and likewise, an area with good transport links (that's not strictly rapid transit) can be intensified as appropriate. We will need to continue working on this wider picture to ensure we have a regionally consistent approach to it.

Ngā mihi

Fleur
