

## **Emergency medical support**

## Introduction

**Purpose** The purpose of this policy is to describe the requirements for providing

emergency medical support to Fire and Emergency New Zealand personnel or

members of the public.

**Contents** This policy contains the following content:

About this policy

**Emergency medical support** 

Related information

## **About this policy**

When to use

Fire and Emergency personnel will follow the requirements of this policy when in our workplaces, on duty, or while undertaking any response duties.

**Policy objectives** 

This policy aims to support Fire and Emergency personnel and set in place the actions they should take when our people, or members of the public, need emergency medical assistance.

# Policy requirements

When the injured or unwell person is a member of Fire and Emergency, the person in charge of the workplace is responsible for ensuring:

- emergency medical support is provided, (e.g. first aid), see Definitions
- · relevant people and agencies are notified
- any required reporting is completed. See <u>Report workplace safety, health or</u> wellbeing event
- the injured or unwell person is transported safely home or to a medical provider or hospital as needed
- any relevant leave or workplace cover requirements are actioned.

## **Definitions**

Emergency medical support means:

- first aid
- visit to a doctor or other relevant health professional
- an ambulance.

#### Decontamination means:

Any decontamination where the OIC considers that those being decontaminated may need medical assistance, or medical assessment. This will generally not include post-fire decontamination unless deemed necessary for any reason by the OIC

## **Emergency medical support**

#### First aid

First aid provided should follow the guidance in G2 TM First aid technical manual.

**Note:** First aid should only be administered by a trained first aider, unless there is no other option.

First aid provided in the operational environment is covered by the <u>G2 POP</u> Operational first aid policy

### **Notifications**

When the injured or unwell person is a member of Fire and Emergency, the person in charge of the workplace is responsible for:

- Completing any required reporting. See <u>Report workplace safety, health or</u> wellbeing event
- Making sure the patient's emergency contact person is contacted.
- Notifying their workplace manager
- If the person has an operational role, notifying ComCen so senior officer notifications can occur.

**Note:** If the situation involves serious injury or significant harm, notifications will include WorkSafe New Zealand or another external agency. See <a href="Notifiable injury">Notifiable injury</a>, illness or incidents guide

# Incident-related requirements

During an incident, the Officer in Charge (OIC)/Incident Controller (IC) is responsible for leading these actions.

|          | If   | Responsibilities,  |
|----------|--|--|
|          | Emergency medical support is   | OIC/IC ensures:  |
|          | required for:  | first aid is administered  |
|          | Fire and Emergency personnel   | ComCen are advised to:   |
|          | • the public   | <ul> <li>request ambulance response if further<br/>treatment is required</li> </ul>                |
|          |  | <ul> <li>make required notifications from ComCen</li> <li>SOPs</li> </ul>                          |
|          | there are persons reported   | OIC/IC notifies ComCen, who then action notifications to:  |
|          |  | ambulance, who will attend until all persons are accounted for                                     |
| 70.      |  | senior officers as required by ComCen SOPs   |
| zeleased | the incident is 3rd alarm or higher  | ComCen will notify ambulance and request a standby attendance                                      |
|          |  | <b>Note:</b> If there are injuries, the OIC/ IC must request an ambulance response as stated above |
|          | the incident is lower than 3rd alarm, and the IC considers there is a significant risk of injury | the OIC/IC will advise ComCen to notify ambulance and request a standby attendance                 |
|          | decontamination (see definitions) is required on people wearing:                                 | the OIC/IC will advise ComCen to request ambulance response.                                       |
|          | no PPE   |  |
|          | • level 1 or 2 PPE   |  |
|          | • compromised level 3 or 4 PPE   |  |

## Concussion protocols

If there is any possibility of a concussion (witnessed or not), arrange for an early medical assessment.

Indications of a concussion may include any level of being dazed, confused, unsteady or disoriented following an impact to the head.

Anyone who loses consciousness after an impact to the head (even if brief) has a concussion.

A concussion can acutely affect physical capacity, such as balance and coordination as well as causing temporary cognitive symptoms affecting decision-making. Because this will cause a level of impairment, the OIC/IC or person in charge of the workplace is responsible for leading the actions listed:

The injured person:

- shall not continue in any safety critical role
- shall stand down and seek a medical assessment at the earliest opportunity (including a request for an ambulance response to an incident ground)
- shall always be accompanied and not drive a vehicle until a full concussion assessment has been done and they have been cleared.

### **Additional actions**

If the injured person leaves the workplace, they should be accompanied by a colleague or manager, where practicable.

- If taken to hospital this may be until handover to the emergency contact person, or until they are discharged and returned home.
- If going home, ensure they have travel home provided (including for their vehicle).
