R Murcott
fyi-request-18042-e6a97c56@requests.fyi.org.nz

Dear R Murcott

LOCAL GOVERNMENT OFFICIAL INFORMATION AND MEETINGS ACT Request: 2022-01

Thank you for your email of 5 January 2022 to the Carterton District Council requesting the following information:

"Additional information regarding the legal status of the road:

Cadastral survey DP 503510, a subdivision approved by CDC in 2016, delineates "Rocky Hill Rd (formed track)".

Your request has been considered under the Local Government Official Information and Meeting Act 1987 (the Act).

We have identified three documents in scope of your request. Our decision on the release of each of the documents are tabled below, and the documents are attached as **Appendix A**.

| Number of Document | Decision on release |
|-------------------------|---|
| 1) 160010 application | Release in part. Information withheld under section 7(2)(a) of the Act. |
| 2) 160010 decision swdc | Release in part. Information withheld under section 7(2)(a) of the Act. |
| 3) 160010 lt 503510 | Release in part. Information withheld under section 7(2)(a) of the Act. |

Where the information has been withheld from the documents the information has been withheld under the following section of the Act:

- Section 7(2)(a), to protect the privacy of natural persons.

As required under section 7(1) of the Act, I have had regard to the public interest considerations favouring the release of the information withheld. I do not consider the public interest considerations favouring the release of this information sufficient to outweigh the need to withhold it at this time.

Please note, the Council now proactively publishes LGOIMA responses on our website. As such, we may publish this response on our website after five working days. Your name and contact details will be removed.

Thank you again for your email/letter. You have the right to ask an Ombudsman to review this decision. You can do this by writing to info@ombudsman.parliament.nz or Office of the Ombudsman, PO Box 10152, Wellington 6143.

Yours sincerely

A handwritten signature in blue ink, appearing to read 'Geoff Hamilton', with a horizontal line underneath.

Date: 16 March 2016

To: South Wairarapa District Council &
Carterton District Council
C/- South Wairarapa District Council
PO Box 6
MARTINBOROUGH

Attention: Planning Department

Proposed Subdivision ~~_____s7(2)(a)_____~~ **- Summer Hill & Rocky Hill Roads**

Please find enclosed an application for the above four lot subdivision.

This is a joint application as the subject land straddles the South Wairarapa and Carterton District boundaries. Pre application discussion resulted in South Wairarapa agreeing to process the application on behalf of both Councils.

Please invoice the applicant C/- AdamsonShaw for the application fee. Upon receipt we will arrange payment.

We trust that the application meets Council's requirements and await the decision. Please do not hesitate to contact our office if you have any queries.

Yours faithfully
AdamsonShaw

RELEASED UNDER LGOIMA

1 INTRODUCTION

Pursuant to Section 88 of the Resource Management Act 1991 (the Act), s7(2)(a) (as representative) apply to the South Wairarapa and Carterton District Council for subdivision resource consent. This application has been prepared by Adamson Shaw in accordance with Form 9 and Schedule 4 of the Act, and incorporates the information required by the Act.

- The applicants, as a part of family farm holdings, own Certificates of Title WN30/198 and WN20A/807 totalling 1394.9806 hectares
 - The proposed subdivision is of parts of these two titles
 - Three new titles will issue as a result of the subdivision
- The Crown, “Her Majesty the Queen” owns Certificate of Title 9245 over which the applicants seek to secure a short length of right of way
- An adjoining property on the eastern boundary, held by Certificate of Title WN31D/4, has a short length of track/road through it linking to Rocky Hill Road. A right of way over this in favour of the applicant is proposed

The proposal is described in detail in this document and shown on Adamson Shaw Scheme Plan, AS 1614 SC-01 Rev A, attached at [Appendix A](#).

The objective of this application is to provide sufficient information to allow any person to determine the likely outcome of the proposed development including any actual and potential effects on the environment, and any measures proposed to avoid, remedy, or mitigate those effects. The application will discuss the following matters in relation to the proposed development:

- Consents required
- Description of the site
- Description of the proposed development
- Assessment of relevant planning instruments
- Assessment of effects on the environment
- Mitigation measures and suggested conditions of consent
- Consultation and notification

The information contained in this application and supporting documents demonstrates that the proposed development is appropriate in this location, and will contribute to the sustainable development of the Merton.

2 CONSENTS REQUIRED

Following an assessment of the proposed development in terms of the Wairarapa Combined District Plan (the District Plan), it has been determined that Subdivision Consent to undertake a Discretionary Activity is required.

3 SITE DESCRIPTION

3.1 LEGAL DESCRIPTION

This proposed subdivision is of some of the parcels held within the following Certificates of Title

- CT WN20A/807 – Multiple Parcels – 468.6552 hectares
- CT WN30/198 – Multiple Parcels – 926.3254 hectares

Rights of Way are proposed over short lengths of track/road within the following Certificates of Title

- CT 9245 – Lots 1,3,5 DP 302340 – 413.5091 hectares
- CT WN31D/4 – Section 330, 332 & 375-378 Pahaoa District & Lot 1 DP 20659 – 534.9830 hectares

There are various Registrations on the underlying Certificates of Title. These include Mortgages, Forestry Rights and a Right of Way. It is understood that these will all remain and automatically transfer to the subsequent Titles that will issue.

Search copies of the above Certificates of Title and registrations are attached at Appendix B.

3.2 PHYSICAL DESCRIPTION

The application site is rolling to steep sheep and beef country very typical of the east coast land in the lower north island. There are large areas of bush and scrub with a significant area of bush within the proposed Lot 2 and adjoining Sec 286A Pahaoa District, on the southern side of the unformed legal road. Both of these bush areas are controlled by way of District Plan identification as both "Outstanding Landscapes & Outstanding Natural Features".

There is a dwelling at the end of Summer Hill Road and little other site development of this large rugged rural property.

There are not any known or documented fault lines or zones either within or in close proximity to the subject farms.

There are not any known or documented Selected Land use Register (SLUR) sites either within or in close proximity to the subject farm

To the best of our knowledge there are no heritage features or any specific sites of significance to Tangata Whenua located within the subject land holding or in the immediate vicinity. The District Planning Maps do not identify any such features.

4 PROPOSAL DESCRIPTION

4.1 OVERVIEW

This application seeks resource consent from the South Wairarapa and Carterton District Councils, the proposal straddles the District Boundary, to subdivide the properties. The ultimate result being as follows:

- Lots 1 and 2, approximately 229.6 and 41.5 respectively, be held together, are to be sold
- the balance of both underlying titles to be amalgamated back with the parcels within the parent titles and continue to be held by the applicant. As per the Amalgamation Conditions set out on the Plan of Proposal at Appendix A, 1614 SC-01 Rev A.

The proposed subdivision is shown on Adamson Shaw Scheme Plan AS 1614 SC-01 Rev A attached at Appendix A. Details of the proposed development are outlined in the following sections.

4.2 PROPOSED ALLOTMENTS

The proposed subdivision is configured as follows:

| Lot No. | Area | Description |
|---------|----------|--|
| 1 | 229.6 ha | Vacant steep pasture and scrub. Borders Rocky Hills Sanctuary Reserve to the east, access road/track to the north and the Pahaoa River along its southern boundary Accessed from the road/track through the property, over which a right of way is proposed To be amalgamated with Lot 2 |
| 2 | 41.5 ha | Steep bush block that is within the "Outstanding Landscapes" and "Outstanding Natural Features" as per the District Plan Maps Accessed from the road/track through the property, over which a right of way is proposed To be amalgamated with Lot 1 |
| 3 | 258.0 ha | Balance of Parts Lots 1 & 2 Section 290, within CT WN30/198. To be amalgamated back with the balance of CT WN30/198 |
| 4 | 233.6 ha | Balance of Parts Lots 1 & 2 Section 286, within CT WN20A/807 To be amalgamated back with the balance of CT WN20A/807 |

4.3 ACCESS AND SERVICING

Access through the properties, which includes access to the proposed Lots 1 and 2 is via a well formed track/road that runs between Summer Hill and Rocky Hill Roads. This track has been in existence for many years and includes two short sections that are outside of the applicants properties over which it is proposed rights of way will be created. This is in addition to rights of way proposed over the entire road.

The two sections outside of the applicants land are

- across the north western corner of the Rocky Hills Sanctuary Reserve, approximately 250 metres long. This is through clear pasture that is still farmed
- between the north eastern boundary of the applicants property and Rocky Hill Road. This is across neighbouring land that is within CT WN31D/4. Approximately 300 metres in length

The track will continue to be used in its present form with the subsequent Rights of Way to be registered reflecting the "agricultural" use and lack of necessity for any upgrading.

No services are required to be extended to or developed within the subject property.

4.4 FINANCIAL CONTRIBUTIONS

Financial contributions (roading and reserves) will be levied as one additional certificate of title will result.

- START - 2 Underlying Titles subject to the subdivision – WN30/198 and WN20A/807
- 1 Title to issue for Lot 3 and the balance of WN20A/807
- 1 Title to issue for Lot 4 and the balance of WN30/198
- 1 Title to issue for Lots 1 and 2
- FINISH - 3 Titles result

It is anticipated that the capped contribution of \$7500 plus GST for Roading and Reserves will be levied against the amalgamated Lots 1 and 2, being the additional certificate of title resulting from the proposal.

5 PLANNING CONSIDERATIONS

5.1 ZONING

Under the District Plan (Map 26), the application site is located within the Rural (Primary Production) Zone, with approximately 100 hectares of the 395 hectares having an "Outstanding Landscapes & Outstanding Natural Features" overlay.

5.2 DISTRICT PLAN

As required by the Act, the District Plan classifies activities into categories; Controlled, Restricted Discretionary, Discretionary, and Non-Complying. These different categories determine the level of control Council has over various activities. Section 20 of the District Plan deals with subdivision and sets standards for each of the four different activity status'. We consider it useful to assess the proposed subdivision against the District Plan's rural zone subdivision rules and have done so below;

| Controlled Activity Standards | Proposal's Compliance |
|--|-----------------------|
| Rule 20.1.2(b)(i)2 <u>Minimum Lot Area</u> | Complies |
| Rule 20.1. (b)(i)1 <u>Frontage</u> - no minimum | Complies |
| Rule 20.1.2(c) <u>Compliance with District-wide permitted activity land use standards for Roads, Access, Parking and Loading in Section 21.1.25</u> | Complies |

| Controlled Activity Standards | Proposal's Compliance |
|--|---|
| Rule 20.1.2(d) <u>Two or more rear lots shall share a single vehicle access</u> | Complies |
| Rule 20.1.2(e) <u>Building area</u> - Each lot must contain a 12m x 15m building area meeting landuse standards for dwellings which can satisfactorily dispose of effluent | Complies |
| Rule 20.1.2(h) <u>Landuse standards</u> - Each lot shall demonstrate compliance with Rural (Primary Production) Zone permitted activity standards. | Complies |
| Rule 20.1.2(i) <u>Servicing</u> | Complies No changes or servicing required |
| Rule 20.1.2(j) <u>Financial Contributions</u> - To be in accordance with Section 23 | Complies One Roading and Reserves Contribution to be levied |
| Rule 20.1.2(k) <u>Esplanade Reserve/Strap</u> | Complies NA |

This proposal meets the subdivision standards for a Controlled Activity. However under the Discretionary Activity Rules 20.1.5 (i) (v), (vi), (vii) the proposal moves to Discretionary Activity Status and must be processed accordingly.

- (v) The allotment is within an Outstanding Landscape listed in Appendix 1.1;
- (vi) Contains an Outstanding Natural Feature listed in Appendix 1.2;
- (ii) Contains all or part of a site of a Significant Natural Area listed in Appendix 1.3, except if the Significant Natural Area is wholly contained in a Conservation Lot under Rule 20.1.2(q);

5.3 ACTIVITY STATUS

The assessment of the District Plan's standards in the preceding section shows that the application to subdivide the subject site must be assessed as a **Discretionary Activity**.

6 ASSESSMENT OF ENVIRONMENTAL EFFECTS

6.1 INTRODUCTION

In accordance with Section 88(2)(b) of the Act and Clause 1(d) of Schedule 4 to the Act, this assessment of environmental effects for the proposed activity has been prepared in such detail as corresponds with the scale and significance of the effects that it may have on the environment.

Subject to the purpose and principles set out in Part II of the Act, the consideration of this application by Council will involve a judgement of whether the proposed activity will promote the sustainable management of resources in a manner or at a rate that enables people and communities to provide for their social, economic and cultural well being, health and safety while avoiding, remedying or mitigating any adverse effects on the environment.

It can be concluded from our assessment of the above matters, and our experience with this type of proposal, that the actual and potential effect of the proposal on the environment primarily relate to:

6.2 EFFECTS ON RURAL CHARACTER AND AMENITY

The Act defines amenity values as “those natural and physical qualities and characteristics of an area that contribute to people’s appreciation of its pleasantness, aesthetic coherence, and cultural and recreational attributes”. Amenity values can be affected by such things as noise, lighting and glare, vehicle movements, available parking spaces, shading effects, visual dominance of a large structure in close proximity, levels of privacy and general visual appearance of a site and activities on the site.

In accordance with the Act, the District Plan has been developed through an extensive process, involving full public consultation, to establish a set of subdivision rules and standards which set a level of development of which the effects are considered acceptable.

The proposed allotments are of a size and configuration that are in compliance with the Controlled Activity provisions of the District Plan. Natural Landscape features and the recognised significance of the area necessitates appropriate consideration of associated factors. This has been done and department of Conservation comment has been requested.

As the proposal is boundary and ownership related and that to the best of our knowledge that no site development is proposed, it has been concluded that the proposal will have less than minor effects on rural character and amenity.

6.3 EFFECTS FROM NATURAL HAZARDS

Consideration has been given to the potential for this proposal to increase the risk or effect of any natural hazard within the site or beyond. It was concluded that the proposal, subject to the lots being developed in a complying and acceptable manner, do not increase the risks associated with natural hazards.

There are not any known hazards that will impact upon the proposal or the proposal have any impact upon.

Earthquakes and extreme weather events can never be predicted but rules and accepted land use practices relating to development generally control factors that are unknown at this stage.

It has been concluded that the provisions of Section 106 of the Act have been met and any potential adverse effects relating to natural hazards will be no more than minor.

6.4 ACCESS EFFECTS

The existing Summer Hill and Rocky Hill Roads are of a structure and standard that is considered adequate to continue to service the subject and neighbouring properties. The proposal will not create any discernible pressure on the peripheral road network or internal tracking/roading.

Given the above, it is considered that any adverse traffic and access effects arising from the proposed development will be no more than minor.

6.5 ENVIRONMENTAL EFFECTS CONCLUSION

The assessment of environmental effects presented above is guided by the provisions of the Act and the assessment criteria of the District Plan.

The appropriate party that must be consulted regarding this proposal has been identified as the Department of Conservation. Historic heritage, significance of the landscape, District Plan provisions and the Rocky Hills Sanctuary Reserve adjoining, all contribute to a level that makes comment from the Department of Conservation essential. See 9 below. This is in addition to consent being required for the proposed right of way over Crown Land.

Prior to receipt of Department of Conservation comment, overall, this assessment shows that the actual and potential effects of the proposed subdivision on the environment will be no more than minor.

6.6 NATIONAL ENVIRONMENTAL STANDARDS - SOILS

Regulatory Authorities are now requiring a more formal and consistent approach to the assessment of application sites in terms of National Environmental Standards (NES). These relate primarily to soils and potential soil contamination. The "Contaminated Land Management Guidelines No.1 Reporting on Contaminated Sites in New Zealand (Revised 2011)" provides guidance to consistent reporting "to enable efficient review and appropriate action by regulators, site auditors, members of the public and other interested parties".

There are five stages of reporting. The Preliminary Site Investigation (PSI) being Stage One, with further Stages followed should the PSI identifies that further action is required. With proposals such as this subdivision application the site is deemed to be likely to be low risk. Accordingly it is not anticipated that further investigation will be required. However, as noted, should the PSI flag any areas of concern or interest then further more targeted investigation will follow.

The Ministry for the Environment produce a Hazardous Activities and Industries List (HAIL) that identifies uses and activities as per the title of this document. This list provides guidance

and prompts consideration of multiple facets of land use, to ensure that sites are considered from an appropriate perspective. Local Authorities are aware of the list and without reproducing it in each application, we ensure that the list has been considered against the site and any relevant areas referred to. Much of the reference against which the site considered is based upon limited information and it is regularly impossible to be able to report unequivocally as to specific chemicals, for example, that may have been used on site. The initial expectation when considering the subject property is that it will be a low risk site, according Stage One PS is the starting point.

Subject to this expectation the following process has been followed

- search the GWRC GIS Viewer to ascertain if there are any known/ documented matters relating to this site. This assessment includes all matters and not only potential contamination of soil and extends to surrounding properties
- Consideration of the HAIL list
- Identification of any key matters and report on those key items in this application
- Consideration of the scale and purpose of the proposal relative to the extent of the land holding and land to be retained by the current owners

When the PSI triggers any key points, raises area of concern or there are simply too many unanswered questions, the process is then to engage a suitably qualified Engineer or Soil Scientist. This ensures that appropriately qualified and experienced people/organisations are reporting throughout the process.

The subject site has undergone a PSI, as per above, with the following findings

- that there is nothing that “triggers” that further assessment is required

The result of this PSI identified that based upon the available information and proposal that no further action or investigation is required.

7 MITIGATION MEASURES

Clause 1(g) of Schedule 4 to the Act states that an application should include “a description of the mitigation measures (safeguards and contingency plans where relevant) to be undertaken to help prevent the actual and potential effect”. Mitigation measures are addressed in the assessment of environmental effects at Section 6.0 of this application, which found that the adverse effects of the proposed activity on the environment will be no more than minor

8 SUGGESTED CONDITIONS OF CONSENT

It is envisaged that the standard conditions Council normally applies to subdivision consents should be sufficient to ensure that the subdivision is completed in a manner that is consistent with Council’s vision for the development within the rural zone and wider District.

9 CONSULTATION AND NOTIFICATION

Clause 1(h) of Schedule 4 to the Act states that an application should include an “identification of the persons affected by the proposal, the consultation undertaken, if any, and any response to the views of any person consulted”. In order to avoid doubt, Section 1AA of Schedule 4 states that “clause 1(h) obliges an applicant to report as to the persons identified as being affected by the proposal, but does not oblige the applicant to consult with any person; or create any ground for expecting that the applicant will consult with any

person”.

This proposed subdivision meets the Controlled Activity standards. However natural landscape features and acknowledgement, by way of District Plan “Special Feature identification, trigger Discretionary Activity provisions of the District Plan and the proposal must be processed accordingly.

The appropriate party, The Department of Conservation, has been consulted and comment requested from them regarding the proposal. It is not anticipated that there will be any concern due to the nature of the subdivision and that it is not proposed for the purpose of encouraging or facilitating any site development beyond which is not already controlled

Comment has been sought from the Department of Conservation. This comment would have ideally been received prior to the completion and submission of the application but it has yet to be received. Due to time constraints on the applicant the application is submitted for processing to begin and Department of Conservation comment will follow.

Sections 95A of the Act set out the circumstances where an application for resource consent should be publicly notified, the procedures for notification, and when notification procedures may be waived.

In respect of Section 95A(2), the assessment of actual or potential effects in this application found that any adverse effects of the proposal would be less than minor. The proposal therefore meets the tests of Sections 95A and 95(B) and does not require any notification.

There are no unusual circumstances that would warrant the public notification of this application under Section 95A(4) of the Act.

Given the above, the proposed subdivision meets the requirements of the Act and therefore need not be notified or served on any parties seeking written approval.

10 CONCLUSION

This proposal has been assessed in terms of the Wairarapa Combined District Plan and in accordance with the Fourth Schedule of the Resource Management Act 1991.

Overall it is concluded that the effects of the proposal are consistent with the intentions of the District Plan and that any potential adverse effects will be less than minor.

We trust the above meets Council’s requirements and provides the necessary information to enable the non-notified processing of this application.

SUSTAINABLE FOREST MANAGEMENT PERMIT No. 5/08/1150
(Section 67M of the Forests Act 1949) applying to indigenous forest land located
on land comprised and described in Certificate of Title WN30/198
(Wellington Land Registration District).

Pursuant to the provisions of Part IIIA Forests Act 1949, and in particular section 67M, a Sustainable Forest Management Permit is issued to s7(2)(a) s7(2)(a) the owners of an estate in fee simple in land described below and applying to an area of indigenous forest land identified in clause 1 below.

1. In this Permit, unless the context otherwise requires:

“the Act” means the Forests Act 1949 and includes all regulations made under that Act:

“Bole” means a stem with one or more leaders:

“Commencement date” means the date the appropriate District Land Registrar registers this Permit:

“Land” means all that piece of land containing 926.3254 hectares more or less being Part Lot 1-2 Section 289 Block X Wainuioru Survey District, Part Lot 1-2 Section 290 Block X Wainuioru Survey District and Section 294 Block X Wainuioru Survey District and being all of the land contained in Certificate of Title WN30/198 (Wellington Land Registration District):

“Forest Area” means the area of indigenous forest land to which the Permit applies containing about 11.6 hectares, located on the Land, delineated in red on the map attached as Schedule 4:

“Harvest” means the process of felling and transporting of logs within the Forest Area:

“Podocarp” means; Matai (*Prumnopitys taxifolia*), and Rimu (*Dacrydium cupressinum*):

“Standing Volume” means;

- (a) the volume of the bole before the tree is felled, after it has been felled, or after it has fallen naturally; and
- (b) any large branches contained within the crown of the tree that have a minimum small end diameter of 15 centimetres and a minimum length of 2.5 metres:

“Term” means the period of ten years from the Commencement Date:

“Timber” means

- (i) trees (excluding cuttings, suckers, and shoots); and
- (ii) woody plants able to be milled; and includes branches, roots, and stumps of trees and other woody plants able to be milled, logs, woodchips, wood products, veneer, tree ferns, and tree fern fibre:

Words and expressions used in this Permit and defined in the Act shall have the meanings so defined.

s7(2)(a)
s7(2)(a) [Redacted]
[Signature]

2. This Permit shall be accorded a fair, large and liberal interpretation but if there is any difference or discrepancy between the provisions of this Permit and any provisions of the Act then the provisions of the Act prevail.
3. In the event that any activity permitted under this Permit requires prior consent under the Resource Management Act 1991 that consent must be obtained.
4. During the term of the Permit, the harvesting and milling of the following quantities of Timber from the Forest Area capable of being milled, irrespective of its quality is authorised:

- (a) For the purposes of section 67M(3) of the Act 47.0 cubic metres of podocarp species, being:

| | Standing Volume |
|--------------|--------------------------|
| Matai | 21.0 cubic metres |
| Rimu | 26.0 cubic metres |
| Total | 47.0 cubic metres |

The Standing Volume is calculated by using the following measurements:

- (i) the diameter of the Bole at 1.4 metres above the ground.
 - (ii) the height of the Bole at either the point where the Bole branches into the crown of the tree, or the point where the Bole reaches a minimum diameter of 15 centimetres, whichever is the larger.
 - (iii) the estimated centre girth diameter and length of any large branches contained within the crown that are capable of being milled.
5. For the purposes of and in accordance with the provisions of section 67M (7) of the Act and clause 9 of the Second Schedule to the Act, a logging plan shall be submitted annually to the Director-General of Agriculture and Forestry for approval.
 6. For the purposes of clause 8 of the Second Schedule to the Act, without limiting anything contained elsewhere in this Permit or any obligation in the Act, the specified forest protection requirements annexed as Schedule 1 must be taken to protect the forest and to retain and enhance the flora and fauna and soil and water quality of the Forest Area.
 7. Without limiting anything contained elsewhere in this Permit or any obligation in the Act, the relevant sustainable forest management prescriptions specified in clause 10 of the Second Schedule of the Act apply to this permit as if it were a sustainable forest management plan. A copy is annexed as Schedule 2.
 8. This Permit does not authorise the milling of, nor create any right to harvest or mill any timber on any marginal strip as defined under the Conservation Act 1987.

s7(2)(a) encl

Rm

9. This Permit expires 18 months after the date of issue unless it has been registered in accordance with section 67K of the Act.
10. The requirements of the Act must be observed during the Term, notwithstanding any provision of this permit.

Dated this 27 day of

January

2006

Manager Indigenous Forestry Unit, Ministry of
Agriculture and Forestry
(Acting pursuant to delegated authority)

s7(2)(a)

Schedule 1

Forest Protection Requirements

1. Protection of the forest

That proper measures shall be taken to:

(a) Protect the forest and in particular, but not exclusively, the regenerating forest from wild animals and pests, fire and other threats:

(b) Observe the provisions of the Forests and Rural Fires Act 1977:

2. Domestic livestock

That domestic livestock including, but not exclusively, cattle, pigs, sheep, goats and horses shall be excluded from the Forest Area:

3. Flora and fauna protection and soil and water quality

That all forest management practices shall be designed to:

(a) Protect riparian areas and minimise pollution in all natural ponds, natural watercourses and natural swamplands in the Forest Area:

(b) Minimise soil erosion:

(c) Retain and enhance flora and fauna:

In particular:

Trees shall be marked prior to harvest and trees identified to have higher epiphyte loads, nest holes or bat roosts shall be excluded from harvest.

Permanent fencing shall be erected around the entire perimeter of the forest area and maintained for the term of the permit.

s7(2)(a)

lm

Schedule 2

Sustainable Forest Management Prescriptions

"10. Sustainable forest management prescriptions –

- (1) The principal sustainable forest management prescription is that the rate of harvest from a forest or group of forests managed as a unit shall be limited to a level at which the forest can continue to supply an annual or periodic non-diminishing yield in perpetuity, which yield shall include the harvest of windthrown or dead trees as they become available.
- (2) The other sustainable forest management prescriptions are as follows:
 - (a) An area that is representative of the forest area and does not exceed 20 percent of the total forest area to which the plan relates may be set aside and be unavailable for logging:
 - (b) Podocarp and kauri species shall be harvested only by single tree or small group harvesting using low impact techniques. Harvesting shall, as far as possible, be restricted to the selective removal of trees predisposed to windthrow or early death. Throughout the term of the sustainable forest management plan, the character and structure of all parts of the forest shall be maintained:
 - (c) Beech and other light-demanding hardwood species shall be harvested only in coupes of 0.5 hectares or less:
 - (d) Shade-tolerant and exposure-sensitive broadleaved hardwood species shall be harvested only by single tree or small group harvesting using low impact techniques. In creating gaps, regard shall be had for natural regeneration characteristics of the species targeted for logging:
 - (e) Where any podocarp, kauri, or shade-tolerant or exposure-sensitive broadleaved hardwood species is harvested and sufficient advanced growth is lacking, there shall be planted for each tree removed at least 5 nursery-raised seedlings of at least 60 centimetres in height of the same species which seedlings shall, where practicable, be raised from seed collected from the district in which such seedlings are to be planted:
 - (f) Where there is a failure of regeneration in a light-demanding hardwood forest, the failure shall be corrected by the planting of nursery-raised seedlings with preference being given to using seedlings of the same species which seedlings shall, where practicable, be raised from seed collected from the district in which the seedlings are to be planted.
- (3) Before harvesting any coupe within a distance from a harvested coupe equal to the width of the harvested coupe, regeneration on the harvested coupe must-
 - (a) Have reached a predominant mean height of 4 metres; and
 - (b) Have reached a stocking of the harvested species equal to or greater than the forest before harvesting."

GRANT OF FORESTRY RIGHT

FORESTRY RIGHTS REGISTRATION ACT 1983

Wellington Land Registry

PROPRIETOR:

s7(2)(a)
s7(2)(a) of the s7(2)(a) at Rocky Hills, RD3 Masterton

together with their successors and assigns

HOLDER:

Forestry NZ Limited a company having its registered office at Level 8
HSBC Tower, 62 Worcester Boulevard, Christchurch

together with its successors and assigns

DATE: 20 December 2010

BACKGROUND

- A. The Proprietor is the registered proprietor of all that parcel of land containing approximately 926.3254 hectares more or less being the property contained in certificate of title WN30/198 (Wellington Registry) and subject to the encumbrances, liens and interests set out in the certificate of title attached as Schedule 1 ("the Land").
- B. In consideration of the covenants and conditions herein contained, the Proprietor has agreed to grant to the Holder a Forestry Right pursuant to the provisions of the Forestry Rights Registration Act 1983 ("the Forestry Right") in respect of an approximate area of 228 hectares as delineated on the map in Schedule 3 attached hatched in red being a part of the Land.
- C. The Forest Block will also be registered into the Emissions Trading Scheme with the Holder as the participant. The terms applying to receipt and application of carbon credits and allocation of carbon liabilities are fully documented at Schedule 2.
- D. The Proprietor and the Holder wish to record their respective and their mutual rights and obligations in relation to the Forest Block and also in relation to the Proprietor's land adjoining the Forest Block ("Adjoining Land") to the extent only that such Adjoining Land is, or may be affected by the operation of this Deed.

OPERATIVE PART

1. INTERPRETATION

1.1 Definitions

In this Deed, unless the context requires otherwise, the following terms will have the meanings given to them in this clause:

"Act" means the Forestry Rights Registration Act 1983.

"Banks Block" means an approximate area of 25 hectares as delineated on the diagram in Schedule 3 cross-hatched in red being a part of the Forest Block.

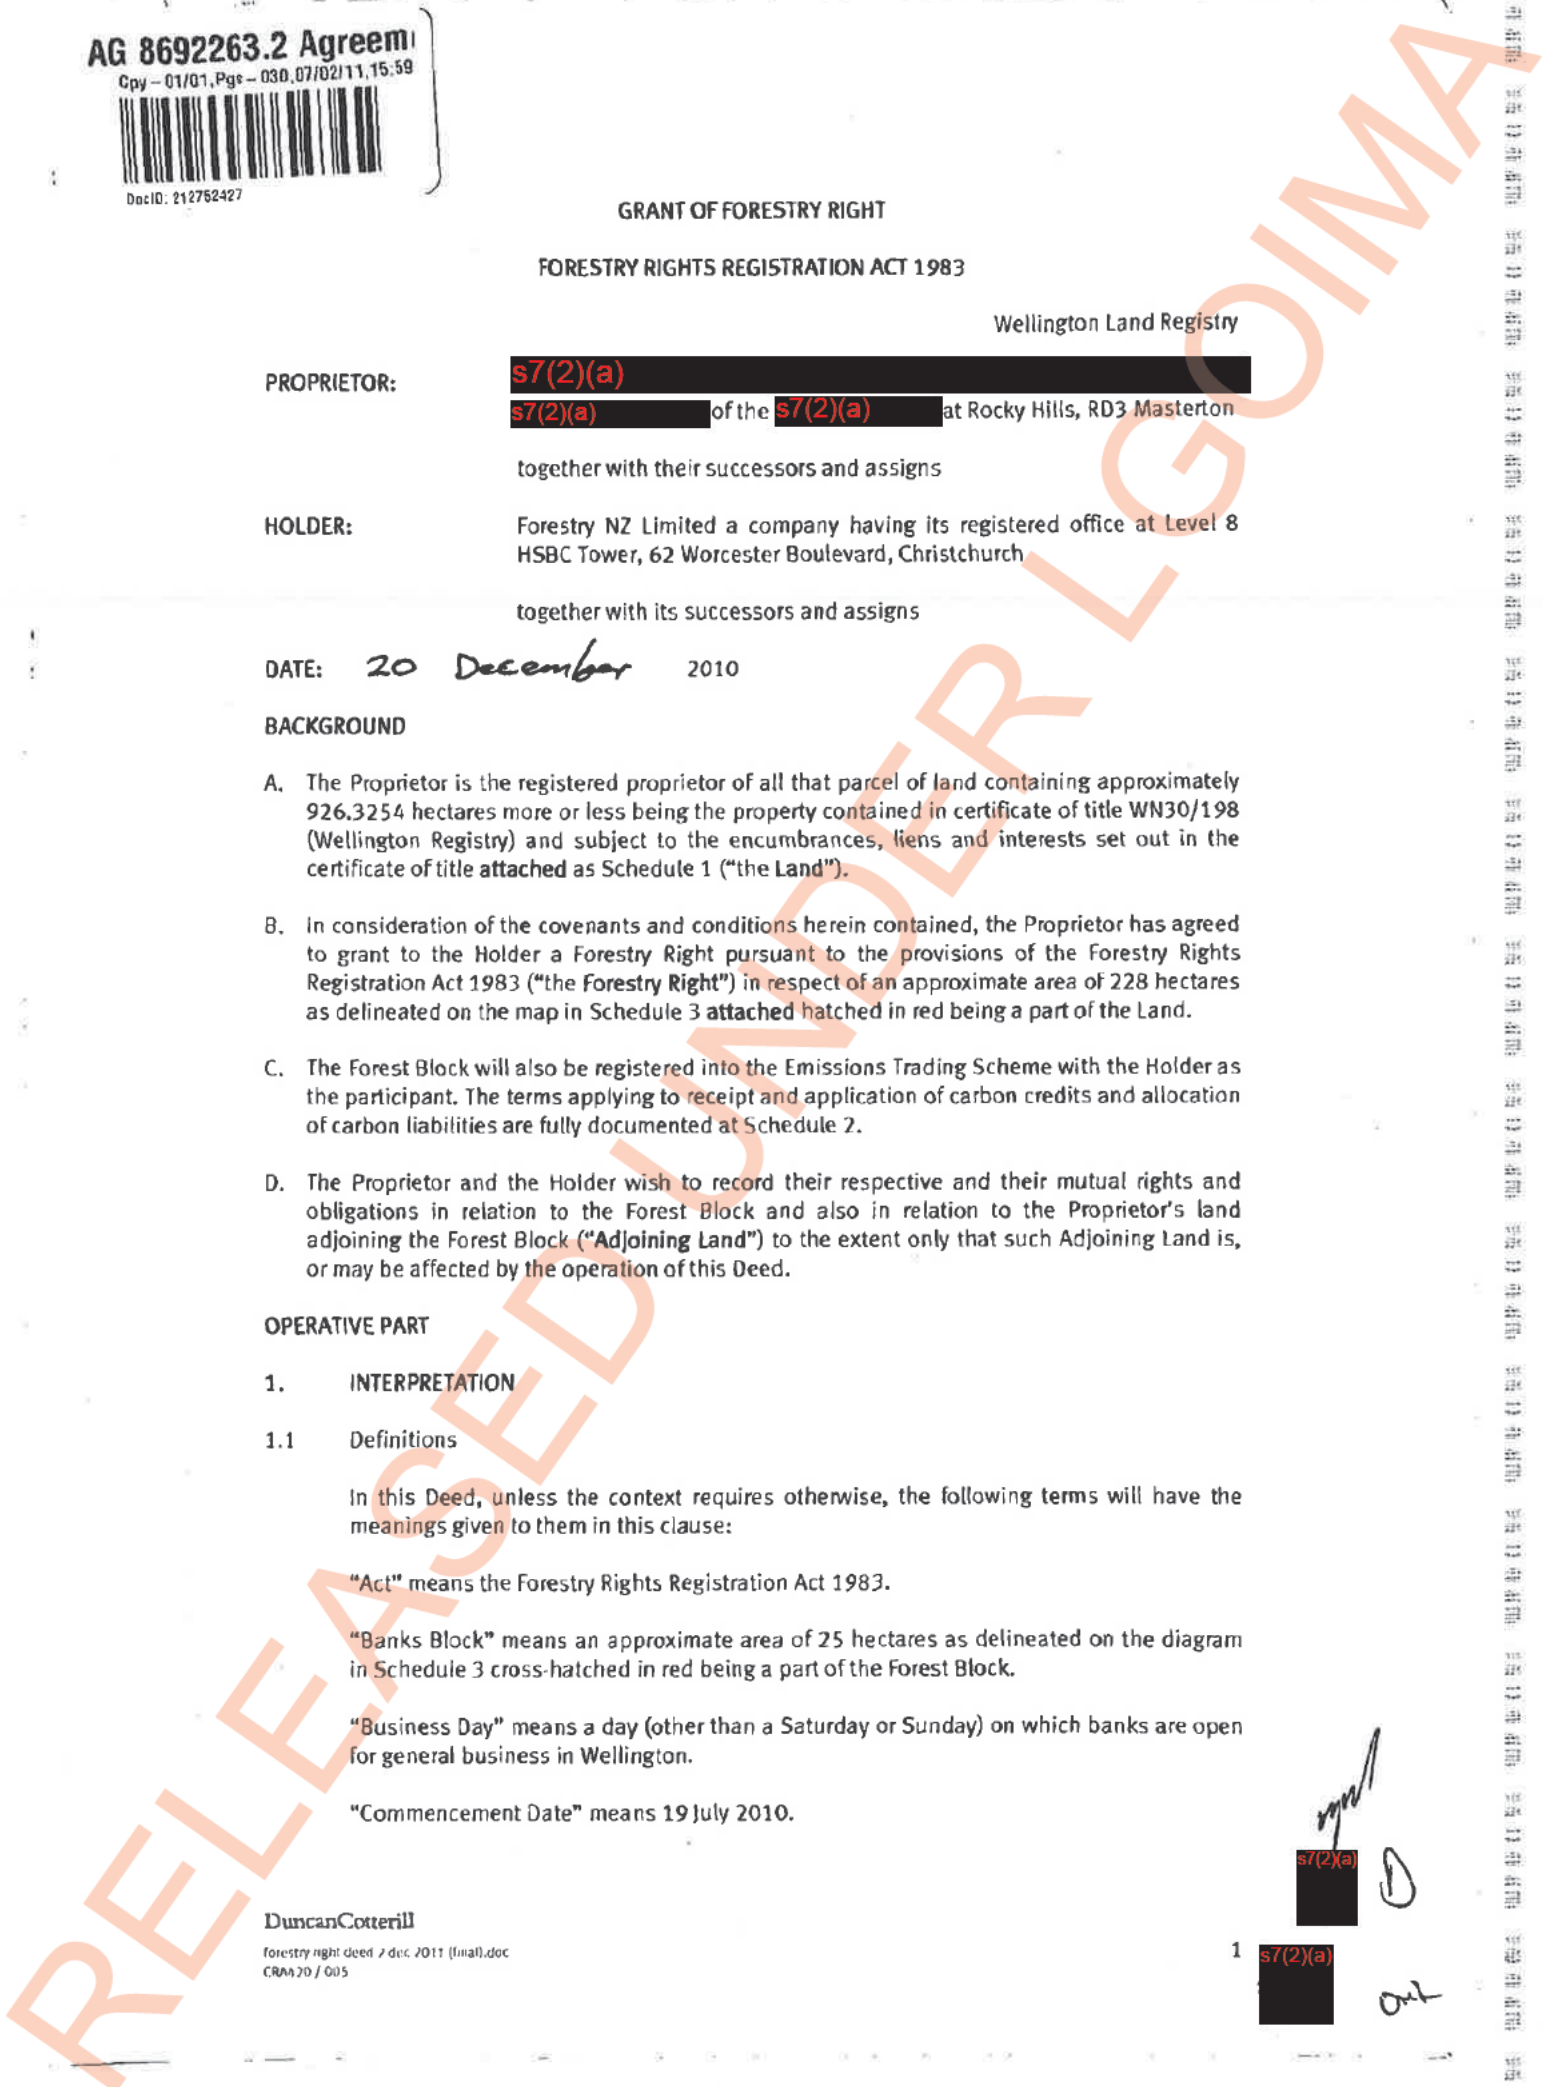

"Business Day" means a day (other than a Saturday or Sunday) on which banks are open for general business in Wellington.

"Commencement Date" means 19 July 2010.

Duncan Cotterill

forestry right deed 7 dec 2011 (final).doc
CRM/20/005

s7(2)(a)
out

"Condition Precedent" means evidence that the Proprietor has procured all necessary access agreements for the Holder to access and harvest the trees on the Banks Block.

"Election Notice" means a notice substantially in the form set out in Schedule 4.

"Expiry Date" means 19 July 2080.

"First Plantable Area" means the plantable area within the Forest Block to be planted by the Holder during 2010 (as determined by the Holder at its sole discretion as evidenced through planting records).

"Forest Block" means the area of approximately 228 hectares as delineated on the diagram in Schedule 3 hatched in red being a part of the Land but excluding, until the Holder has confirmed that it has received the Condition Precedent in accordance with clause 2.1, the Banks Block.

"Forestry Right" has the meaning given to that term in the Act.

"Net Sale Proceeds" means the sale proceeds from the harvest of trees planted by the Holder on the Forest Block less all Harvest Costs in respect of those trees and excluding GST (if any).

"Related Company" has the meaning given to that term in the Companies Act 1993.

"Second Plantable Area" means the plantable area within the Forest Block to be planted by the Holder during 2011 (as determined by the Holder at its sole discretion).

"Surrender Date" means the date the Holder specifies that it surrenders this Deed from, as set out in the Surrender Notice.

"Surrender Notice" means a notice substantially in the form set out in Schedule 5.

"Termination Date" means the earlier of the Expiry Date and the Surrender Date (if any).

1.2 Construction

A reference to legislation or to a provision of legislation includes any amendments and re-enactments of it, a legislative provision substituted for it and a regulation, rule, order or instrument made under or issued pursuant to it. If any legislation is repealed and there is no statutory provision similar to that referred to in this Deed re-enacted then the provision so repealed shall notwithstanding its repeal continue to apply as if it was a clause set out in this Deed.

In this Deed the expressions "the Proprietor" and "the Holder" shall include, where appropriate, the respective executors, administrators, successors and assigns of the Proprietor and the Holder.

2. CONDITION PRECEDENT

2.1 The obligations of the Holder under this Deed in respect of the Banks Block shall not apply unless the Holder has received the Condition Precedent in form and substance satisfactory to it (in its sole discretion).

2.2 The Holder will promptly notify the Proprietor on being satisfied under clause 2.1.

DuncanCotterill

forestry right dherf 2 dec 2011 (final).doc
GRA4 20 / 005

s7(2)(a)

3. FORESTRY RIGHT

3.1 In consideration of the covenants and conditions on the part of the Proprietor and the Holder expressed or implied herein the Proprietor transfers and grants to the Holder, from the Commencement Date, as a Forestry Right, the rights to:

- (a) establish, plant, manage, cultivate, maintain, protect and render to productive harvest and carry away, sell and otherwise utilise all trees, timber and logs growing or to be grown on the Forest Block which have been planted under this Deed;
- (b) to make, install and use all and any such roadways, tracks and gates on the Forest Block and over the Land and Adjoining Land as may be necessary for the purpose of managing and utilising the said trees on the express condition that the Holder make good any damage caused to the Land by its use of the Land pursuant to this clause. In assessing any such damage the parties will if required appoint an independent assessor to inspect the Land both prior to and after the use of the same by the Holder;
- (c) by itself or by its agents, servants, licensees and invitees from time to time to enter and pass and re-pass upon the Land and Adjoining Land to the Forest Block with or without machinery and vehicles and plant of all kinds for the purposes of this Deed;
- (d) to construct upon the Land and Adjoining Land such works as are necessary or convenient for the full enjoyment of this Deed and to remove the same on expiry of the term or sooner determination of this grant. Any earthworks or roading constructed by the Holder to be excluded from such removal obligation; and
- (e) generally to do whatever the Holder, acting reasonably, determines to be necessary or convenient for planting, managing, maintaining and harvesting the trees on the Forest Block and for obtaining the full benefits of the rights and privileges hereby granted.

3.2 The Holder may sub-contract or sub-license any of its rights under this Deed at any time.

4. PAYMENT

4.1 In consideration of the rights granted to the Holder by the Proprietor under this Deed, the Holder will pay the Proprietor:

- (a) on the date this Deed is registered under the Act, a one-off payment of \$700 per hectare (plus GST (if any)) of the First Plantable Area. In so far as the area of the First Plantable Area is estimated by the Holder at the time of payment; any difference in area to the final First Plantable Area will result in payment adjustments under clause 4.2;
- (b) promptly upon completion of planting, a one-off payment of \$700 per hectare (plus GST (if any)) of the Second Plantable Area;
- (c) promptly upon receipt by the Holder, 10% of the Net Sale Proceeds and, for each year the rotation from planting to harvest of the trees on the Forest Block extends beyond 35 years from the Commencement Date, 0.2857% of the Net Sale Proceeds (calculated on a per annum basis); and

s7(2)(a)
[Redacted]
D
out

- (d) subject to the terms of Schedule 2, in each year during the Carbon Rental Period promptly upon receipt of the Annual Allocation, the applicable Carbon Rental for that year.
- 4.2 If, through subsequent mapping, it is demonstrated that the area planted by the Holder is greater than the estimated First Plantable Area and/or Second Plantable Area then the Holder will, subject to clause 4.4, pay the Proprietor an amount equal to \$700 per hectare (plus GST (if any)) of the difference. Such payment to be made within 10 Business Days of receipt of the new mapping information by both parties.
- 4.3 If, through subsequent mapping, it is demonstrated that the area planted by the Holder is less than the estimated First Plantable Area and/or Second Plantable Area then the Proprietor will refund the an amount equal to \$700 per hectare (plus GST (if any)) of the difference. Such payment to be made within 10 Business Days of receipt of the new mapping information by both parties. The Proprietor irrevocably authorises the Holder to set-off any such amount not so paid against any future amount payable by the Holder to the Proprietor under this Deed.
- 4.4 If the Holder determines that the Proprietor has materially breached the restriction on the Proprietor grazing animals on the Forest Block contained in clause 8.5 (excluding, for the avoidance of doubt, any wild animals), the Holder is entitled to withhold an amount equal to the material damages (calculable on an after-tax basis) caused by those grazing animals from any payment or transfer due to the Proprietor under this clause 4 or Schedule 2 (provided that those damages arise from the Proprietor's negligence or deliberate action or omission).

5. CARBON STOCKS

The Holder and the Proprietor acknowledge and agree that the provisions of Schedule 2 are incorporated into this Deed and the Proprietor agrees that it shall not take any actions the effect of which prevents or frustrates the Holder from participating in the ETS or any subsequent carbon trading scheme.

6. TERM, HARVEST AND TERMINATION

6.1 Term

- (a) This Deed shall, subject to the provisions of this clause 6, be for a term of seventy (70) years commencing on the Commencement Date and shall expire on the Expiry Date.
- (b) The Holder will have a preferential right to negotiate a new Forestry Right with the Proprietor to be entered into from the Expiry Date as set out in clauses 6.1(c) to (e) below.
- (c) The Holder must give written notice to the Proprietor no later than three (3) months (but not more than twelve (12) months) before the Expiry Date if the Holder wishes to renew the Forestry Right.
- (d) The Parties will have three (3) months from the date of the notice or such longer period as they mutually agree to conclude a new Forestry Right on reasonable commercial terms and conditions acceptable to both parties.
- (e) If the Holder does not give written notice under clause 6.1(c) or the parties are unable to negotiate a new Forestry Right then this Deed will terminate on the Expiry Date.

DuncanCotterill

forestry right deed 2 dec 2011 (final).doc
CRA420 / 005

6.2 Right to Surrender

The Holder may surrender this Forestry Right (at its sole discretion) by providing the Proprietor with a Surrender Notice, not less than 10 Business Days prior to the proposed Surrender Date.

6.3 Termination

On and from the Termination Date, any trees, timber and logs not harvested and removed from the Forest Block under this Deed will revert to the Proprietor. The Carbon Liabilities will be apportioned as set out in Schedule 2.

7. HOLDER'S COVENANTS

7.1 Use of Forest Block

- (a) The Holder shall use the Forest Block only for the purposes of and incidental to the objects of this Deed and in particular shall not be entitled to remove from the Land any minerals, metals, stones, coal, earth, rock, sand, clay, gravel or shingle.
- (b) The Holder shall be generally responsible for good forestry husbandry with respect to all forestry management practices employed by it. It is agreed that the primary use of the Forest Block is for timber and carbon value and any harvesting decisions will reflect such primary use.
- (c) The Holder shall exercise its rights hereunder so as to cause as little disruption as in all the circumstances is reasonably possible (but having regard to the rights hereby granted to the Holder) to the Proprietor and the Proprietor's husband like farming of the Adjoining Land and in particular:
 - (i) shall use reasonable efforts not to disturb the livestock of the Proprietor, or its lessees and licensees (as the case may be);
 - (ii) shall leave all gates as found and report any damage to fences or gates;
 - (iii) shall use reasonable efforts to minimise any problems caused by the acts or the omissions of the Holder, or the Holder's agents, contractors, employees, invitees or any other person for whom the Holder is responsible;
 - (iv) shall remove any litter brought onto the Land by the Holder, the Holder's agents, contractors, employees, invitees or any other person whom the Holder is responsible; and
 - (v) prior to termination of this Deed, shall complete all harvest, cutting and clearing work to a reasonable standard such that re-planting can occur.
- (d) The Holder shall (subject to any statutory duties imposed on the Holder) have the right (without liability to the Proprietor) to fell, destroy or otherwise eliminate all undesirable trees or plants in the Forest Block after the date of this Deed, or other undesirable growth on the Forest Block by slashing, poisoning, use of chemical spray or such other means provided it is usual, customary or accepted as a reasonable method of forest land management.

7.2 Water, Pipelines and Powerlines

- (a) The Holder shall not be responsible for the supply of water (if any) to the Forest Block and shall not damage or interfere in any way with any water pipelines situated on the

DuncanCotterill

forestry right deed 2 doc 2011 (final).doc
CRM420 / 005

5

s7(2)(a)

out

Land nor carry out any plantings which would prevent the Proprietor from carrying out maintenance and replacement of such pipelines.

- (b) Subject to the lawful requirements of the Ministry of Energy, Telecom Corporation of New Zealand Limited, Natural Gas Corporation of New Zealand Limited, Transpower New Zealand Limited or of any other Body, Authority or State Owned Enterprise having the lawful right of access to the Land and any other proper Body or Authority having control over the same and where in the reasonable opinion of the Holder the practicalities of good forest management so require, the Holder may clear and plant or not plant any of the Forest Block under or adjacent to electric transmission lines or telephone transmission lines or pipelines carrying gas, liquid or solid substances and may leave unplanted an area or width greater than the minimum area or width required by such Body, Authority or State Owned Enterprise having control over such line or pipelines.

7.3 Fencing

- (a) The Holder shall take reasonable steps to minimise damage to external fences and gates around the boundary of the Forest Block and shall rectify any such damage to ensure that they are in an equivalent stock proof state to that prior to such damage.
- (b) The Holder shall take reasonable steps to minimise damage to internal fences and gates located on the Forest Block from poor management of the Forest Block (which shall include, without limitation, not felling thinned trees onto internal fences) prior to preparation for any harvest of the Forest Block and shall rectify any such damage to ensure that they are in an equivalent state to that prior to such damage.
- (c) The Holder may erect boundary and internal fences and gates located on the Forest Block.

7.4 Fire Protection

- (a) The Holder must in relation to the Forest Block and the Proprietor must in relation to the Adjoining Land, comply in all respects with and indemnify the other against all liability under the Forest and Rural Fires Act 1977.
- (b) Subject to the provisions of the Forest and Rural Fires Act 1977 or any other statutory regulation affecting the same the Holder must:
 - (i) carry out and maintain all proper fire protection works on the Forest Block; and
 - (ii) take all reasonable measures that may be necessary to prevent the spreading of any fire on, from, or across the Forest Block.
- (c) The Holder is entitled to construct fire breaks and take such normal fire protection measures on or adjacent to the Forest Block as may from time to time be deemed by the Holder to be necessary.
- (d) Notwithstanding anything contained in clause 6.4(a) above or elsewhere in this Deed, the Holder may refuse access to any person other than the Proprietor, or an authorised officer representing the Proprietor (the Proprietor being bound to give prior notification to the Holder of the name and address of the person concerned in any such case) requiring access for necessary purposes in the course of the closed fire season in each year.

DuncanCotterill

forestry right deed 2 dec 2011 (final).doc
CMA420 / 003

6

s7(2)(a)

s7(2)(a)

Out

7.5 Compliance with Statutes and Regulations

- (a) The Holder must comply in all respects with and indemnify the Proprietor against all liability under all and any of:

Accident Compensation Act 2001
Bio Security Act 1993
Building Act 2004
Climate Change Response Act 2002 (subject to the provisions in Schedule 2)
Forest and Rural Fires Act 1977
Forests Act 1949
Hazardous Substances and New Organisms Act 1996
Health and Safety in Employment Act 1992
Machinery Act 1950
Resource Management Act 1991
Wildlife Act 1953

and all other statutory provisions, regulations and bylaws in any way from time to time affecting the Forest Block, including the trees growing thereon, where such liability arises directly as a result of the Holder's use of the Forest Block under this Deed.

7.6 Proprietor's Access and Right to Inspect

- (a) Subject to clause 7.6(b) below and the reasonable requirements of forest management, the Proprietor and its duly appointed agents or representatives are entitled at all reasonable times to enter upon the Forest Block for the purposes of:

- (i) viewing and inspecting the same;
- (ii) carrying out maintenance or replacement of any water pipelines pursuant to clause 7.2(a) above;
- (iii) complying with its obligations in respect of fire protection; and
- (iv) any other matter reasonably required by the Proprietor in relation to the ownership or occupation of Adjoining Land by the Proprietor, its lessees, licensees, contractors, agents, employees and invitees (as the case may be).

- (b) In the event that the Proprietor or its duly appointed agents or representatives enter upon the Forest Block to carry out any of the matters referred to in clause 7.6(a) above, the Holder will not be liable to:

- (i) any person (including the Proprietor or the beneficial owner of the Land) for the acts, defaults or omissions of the Proprietor or its respective agents or representatives (or any of them) whether or not the same would otherwise constitute a breach of the terms of this Deed; or
- (ii) the Proprietor, the beneficial owner of the Land or their respective agents or representatives (or any of them) for any loss, injury or damage in any way incurred as a result of, or arising out of, the entry of such person upon the Forest Block pursuant to clause 7.6 and the Proprietor indemnifies and holds harmless the Holder in the event that the Holder incurs any liability whatsoever arising as a result of the entry by the Proprietor, the beneficial owner of the Land or their respective agents or representatives (or any of them) upon the Forest Block pursuant to this clause.

DuncanCotterill

forestry right deed 2 dec 2011 (final).doc
CRA620 / 005

7.7 Insurance

- (a) The Holder will maintain at its own expense adequate public liability insurance cover of not less than \$2,000,000 with the Proprietor being noted on the policy as an interested party.
- (b) The Holder will maintain at its own expense adequate fire, lightening, malicious damage and wind throw protection insurance as is considered reasonable and commercially viable for the Forest Block and to protect against any fire damage to neighbouring property or the Adjoining Land with the Proprietor being noted on the policy as an interested party.

7.8 Rates

The Holder will pay to the Proprietor its fair proportion of the local authority and regional council rates calculated on the basis of the proportion of the rateable area occupied by the Forest Block and the rates applicable to the Forest Block for the period falling within the term of this Deed. Such payment will be made on an annual basis and within 30 days of receipt of an invoice from the Proprietor (attaching evidence of the local authority and regional council rates for that year).

8. PROPRIETOR'S COVENANT

8.1 The Proprietor grants the Holder the exclusive right to:

- (i) use the Forest Block for the purposes of establishing and maintaining the trees situated on the Forest Block;
- (ii) manage the Forest Block (including, without limitation, making all decisions in relation to grazing on the Forest Block); and
- (iii) harvest any trees situated on the Forest Block, which were established under this Deed excluding any native trees present on the Forest Block prior to the Commencement Date.

8.2 The Proprietor grants the Holder, its licensees, contractors, agents, employees and invitees free rights of passage over the Forest Block and over the Land to the Forest Block and will do all things necessary (in the opinion of the Holder) to enable the Holder, at the Holder's expense, to obtain reasonable and practical access to the Forest Block across the Land or otherwise howsoever during the term created by this Deed.

8.3 The Proprietor will use its best endeavours to authorise the Holder to use any existing rights of access held by the Proprietor in connection with the Land and to assist the Holder to obtain consent from any adjacent land owners in order for the Holder to access the Land via any such adjoining land. In particular, and without limiting this clause 8.3, the Proprietor will use its best endeavours to assist the Holder in obtaining consent from adjacent land owners of the Banks Block to obtain legal access for the Holder to the Banks Block.

8.4 The Proprietor will (subject to the provisions of the Forest and Rural Fires Act 1977 or any other statutory regulation affecting the same):

- (i) carry out and maintain all proper fire protection works on the Land (other than the Forest Block); and
- (ii) take all reasonable measures that may be necessary to prevent the spreading of any fire on, from or across the Land (other than the Forest Block).

forestry right deed 2 dec 2011 (final) / loc
CRA4 20 / 005

8.5 The Proprietor will not graze animals on the Forest Block without the Holder's prior written consent and will take all reasonable steps to prevent its animals entering the Forest Block and indemnify the Holder (on an after-tax basis) against any loss or liability of the Holder resulting from a breach or failure of this obligation.

9. MUTUAL COVENANTS

9.1 Code of Conduct

The Proprietor and the Holder will, at the request of either of them, agree a code of conduct in respect of access to the Forestry Block.

9.2 Hazards

Neither the Proprietor nor the Holder (or their employees, representatives or agents) will light any fires upon the Land which might spread and damage any improvements, trees or livestock thereon. Neither party will use any chemicals on the Land which might damage the trees or livestock thereon.

9.3 Default

- (a) If either party is in default under this Deed the other party may notify such party in writing to remedy such default within thirty (30) days of receipt of such notice.
- (b) Notwithstanding clause 9.3(a), the party not in default may waive such default in writing but such waiver will only apply to the particular default waived and will not be a continuing waiver.
- (c) If the party in default fails to remedy such default within the time set out in clause 9.3(a), or a default requires urgent attention, the non-defaulting party may take such action as it deems necessary to remedy such default and the defaulting party shall be responsible for all such costs of such remedial action.
- (d) If a default is not capable of remedy, either party may without prejudice to any other right or rights they respectively may have, refer that default issue to arbitration in accordance with clause 9.4.

9.4 Disputes and Arbitration

- (a) Should any dispute or disagreement whatsoever arise between the parties touching any matter under or relating to this Deed or if the parties fail to agree on any matter on which they are required by the terms of this Deed to agree, any such dispute or difference or failure to agree will be defined by notice by the party raising it to the other party and will forthwith be discussed (on a "without prejudice" basis) by the parties in an attempt to resolve their difference amicably. All discussions as to any matter in dispute relating to this Deed will be held in such place as shall be appropriate and most convenient to the parties.
- (b) If it appears that the matter cannot be resolved after initial discussion the parties will adjourn for at least two days and then again attempt to resolve the matter by discussion.
- (c) Only after discussion between the parties fails to produce agreement between them on the matter in dispute will the matter be referred to arbitration in terms of the remaining provisions of this clause provided however that if a period of three (3) calendar months elapses from the date of service of a notice defining a dispute, such

DuncanCotterill

forestry right deed / dec 2013 (final).doc
CRA620 / 005

s7(2)(a)

dispute may thereafter be referred by any party to arbitration in terms of the remaining provisions of this clause.

- (d) Subject to clauses 9.3(a), (b) and (c) above, any matter in dispute between the parties, or any person claiming under or through any of the parties, shall be determined by arbitration. Any referral to arbitration may be made by any party to the dispute and the matter so in dispute shall be determined by a sole arbitrator whose decisions shall be final and binding upon the parties in all respects. The appointment of a sole arbitrator shall be agreed upon by the parties within seven (7) days of the referral first being made and, if not so agreed, shall be determined by the president for the time being of the New Zealand Law Society or its equivalent or someone appointed by him or her for such purpose. The arbitrator shall be, and is, hereby charged with determining matters at issue as expeditiously as is practical in the circumstances and in this regard the arbitrator shall in his or her complete discretion determine the venue and all procedural matters.
- (e) Without limiting the generality of the foregoing, the arbitrator shall receive such sworn or unsworn statements as the parties may wish to place before him or her and he or she may accept unsworn statements without requiring the deponent to appear before him or her and he or she may elect otherwise to hear evidence formally or informally.
- (f) The arbitrator's decision shall be final and binding upon all parties to the dispute and shall not be called into question in any matter whatsoever by any party, or person claiming through any such party.
- (g) The arbitrator may, in his or her unfettered discretion, determine and award that the costs of the dispute be borne in whole, or in part, by the parties, or any of them, to the dispute. The parties shall be entitled to present to the Arbitrator submissions as to costs prior to the Arbitrator making a finding decision as to costs.

10. Miscellaneous

10.1 Registration

The Holder shall take all steps necessary to register this Deed as a Forestry Right pursuant to the provisions of the Act.

10.2 Further Assurance

The parties agree to execute all such documentation and do all such acts and things as may reasonably be required in order to give effect to, and carry out, the terms of this Deed.

10.3 Assignment

- (a) The Proprietor may assign this Deed to any person or company provided that the person or company to which the Deed is assigned enters into a deed of covenant with the Holder to observe, perform and keep all the covenants, conditions and agreements on the part of the Proprietor herein expressed or implied. Such deed of covenant will be prepared by the solicitor for the Holder at the expense of the Proprietor.
- (b) The Holder may assign this Deed to any Related Company of the Holder or, with the prior written consent of the Proprietor (at its sole discretion), to any third party provided that the person or company to which the Deed is assigned enters into a deed of covenant with the Proprietor to observe, perform and keep all the covenants,

10

s7(2)(a)

s7(2)(a)

one

conditions and agreements on the part of the Holder herein expressed or implied. Such deed of covenant will be prepared by the solicitor for the Holder at the expense of the Holder.

10.4 Security

The Holder may, without the consent of the Proprietor, mortgage or charge its interest under this Deed.

10.5 Notices

(a) Any demand or requirement or notice which pursuant to the provisions in this Deed is to be given by either party to this Deed shall be in writing and shall be signed by the party giving the demand or requirement or notice or by an officer, agent or solicitor of that party and shall be deemed to have been duly served on the other party if delivered to it personally, sent by registered post to that other party's last known business address or sent by electronic means (commonly known as email).

(b) Any notice given pursuant to this Deed will be deemed to be validly given:

(i) in the case of delivery, when received;

(ii) in the case of posting, on the second day following the date of posting; and

(iii) in the case of electronic transmission by email, at the time specified in the email transmission which was not returned as undeliverable or as containing any error.

10.6 Costs

The parties shall each meet their own costs in relation to the negotiation, preparation and completion of this Deed.

10.7 Statutory Takings

If the Forest Block or any part thereof including the forest produce thereon is taken by proclamation or otherwise by any local authority or the Crown pursuant to the Public Works Act 1981 or any other Statute so enabling, the amount of compensation paid in respect of the growing trees upon any Land so taken shall belong to the Holder absolutely.

10.8 Independent Trustee

The Holder agrees that the liability of s7(2)(a) being a s7(2)(a) s7(2)(a) the "Trustee" created by a Deed of Trust dated 13 March 2002 (the "Trust") shall be limited to the extent of the net assets for the time being of the Trust which is under the control of the Trustee in the ordinary course of administration of the Trust. Where the Holder incurs any loss as a result of breach of trust by the Trustee due to default or dishonesty on the part of the Trustee this limitation of liability will not apply to the Trustee and the Trustee will be personally liable to the Holder to the extent the Trust assets do not satisfy all the Trustee's obligations to the Holder.

10.9 Amendment

No amendment to this Deed will be effective unless it is in writing and signed by the parties.

10.10 Severability

If any provision of this Deed is, or becomes, unenforceable, illegal or invalid for any reason, this Deed will remain in full force apart from such provision which will be deemed deleted.

10.11 Governing Law

This Deed will be governed by New Zealand law.

SCHEDULE 2

Emissions Trading Scheme Terms

1. Definitions

In this Schedule, unless the context requires otherwise, the following terms will have the meanings given to them in this section:

"Allocation Date" means the date on which the Holder receives its Annual Allocation.

"Annual Allocation" means the number of Carbon Credits issued and allocated to the Holder in respect of the Forest Block during that year.

"CAA" means a carbon accounting area within the Forest Block.

"Carbon Credits" means Units issued and allocated or which are entitled to be issued and allocated under the ETS in respect of the Forest Block.

"Carbon Liabilities" means a liability to surrender Units under the ETS in respect of the Forest Block.

"Carbon Rental" means the sum payable to the Proprietor by the Holder in respect of the annual allocation of Carbon Credits generated by the Forest Block. This is calculated as: $(0.05 \times \text{Annual Allocation}) \times (\text{Net Spot Price})$ less $(0.1 \times \text{Operating Costs for that year})$.

"Carbon Rental Period" means the period commencing on the date falling four (4) years from the Commencement Date until the Expiry Date.

"Carbon Stocks" means the Unit balance of the Forest Block from time to time as determined under the ETS.

"ETS" means the New Zealand Emissions Trading Scheme established under the Climate Change Response Act 2002 and includes any replacement emissions trading scheme whether replacing the emissions trading scheme available on the Commencement Date or an alternative scheme available to the Forest Block and opted into by the Holder.

"Harvest Costs" means all direct costs and expenses incurred in preparing for, arranging, managing and completing the harvest and sale of trees including all transport costs.

"Net Spot Price" means an amount equal to the spot price for a Unit calculated on the basis that the Holder had sold 5% of the Annual Allocation into the open market on the date falling ten (10) Business Days after the Allocation Date as determined by the Holder (acting reasonably) by reference to the price displayed by OMFfinancial Limited at www.nzcarbonmarket.com (or its successor web page) or such other broker as agreed to by the parties less brokerage fees that would have been incurred if those Units had been sold.

"Operating Costs" means the Holder's operating costs in respect of the Forest Block including, without limitation, insurance premiums in respect of the Forest Block, rates (if any), forest manager fees, carbon measurement and compliance costs, fencing costs and access maintenance but excluding planting, thinning and pruning costs and any Harvest Costs.

"Participation" means participation in the ETS as a registered participant.

DuncanCotterill

forestry right deed 7 dec 2011 (final).doc
CRA470 / 005

16

s7(2)(a)

s7(2)(a)

Out

"Root Carbon" means the net Carbon Stocks for which there is no liability for repayment after harvest of the first rotation under the ETS. For the avoidance of doubt, the lack of a liability for repayment of the net Carbon Stocks referred to in this definition is due to growth in Carbon Stocks of the second rotation of trees replacing the lost Carbon Stocks from gradual decay of the residue remaining on site after any harvest of the Forest Block (that is, the timber and carbon stored within it whether in the foliage, branches, stumps, woody litter on the forest floor or tree roots).

"Root Carbon Compensation" means the number of Carbon Credits to be surrendered by the Holder to the Proprietor on the Termination Date to provide compensation for the ongoing Carbon Liabilities from loss of Carbon Stocks from the first rotation, as calculated and determined under section 4.3.

"Root Carbon Indemnity" means the indemnity given by the Holder to the Proprietor from the Termination Date to deliver Units on an ongoing basis to allow the Proprietor to meet its Carbon Liabilities from loss of Carbon Stocks from the first rotation following harvest.

"Unit" means a "New Zealand Unit" under the ETS or a "Kyoto Unit" or "approved overseas unit" and as such definitions may be amended from time to time in the Climate Change Response Act 2002.

2. Registration

- 2.1 The Holder shall register the Forest Block under the ETS and the Holder will be the sole Participant in respect of the Forest Block during the Carbon Rental Period.
- 2.2 The Forest Block will be divided into distinct CAAs by the Holder (or its agents) as part of the ETS registration.
- 2.3 The Proprietor shall do all acts and things, including the giving of all such approvals, as may be required by the Holder to register the Forest Block under the ETS. The Holder shall prepare all such approvals at its cost and provide the same to the Proprietor.
- 2.4 Subject to the terms of this Deed, the Holder is entitled to all Carbon Credits in respect of the Forest Block and is liable for all Carbon Liabilities in respect of the Forest Block during the term of this Deed.

3. Payment

- 3.1 Subject to clauses 4.2, 4.3, 4.4 and section 3.2 of this Schedule, the Holder will pay the Proprietor, in each year during the Carbon Rental Period promptly upon receipt of the Annual Allocation, the applicable Carbon Rental for that year.
- 3.2 If the Proprietor provides the Holder with an Election Notice not less than 10 Business Days prior to the last day of the applicable year during the Carbon Rental Period, the Holder will promptly upon receipt of the Annual Allocation, transfer an amount of Units equal to the value of 5% of the Annual Allocation less a number of Units equal in value to 10% of the Operating Costs for that year to the holding account specified in the Election Notice. The Holder will have no obligation to pay the Proprietor the Carbon Rental in respect of the year(s) the Election Notice refers to. Any Election Notice shall be irrevocable and may be in respect of one or more years during the Carbon Rental Period.
- 3.3 Neither party shall be liable for or under any obligation to the other party in respect of the other party's Carbon Liabilities and each party shall indemnify and keep indemnified the other party from and against any and all liability, loss, injury, damage, costs or expenses whatever suffered or incurred by that party arising out of, attributable to or caused by the other party's Carbon Liabilities or the other party's participation in the ETS. Unless

DuncanCotterill

forestry right deed 2 dec 2011 (final).doc
CRA470 / 005

otherwise provided in this Deed the Holder will cease to have liability for the Carbon Liabilities from the Termination Date provided it has complied with its material obligations under this Deed.

4. Harvest

4.1 On completion of the harvest of the trees on the Forest Block (first rotation), in order to apportion the Carbon Liabilities between the parties, the Holder shall:

- (a) submit an emissions return under the ETS within the required time periods (currently 20 Business Days);
- (b) surrender sufficient Units as required by the ETS in respect of the loss of Carbon Stocks in the Forest Block and comply with this section 4 and section 5.2;
- (c) either surrender sufficient Units to the Proprietor to meet the Root Carbon Compensation or provide the Root Carbon Indemnity (as determined under section 4.3); and
- (d) cease to be the Participant in respect of the Forest Block.

4.2 Subject to the Holder settling all obligations under section 4.1, the Proprietor will be liable for all Carbon Liabilities in respect of the Root Carbon provided that the Holder compensates the Proprietor in one of the following ways (with the choice of option at the sole discretion of the Holder):

- (a) the Holder will re-plant the Forest Block to a standard and stocking sufficient for both a viable timber and/or carbon forest as determined by the Holder unless agreed otherwise by the parties;
- (b) provide the Proprietor with sufficient financial compensation to cover the cost of the Carbon Liabilities for decaying Root Carbon (calculated as at the Termination Date reflecting the cost of acquiring Units equal to the Root Carbon); or
- (c) pay sufficient financial compensation to the Proprietor in order for the Proprietor to re-plant the Forest Block to a minimum standard and stocking sufficient for both a viable timber and/or carbon forest (such financial compensation to reflect the cost that would have been incurred by the Holder under section 4.2(a)).

4.3 Where section 4(a) or 4(c) applies the Holder will also have the additional obligations in this section 4.3. The parties intend that the Proprietor will not be required to fund any Carbon Liabilities from the first rotation of trees on the Forest Block. Over time (one to 10 year's) the Forest Block will off-set any loss of Carbon Stocks from the Termination Date through growth in the second rotation of trees on the Forest Block. Forestry science and industry knowledge, as at the Commencement Date, suggests that following harvest and before the second rotation of trees has reached a critical growth phase the Carbon Stocks may fall to a low point before again increasing. Until this low point of Carbon Stocks has been reached there may be an annual liability on the Proprietor to surrender Units under the ETS for the loss of Carbon Stocks for the previous year which is due to further decay of the first rotation. The Holder agrees to compensate the Proprietor to meet this ongoing cost in one of two ways (with the choice of option at the sole discretion of the Holder):

- (a) Root Carbon Compensation – within 4 months of the Termination Date the Holder will transfer to the Proprietor 12.5% of the Carbon Credits collected from harvested area in the Forest Block; or

DuncanCotterill

forestry right deed 2 dec 2011 (final).doc
CRA420 / 005

18

s7(2)(a)

s7(2)(a)

- (b) Root Carbon Indemnity – the Holder will indemnify the Proprietor from the drop in Carbon Stocks to the low point of Carbon Stocks by the transfer each year of the number of Units that the Proprietor is required to surrender under the ETS in respect of the Forest Block. The following conditions will apply to this indemnity:
- (i) the Proprietor must maintain the health of the second rotation of trees on the Forest Block and follow good forest husbandry management and practice in order to prevent significantly inhibiting growth of the second rotation of trees at the Forest Block. Any failure to comply with such standards may result in slower growth of the second rotation of trees and the Holder may withhold a number of Units to reflect the resulting loss of Carbon Stocks due to the Proprietors failures in this regard;
 - (ii) the Proprietor will file its annual emissions return under the ETS in each year following the harvest where Carbon Stocks drop and provide the Holder with copies of its emissions returns and calculations of Carbon Stocks. The Holder, acting reasonably, may challenge the Proprietors calculation of loss of Carbon Stocks and make suggested changes prior to the Proprietor submitting its emissions return in respect of the Forest Block. The Proprietor shall be obliged to incorporate all reasonable changes to its emissions return as submitted by the Holder;
 - (iii) once the proprietor has submitted its annual emissions return the Holder will transfer to the Proprietor within 20 Business Days the number of Units that reflect the net loss of Carbon Stocks for which the Proprietor will be required to surrender under the ETS;
 - (iv) the Holder is not liable for the loss of Carbon Stocks resulting from damage to the second rotation of trees whether through wind-throw, disease, fire or such other catastrophic event. Such risks do not form part of the indemnity under this section 4.3(b);
 - (v) in the event of any dispute between the parties in respect of this Indemnity the matter in dispute will be referred to an Expert in accordance with section 4.5.

4.4 Where forestry science and recognised industry practice has changed by the Termination Date (as determined by either party acting reasonably), either party may require a review of the level of Root Carbon Compensation either prior to or within 30 Business Days of the Termination Date (the "Review"). The Review will determine whether 12.5% of Units collected is the appropriate level of compensation for the loss of Carbon Stocks to the low point in Carbon Stocks in the Forest Block during the initial growth of the second rotation of trees. Where a party requires the Review to take place either party may request the Review by notice to the other party and on receipt of such notice the provisions of section 4.5 shall apply to determine the Review. On determination of the Review the Expert's determination will be binding on the parties and the amended Root Carbon Compensation will then apply as from the Termination Date.

4.5 Where an expert is to be appointed under section 4.4 (the "Expert"), it shall be such person as the parties agree should complete the Review, or if they are unable to agree within ten Business Days, such person as is nominated by the President for the time being of the New Zealand Law Society or his/her nominee. The following provisions shall apply to the Expert and the Review:

- (a) Within five Business Days of the reference to the Expert the parties must each provide the Expert with a written submission and will have five further Business Days within which to make a further written submission. The Expert must then begin the Review promptly.

DuncanCotterill

forestry right dued 2 dec 2011 (final).doc
(RA420 / 005

s7(2)(a)

19

s7(2)(a)

Original
out

- (b) The Expert may, at his or her discretion, also accept oral submissions from the parties and for these purposes shall give notice to each party of the place and time when he or she will conduct the enquiry (such time not to be more than ten Business Days after the reference of the dispute to the Expert).
- (c) Notwithstanding any of the parties failing to provide the Expert with written or oral submissions within the relevant time periods specified above, the Expert must begin the Review promptly and make his or her recommendations without being required to consider or take into account the views or later submissions of such party or parties.
- (d) The Expert is to act as an expert and not as an arbitrator. The Expert shall be required to consider and take into account:
- (i) the actual and/or intended replanting, silviculture and tending regime for the second rotation as set out by the Holder;
 - (ii) the written submissions of the parties;
 - (iii) the current industry best practice and knowledge at that time in regard to carbon modelling and forest management;
 - (iv) any changes to the ETS and requirements that places on the parties;
 - (v) any matters, science or financial modelling that the Expert considers relevant to the Review;
 - (vi) this Deed in its entirety.

The Expert may also:

- (vii) rely on his or her own knowledge, skill and experience in relation to Review;
 - (viii) make his or her own enquiries without reference to the parties; and
 - (ix) if he or she considers it appropriate to do so, take advice from other persons the Expert considers to have expertise in the area the subject of the Review.
- (e) The Expert may:
- (i) arrange to meet with the parties either together or alone to discuss the Review;
 - (ii) require the parties to provide such evidence as he considers necessary to determine the Review; and
 - (iii) establish procedures and a timetable for the conduct of the Review to the extent that those matters are not already laid down in these provisions.
- (f) Except where urgent determination is required and time does not permit, the Expert must give his or her determination as soon as practicable (but in any event within 30 Business Days of his receiving all submissions under sections (a) and (b) or within any further period that the parties agree on).
- (g) The Expert must give his or her determination in writing, with reasons.
- (h) The Expert may decide how the reasonable costs, fees and other expenses of the parties in relation to the determination are to be born. But if the Expert makes no decisions as to costs, the parties are to share them equally.

DMK

- (i) The parties agree to be bound by the Expert's determination.
- (j) The parties and the Expert agree in relation to all information disclosed to them, or coming to their knowledge in the course of the determination (including communications between them):
 - (i) to keep that information confidential; and
 - (ii) not to use that information for any purpose other than settling the review.
- (k) During the Review the parties must continue to use their best endeavours to meet their respective obligations under this Deed as if no dispute had arisen.
- (l) The parties do not intend the Review procedure set out in this clause 4.5 to be a submission to arbitration, and they are not to be treated as such, except to the extent that the Arbitration Act 1996 provides otherwise.

5. Termination

- 5.1 Promptly following the Termination Date, whether or not any trees remain standing, the Holder will assume the position of Participant under the ETS by process of the transmission of interest in post-1989 forest land under the ETS.
- 5.2 It is intended that on reaching maturity all trees on the Forest Block will be harvested. However, in the event that the Holder seeks to surrender the Forestry Right prior to a full harvest of the Forest Block such that in aggregate 2% or more of the trees remain standing then, for all trees in a CAA which are older than 12 years of age, the Holder will surrender back and transfer to the Proprietor 35% of the Carbon Credits it has received in respect of such remaining standing trees.
- 5.3 On termination of this Deed, ownership in any remaining standing trees shall revert to the Proprietor and the Holder shall not be entitled to further participate in any timber or carbon revenues received in respect of the Forest Block.

Pages

Continuation of "Estate or Interest or Easement to be created"

DEFINITIONS

1. In this transfer unless the context otherwise requires:
 - 1.1 the "servient land" is the land owned by the Transferor described on page 1;
 - 1.2 the "dominant land" is the land owned by the Transferee and contained in certificate of title D4/1070; and
 - 1.3 the "right of way" is the easement right described in section 2.

RIGHT OF WAY

2. The Transferor grants to the Transferee the right for the Transferee, its tenants, agents, workmen, licensees and invitees (in common with the Transferor, its tenants and any other persons lawfully entitled so to do) at all times to pass and repass on foot or with vehicles and with or without every kind of domestic animal, machine, equipment and implement over and along that part of the servient land marked A, B and C on deposited plan 210303 for all purposes connected with the use and enjoyment of the dominant land but not for any other purpose.

GENERAL COVENANTS

3. The grant of the right of way is forever appurtenant to each and every part of the dominant land.
4. No power is implied for the Transferor to terminate the right of way for breach of any provision in this transfer by the Transferee or for any other cause, it being the parties' intention that the right of way will continue forever unless surrendered.

DEFAULT

5. If either party fails ("defaulting party") to perform or join with the other party ("other party") in performing any obligation under this transfer, the following provisions will apply:
 - 5.1 the other party may serve a written notice on the defaulting party ("default notice") specifying the default and requiring the defaulting party to perform or to join in performing the obligation and stating that, after the expiry of one month from service of the default notice, the other party may perform the obligation;
 - 5.2 if after the expiry of one month from service of the default notice, the defaulting party has not performed or joined in performing the obligation, the other party may:
 - (a) perform the obligation; and
 - (b) for that purpose enter on to the dominant land or the servient land;
 - 5.3 the defaulting party must pay to the other party the costs of the default notice and the other party's costs in performing the defaulting party's obligation within one month of receiving written notice of the other party's costs; and
 - 5.4 the other party may recover any money payable under section 5.3 from the defaulting party as a liquidated debt.

DISPUTES

6. If any dispute arises between the Transferor and Transferee concerning the rights created by this transfer, the parties will enter into negotiations in good faith to resolve their dispute. If the dispute is not resolved within one month of the date on which the parties begin their negotiations, the parties must submit to the arbitration of an independent arbitrator appointed jointly by the parties. If an arbitrator cannot be agreed on within 14 days, then the parties must submit to the arbitration of an independent arbitrator appointed by the President for the time being of the District Law Society in which the servient land is situated. Such arbitration will be determined under the Arbitration Act 1996 and its amendments or any enactment passed in substitution. The parties' execution of this transfer will be deemed a submission to arbitration.

Conservancy Solicitor

SOUTH WAIRARAPA AND CARTERTON DISTRICT COUNCILS

APPLICATION FOR RESOURCE CONSENT UNDER SECTION 88 OF RESOURCE MANAGEMENT ACT 1991

Application No: 160035 (SWDC) & 160010 (CDC)

Consent Type: Subdivision

Applicant: s7(2)(a)

Proposal: 4 Lot Rural Subdivision

Location: 357 Summerhill Road, Martinborough

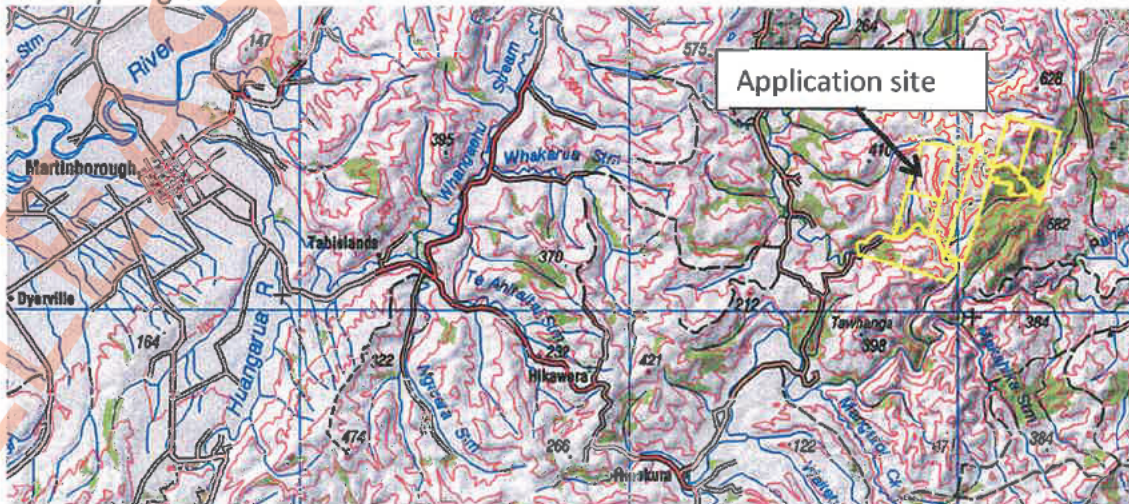

Legal Description: Part Subdivision 1 and 2 Section 286 Pahaoa District, Part Subdivision 1 and 2 Section 290 Pahaoa District, Section 286A Pahaoa District.

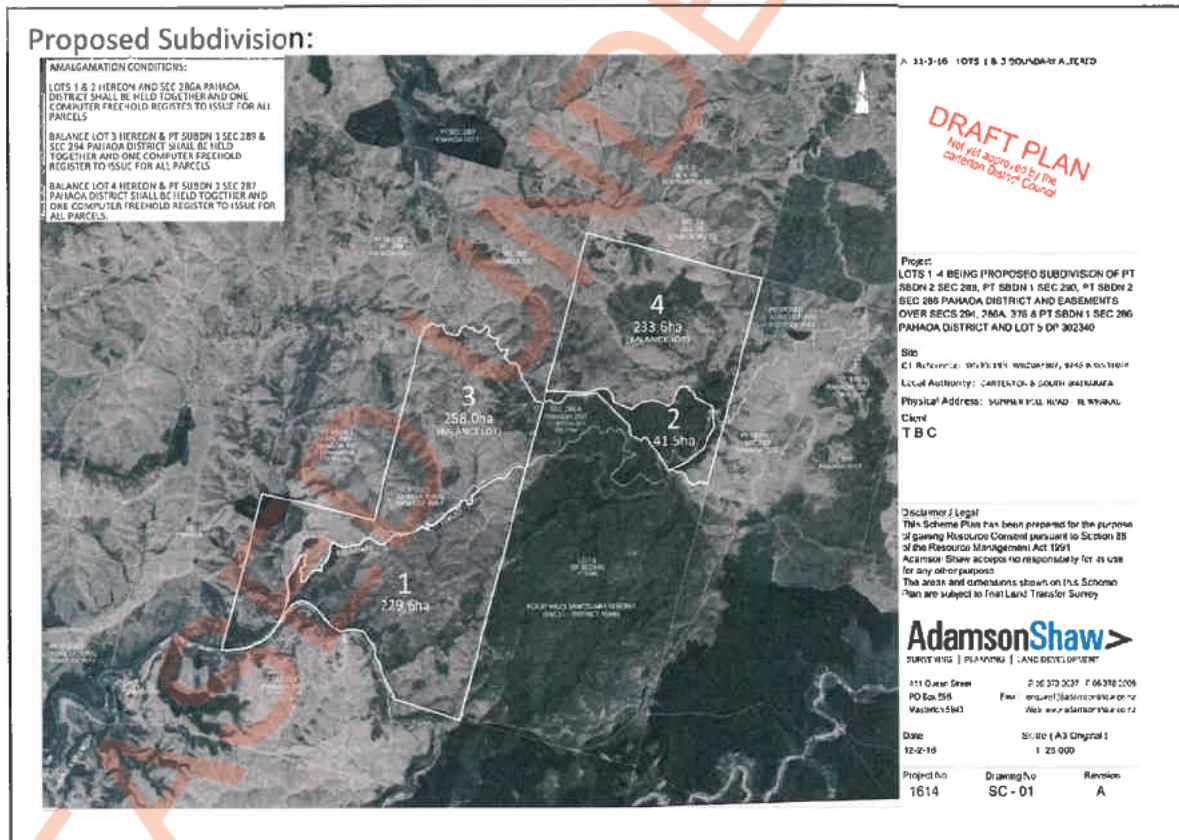

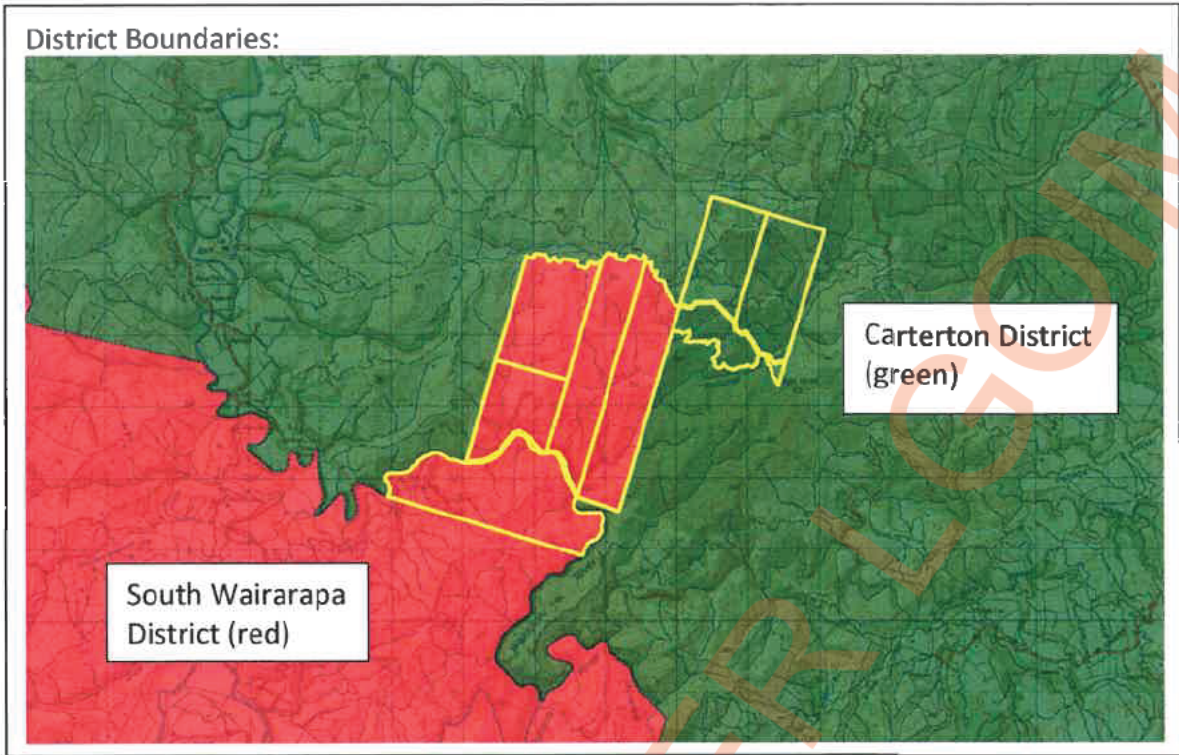

Zone: Rural (Primary Production) Zone and Rural (Conservation Management) - Wairarapa Combined District Plan 2011

Activity Status: **Wairarapa Combined District Plan**
Restricted Discretionary Activity – Rule 20.1.3(b) for a subdivision that does not meet the Controlled Activity access standards (20.1.2(c) and (d)).

The application is therefore a Restricted Discretionary Activity.

Locality Diagram:

1.0 APPLICATION

The site is a large rural property located at the end of Summer Hill Road extending in a northwest direction towards Rocky Hills Road. The site is located within the South Wairarapa and the Carterton Districts. The applicants have made an application to both the South Wairarapa and Carterton District Councils and it has been agreed that the South Wairarapa will prepare the s42A report.

The site adjoins and proposes a right of way over the Rocky Hills Department of Conservation reserve.

It is proposed to subdivide the site into four allotments. The following amalgamations are proposed.

- Lots 1 and 2 will be amalgamated with Section 286 A Pahaoa District
- Lot 3 will be amalgamated with Part Subdivision 1 Section 289 and Section 294 Pahaoa District
- Lot 4 will be amalgamated with Part Subdivision 1 Section 287 Pahaoa District

The proposal involves land within two certificates of title and, with the proposed amalgamations in place, one additional certificate of title will be created.

A right of way is proposed to run from Summer Hill Road to Rocky Hill Road, one end of the site to the other. This right of way runs through two land parcels outside of the certificates of title containing the application site, the DOC reserve (Lot 5 DP 302340) and Section 376 Pahaoa. Part of this access is within the Wainuioru River. Any parts of the access that fall outside of the application site or Wainuioru River are required to be covered by additional rights of way.

This proposed right of way is over an existing track. It is not proposed to be upgraded to a formation that would meet the District Plan's right of way standards.

2.0 S95A – 95F NOTIFICATION ANALYSIS AND DETERMINATION

2.1 Public Notification

Section 95A(2)(a) of the Resource Management Act 1991 (the Act) states a consent authority must publicly notify an application if the activity will have or is likely to have adverse effects on the environment that are more than minor, the applicant requests notification or a Rule or National Environmental Standard (NES) requires notification. However, under Section 95D(c), an adverse effect of the activity that does not relate to a matter for which a rule or national environmental standard reserves control or restricts discretion must be disregarded. Also under Section 95D(a) any effects on people within the site or adjacent to it are not to be considered for the purposes of public notification.

It was decided not to publicly notify the application for the following reasons:

The proposed allotments are all well above the minimum lot sizes in the rural zone and therefore in terms of development density, the proposal is an anticipated outcome of the District Plan.

The effects of the proposed right of way non-compliance are not considered to extend beyond the site and the sites which the right of way is over.

Therefore the effects on any parties beyond adjacent land owners are considered to be no more than minor and public notification is not required under section 95D.

2.2 Limited Notification

If public notification is not required, the Council must then determine whether there are any affected persons that would warrant limited notification under Section 95B(1).

Under Section 95(E) of the Act, Council must consider a person to be affected if the activity's adverse effects on that person are minor or more than minor unless an activity with that effect is permitted by a Rule or NES, the effect is not within the matters of control or discretion (as applicable to Controlled and Restricted Discretionary Activities) or that person has given written approval to the proposed activity.

The proposed subdivision meets all but the access requirements of the District Plan. The formation of the rights of way access is proposed to remain as a farm tracks.

A right of way is proposed over existing tracks within the adjoining farm parcel; Section 376 Pahaoa District, CT-WN31D/4 and the Rocky Hills Forest Sanctuary; Lot 5 DP 302340, CT-9245. The proposed right of way formation would affect only the owners of lots that it serves or runs through. The consent of the owners of the land that the right of way runs through will be required prior to registering the right of way. These parties are therefore considered to be part of the proposal.

The proposed access formation is considered to be "fit for purpose" and typical of extensive primary production operations.

The potential effects on adjacent properties are considered to be less than minor.

2.3 Special Circumstances

Section 95A (4) of the Act, requires consideration of whether there are any special circumstances which would warrant the notification of this proposal, or serving of notice. No special circumstances have been identified that would warrant the notification of the proposal.

3.0 S104 ASSESSMENT

The relevant statutory provisions that were considered are the Resource Management Act 1991, the Regional Policy Statement and the Wairarapa Combined District Plan.

3.1 Wellington Regional Policy Statement (RPS)

Objective 22 of the RPS seeks a well-designed and sustainable regional form. Policy 56 seeks to manage development in rural areas by considering whether:

- (a) the proposal will result in a loss of productive capability of the rural area, including cumulative impacts that would reduce the potential for food and other primary production and reverse sensitivity issues for existing production activities, including extraction and distribution of aggregate minerals;
- (b) the proposal will reduce aesthetic and open space values in rural areas between and around settlements;

The subdivision proposes to rearrange existing boundaries within a large rural land area. This will facilitate separate ownership of specific areas of the applicants land.

All of the proposed lots would meet the minimum standard provided for in the District Plan. Thus the open space values of the rural area is retained.

3.2 Wairarapa Combined District Plan

The Wairarapa Combined District Plan became operative on 25 May 2011.

The relevant assessment criteria are contained in Section 22 of the District Plan and the relevant objectives and policies of the District Plan are:

- Objectives 4.3.1, 4.3.4
- Policies 4.3.2(d), 4.3.2(e), 4.3.5(a)

3.3 District Plan Analysis

At 4.4 the District Plan lists anticipated environmental outcomes for the rural zone. The following are considered relevant;

4.4(a) Protection of primary production as a principal land use and economic driver in the Wairarapa.

4.4(b) The efficient use of Rural Zone resources through a diversity of land use and economic activities.

4.4(c) Diverse activities in the Rural Zone that are compatible with the rural environment in scale, amenity and character.

At 18.4 the District Plan lists anticipated environmental outcomes for subdivision, land development and urban growth. The following is considered relevant;

18.4(a) Allotments are of a size form and pattern for land uses that are compatible with the values, character and qualities of the immediate environment.

Overall, this large lot rural subdivision is considered to be an anticipated outcome in the rural zone and to meet the relevant objectives and policies of the District Plan;

- the amenity values sought in Objective 4.3.1 and Policies 4.3.2(d) and (e) will be maintained.
- the productive potential of the rural zone will be maintained in line with Objective 4.3.4 and Policy 4.3.5.

In addition to Rural (Primary Production), parts of the site are zoned Rural (Conservation Management). This Rural (Conservation Management) zone aligns with areas of indigenous forest adjoining the Rocky Hills Forest Reserve. This area is Department of Conservation Recommended Area for Protection (RAP) 34 – Rocky Hills Extension but not a Significant Natural Area.

Rural Policy 4.3.2(b) seeks to “Identify areas within the Rural Zone where the predominant land use is conservation management, and which are primarily managed by public agencies – Rural (Conservation) Zone”.

There are two standards in the District Plan relating to the Rural (Conservation) Zone;

- Rural Zone permitted standard 4.5.2(l) – Conservation Management
(i) In the Rural (Conservation) Zone, any activity, undertaken for the use and management of land for conservation and recreation purposes, including the construction of associated structures and earthworks, is in accordance with section 4(3) of the Resource Management Act 1991.
- Subdivision controlled standard 20.1.2(b) Table
(iii) Rural (Conservation Management) - Each lot shall comply with all District-wide Rules.

Based on reference to section 4(3) of the RMA (Act to Bind the Crown), the District Plan does not anticipate land zoned Rural (Conservation Management) to be in private ownership.

There are no recorded archaeological features within the site. The South Wairarapa Maori Standing Committee has viewed the proposal and raised no objections.

The proposed subdivision meets the minimum area and dimension requirements of the District Plan. The proposed access, being farm tracks, does not meet the District Plan’s access standards (rule 21.1.2(c)).

The application should therefore be considered as a restricted discretionary activity under rule 20.1.3(b).

At 20.1.3(b) the District Plan restricts discretion to the following matters;

- (i) Development and site characteristics;*
- (ii) Design, location and construction of vehicle crossings, entranceways, access and roads;*
- (iii) Availability of alternative private or public access, parking or loading areas;*
- (iv) Design, layout, number and standard of parking and loading areas;*
- (v) Financial contributions.*

The subdivision will create large farm lots and will provide rights of way over established farm tracks. The proposed access, parking and loading areas are considered fit for the primary production purpose and acceptable in this circumstance. The site can cater for all parking and loading requirements required for primary production activities within the site. No alternative private or public access, parking or loading areas are required.

Council’s Roading Manager has viewed the proposal and noted that the right of way easement should reflect its “agricultural” use. A condition of consent requiring this intended agricultural use to be stated in the right of way easement documents will ensure that the access standard is clear to users.

Therefore, the matters which the District Plan restricts discretion to in 20.1.3(b) are considered to be addressed.

The District Plan contains provisions around indigenous vegetation (permitted standards 21.1.6). Future owners of the site would need to comply with these standards or seek resource consent.

The Wainuioru River, which adjoins Lot 1 is not listed as a significant waterbody in Appendix 1.9 of the District Plan. Therefore an esplanade reserve is not a requirement under the District Plan.

One Section 23 (Financial Contributions) sets out the infrastructure, reserve fund and roading contributions that can be imposed. These contributions are to offset the additional pressure on the environment and community resources.

Once the allotments are amalgamated as proposed, this subdivision will create one additional certificate of title. Therefore one roading and reserve fund contribution will be levied as a condition of consent.

It is considered that the proposal would maintain the integrity of the objectives and policies of the District Plan for the reasons given above.

There are no other matters considered relevant to the assessment of this proposal.

4.0 CONCLUSION

It is considered the proposal will have no more than minor adverse effects on the environment, no parties are considered to be adversely affected, and that it is consistent with the relevant objectives, policies and assessment criteria of the Wairarapa Combined District Plan.

5.0 DECISION

That the South Wairarapa District Council and Carterton District Council hereby grant subdivision consent, to application no. 160035 pursuant to Section 104C of the Resource Management Act 1991, subject to the following conditions:

CONDITIONS

That;

Standard Conditions

1. Except as amended by the conditions below, the subdivision shall proceed in accord with the Scheme Plan prepared by AdamsonShaw Ltd titled "Lots 1-4 being proposed subdivision of Pt Sbdn 2 Sec 289, Pt Sbdn 1 Sec 290, Pt Sbdn 2 Sec 286 Pahaoa District and easements over Secs 294, 286A & Pt Sec 286 Pahaoa District and Lot 5 DP 302340", plan ref 1614 SC-01 Rev A (dated 12-2-16) and information submitted as part of the application.

2. The consent holder shall pay all costs incurred by the Council in respect of the approval and/or Certification of the Survey Plan (S223) and the completion of conditions (S221 and S224(c)) for the subdivision and in the perusal, preparation, execution and registration of any related document(s).

Amalgamation Condition/Covenant Against Transfer of Allotments

3. Pursuant to Section 220 of the Resource Management Act and the requirements of the District Land Registrar, the following amalgamation condition shall be shown on the survey plan prior to s223 approval:

That Lots 1 and 2 hereon and Sec 286A Pahaoa District shall be held together and one computer freehold register to issue for all parcels. See CSN 1378690.

Lot 3 hereon and Pt Subdn 1 Sec 289 and Sec 294 Pahaoa District shall be held together and one computer freehold register to issue for all parcels. See CSN 1378690.

Lot 4 hereon and Pt Subdn 1 Sec 287 Pahaoa District shall be held together and one computer freehold register to issue for all parcels. See CSN 1378690.

Easements

4. Right-of-way easements shown on the Scheme Plan providing access to all lots shall be shown in a Memorandum of Easements endorsed on the survey plan. Pursuant to Section 297(2)(a) of the Property Law Act 2007, the easement instrument shall state that the right of way is intended for agricultural purposes and not for residential vehicles, or words to that effect. A plan showing the position of the existing access formation between Summer Hill Road and Lot 3 in relation to boundary positions shall be shown on a plan submitted at time of s223 application.
5. The Section 223 approval shall be subject to the granting or reserving of the easement(s) set out in the Memorandum hereon.
6. The consent holder shall register appropriate easements over all existing and proposed public and private services and/or service lines at their own cost and these shall be **shown on the survey plan** prior to s223 approval.
7. Any easements in respect of which the land is the dominant tenement that would become redundant as a result of the subdivision, may be extinguished, or be extinguished in relation to any specified allotment or allotments, with a table of easements to be extinguished being included with the survey plan.

Financial Contributions

8. The following contributions are paid:

Reserve fund contribution of 2.0% plus GST of the market land value of the land within Lots 1, 2 and Section 286 A Pahaoa District assessed by independent valuation.

Roading contribution of 3.0% plus GST of the market value of the land within Lots 1, 2 and Section 286 A Pahaoa District assessed by independent valuation.

NB: The consent holder must provide the valuation at no cost to Council. The valuation shall state whether it is GST exclusive or inclusive. The valuation shall be determined based on the approved s223 survey plan and the valuation must not be any older than 3 months at time of application for s224 Certificate.

NB: The maximum amount of total combined contribution for reserves and roading in the Rural Zone shall be \$7,500 (plus GST) per allotment created by a subdivision.

The consent holder may advise Council that they wish to have the contributions assessed at the maximum amount and this would avoid the need to obtain a valuation.

Maori Heritage

9. If Taonga (treasure or prized possession, including a natural resource, having tangible or intangible value) is discovered on site, work shall cease immediately and the consent holder shall notify Heritage New Zealand, South Wairarapa District Council, Rangitaane O Wairarapa Iwi Authority and Ngati Kahungunu ki Wairarapa.

Work on the site shall not recommence until an inspection is carried out by Iwi representatives, Council and Heritage New Zealand, and all appropriate actions to remove the Taonga and record the site are completed, and written approval to recommence work is given by the Council.

10. If during construction activities, any Koiwi (skeletal remains) or similar material is discovered on site, work shall cease immediately and the consent holder shall notify the New Zealand Police, Heritage New Zealand, South Wairarapa District Council, Rangitaane O Wairarapa Iwi Authority and Ngati Kahungunu ki Wairarapa.

Work on site shall not recommence until an inspection is carried out by Iwi representatives, Council, Heritage New Zealand and the New Zealand Police and all appropriate actions to remove the Koiwi and appropriate ceremonies have been conducted by Iwi are completed and written approval to recommence work is given by the Council.

Notes:

1. This resource consent will lapse if not given effect to in accordance with Sections 125, 223 and 224 of the Resource Management Act 1991.

2. All conditions must be complied with before a s224c Resource Management Act Certificate will be issued. The application for s224c Certification must list each condition of consent and advise when the condition was complied with. Where relevant, the name of the person(s) who completed the physical works and their certification of those works shall be provided.
3. Any work on buildings and private drainage (including on site wastewater systems and remedial work) may require a building consent.
4. Dwellings should have at least 30,000 litres of potable water storage or access to an equivalent potable water source (e.g. bore water). The New Zealand Fire Service recommends that water storage and delivery systems be installed in accordance with the Code of Practice for Fire Fighting Water Supplies, SNZ PAS 4509:2003. The Fire Service advises that often the best method to achieve compliance with SNZ PAS 4509:2003 is through the installation of a home sprinkler system in accordance with Fire Systems for Houses NZS 4517:2003, in each new dwelling.

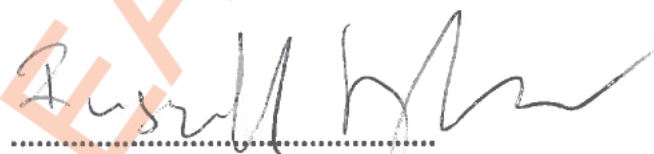

This information should be passed on to future owners of the individual lots within the subdivision. The NZFS have qualified staff, experienced in this area, and would be happy to assist and/or advise.

5. **The District Plan has rules relating to “indigenous vegetation and habitats”. The owners of the lots in this subdivision should make themselves aware of these provisions.**

The Council grants the Consent for the following reasons:

- i) The effects of the proposal, with the conditions imposed, are considered to be no more than minor.
- ii) The proposal is in accordance with the objectives and policies of the Wairarapa Combined District Plan, and with the purpose of the Act.
- iii) No parties are considered to be adversely affected by the proposal.
