Response to your request for official information

Thank you for your request under the Official Information Act 1982 (the Act) to Manatū Hauora (the Ministry of Health) on 31 October 2022 for information. You requested:

“All communications between any member of the Disinformation Assessment and Response Team (DART) and CERT NZ during the period of 01 August 2022 and 30 September 2022”

Manatū Hauora has conducted a search and identified 10 email chains within scope of your request. The emails and relevant attachments are itemised in Appendix 1 of this letter and copies of the documents are enclosed.

I provided you with contextual information about the DART team in my response to OIA reference: H2022015932.

I trust this information fulfils your request. Under section 28(3) of the Act, you have the right to ask the Ombudsman to review any decisions made under this request. The Ombudsman may be contacted by email at: info@ombudsman.parliament.nz or by calling 0800 802 602.

Please note that this response, with your personal details removed, may be published on the Manatū Hauora website at: www.health.govt.nz/about-ministry/information-releases/responses-official-information-act-requests.

Nāku noa, nā

Sarah Turner
Deputy Director General
Government and Executive Services | Te Pou Whakatere Kāwanatanga

Appendix 1: List of documents for release

#	Date	Document details	Decision on release
1	2 August 2022	Email: DART data	Some information withheld under section 9(2)(a) of the Act to protect the privacy of natural persons.
2	16 August 2022	Email: CERT Reporting	Released in full.
2A		Email attachment: COVID Disinformation Spreadsheet Refer to document 10A for final	
2B		Email attachment: email sent to Oromahoe School	
3	16 August 2022	Email: DART data	Some information withheld under section 9(2)(a) of the Act to protect the privacy of natural persons.
4	23 August 2022	Email: DART data	
5	23 August 2022	Email: CERT Reporting	Released in full.
5A		Email attachment: COVID Disinformation Spreadsheet Refer to document 10A for final	
6	1 September 2022	Email: CERT NZ Reporting	Refer to document 10A for final
6A		Email attachment: COVID Disinformation Spreadsheet	
7	6 September 2022	Email: Update from DART	Refer to document 10A for final
8		Email: CERT Reporting

From: **Daniel Suter** <dan@nuremberg.nz>
 Date: Wed, Aug 3, 2022 at 8:48 PM
 Subject: Masks to all schools update August 2022
 To: Tracey Smith <offixx@xxxxxxxx.xxxxxx.xx>

Dear Tracey Smith of Oromahoe School,

I ask that you add this letter to the inwards correspondence and **table it at the next board meeting** read and considered.

It's been a few months since our email in February proving to Chris Hipkins why masks harm children.

A lot has happened since then. So we feel the need to share with you one all-encompassing, peer-reviewed scientific study of 500 million citizens across Europe: [1]

<https://www.cureus.com/articles/93826-correlation-between-mask-compliance-and-covid-19-outcomes-in-europe>

Please be aware of what the rest of the world is doing when making decisions about masking. The data speaks for itself. The conclusion of the study: "Masks only increase the chance of catching Covid.". The Swiss Institute has found all studies recommending mask wearing to be flawed:

https://ndlegis.gov/prod/assembly/67-2021/testimony/HPOLSUB-1323-20210204-5273-F-SEELY_BRADLEY.pdf

NZDSOS have also concluded that mask mandates fly in the face of science. [2][3] As predicted our email to Christopher Hipkins was never answered [4]

Under New Zealand law all children and adults are exempt from wearing a mask. From our perspective all New Zealanders have a "**condition**". The NZS4303 [5] air quality standards says "**no more than 1000 ppm CO2 that will be acceptable to human occupants and intended to avoid adverse health effects**". We conclude given that masking can produce an environment of 24,000ppm of CO2 after just 30 minutes, it is unsuitable for anyone when we consider their health.

Any effort to coerce or intimidate anyone into wearing a mask contravenes Section 189A of the 1961 Crimes Act under the term "strangulation and suffocation". [6]

As a principal and BoT member, you are bound by the updated code of conduct as a Crown entity [7] to reflect in your school governance policies all laws, legislation, acts and regulations.

The MoE keeps saying they follow MoH guidelines. In He Pitopito Korero - Education Bulletin 21 July 2022 Update [8], they assert:

"We understand that implementing mask policies can be a challenge."

Have you stopped to think why this may be? Not one person we've ever talked to about it likes to be in a mask. To force or coerce someone to wear a mask crosses significant personal boundaries. Not only that, they cause harm and discomfort.

You are being asked to do this to "*protect your staff and students against the transmission of COVID-19.*". Yet the study of 500 million Europeans proves beyond doubt that masks don't prevent transmission of COVID-19.

"We are also providing additional CO2 monitors alongside ongoing support through Term 3."

If you want to teach the children some real science, perhaps you should get a CO2 monitor so you can measure how much CO2 is in their masks. [9]. Then ask them to research what that level will do to them after a prolonged time? [10] When we consider the governments statements on this.

<https://covid19.govt.nz/prepare-and-stay-safe/keep-up-healthy-habits/face-masks/who-does-not-need-to-wear-a-face-mask/>

This website repeats the statement "The COVID-19 virus is transmissible by droplets, so face masks are a way we can protect ourselves and each other." However, according to leading American industrial hygienist Stephen Petty, this is incorrect. Petty has given testimony in over 400 cases. Most recently, his testimony helped overturn mask mandates in Kentucky.

<https://www.youtube.com/watch?v=J3dnkbKoj4A>. [11]

According to Petty, droplets drop very quickly to the floor. Usually within minutes. However aerosols can remain and transfer in the air for up to 50 days. So they're 99.9% of the problem. So what's the solution? What's the standard industrial practice to filter out the aerosols? Ventilation. In other words, to apply engineering-based controls for air quality.

When you consider this evidence, the idea that you need to apply for an exemption to breathe freely is repugnant. It's a violation of your human right to breathe air — unimpeded.

The time for being ignorant or obtuse about masks is over. Masks are dangerous. The manufacturer explicitly states N95 masks should not be worn by children [12], **just how many signs can we ignore?** According to Petty, The Curriculum Associates found Reading and Math scores dropped 12-15%, depending on the grade level. (Minorities' scores plunged further.) **Furthermore Brown University found IQ dropped 22 points in babies growing up during the pandemic.**

<https://www.medrxiv.org/content/10.1101/2021.08.10.21261846v1.full.pdf> [13][14]

When you understand the facts around masking, it begs the question.

Why is the MoH continuing to demand this of schools, parents and children?

Why the continued and relentless propaganda on mask wearing seen on entrances to all public buildings?

Being forced to wear a mask is one of the best ways to teach “learned helplessness”.

Generally, learned helplessness is used to describe women who are from abusive relationships. No matter what they do, they can’t see a way out. This is one of the worst things you can do to a person. It’s a key driver of depression and suicide.

A key government scientist Dr Baker can only come up with, “*Countries such as Korea and Japan where mask wearing is traditionally very high have lower rates of Covid*”.

What he misses is that Japan was the source of the Kowa Study which shows the efficacy of Ivermectin in fighting viral infections as well as the Japanese biodiversity study which shows 13% of the lipids from Covid injections in females end up in the ovaries. [15]

Knowing now that these same injections are **causing a 22% decline in motile sperm counts in males** really just backs up our email to Ashley Bloomfield stating that vaccinating 5-11 year olds is murder. [16] Many of you will still be confused by what’s happening, as are most Kiwis [17]

<https://nz.nuremberg.nz/articles/140055/Complete-lack-of-support-for-Government.-91-disagree>.

Perhaps the best explanation for this "COVID" madness was explained by Dr Matthias Desmet on Day 7 of the Grand Jury. [18] Through the lens of Fear Induced Mass Formation Psychosis it becomes understandable how we can do this to our children. There’s no question about it: **this has to stop.**

NZ school attendance numbers are at record lows. There’s no hope of improving the situation while mask mandates are being enforced. But why?, you ask. Simply put, the Ministry want children vaccinated and they can’t do it without a lot of propaganda and coercion. Masks are a one of the keys to this. Just google or better still duckduckgo “masks and slavery”. You’ll quickly find articles like:

<https://brownstone.org/articles/the-mask-of-your-enslavement-the-image-history-and-meaning-of-escrava-anastacia/>

Lets face it, how many of us would have taken an experimental EUA-only injection, with no liability for the manufacturer, without knowing the full list of ingredients? If we knew then what we know now how many would have got the boosters?

The headlines are out there and I don’t see them being disproved. ***"SHOCKING: UK Government admits COVID Vaccinated Children are 4423% more likely to die of any cause and 13,633% more likely to die of COVID-19 than Unvaccinated Children."*** [19]

If you still think mRNA experimental gene therapy is a good idea for children, you are in the height of ignorance.

A recent email from Guy Hatchard pointed out the following: [20]

"A direct user survey of a cross-section of America done by a professional polling firm (with a 4% nominal margin of error) shows a 3.7% rate of myocarditis among those Americans who took the vaccine who responded to the survey. This number is consistent with earlier runs of the survey with different respondents. It is 500 times higher than the CDC numbers. A paper published in Nature shows rates of myocarditis post vaccine that can be up to 140 times higher than the prior background rate. That is not a "slightly elevated risk.""

Australian health officials are baffled as to why there's been a 30% increase in ambulance call-out Insurance companies in the US are claiming a 40% increase in deaths in the 18-65 working class. [21] They're also deleting Twitter posts where they have claimed the vaccines are "safe and effective" [22].

We provide this information to help you fulfill your obligation to:

Do your due diligence
Provide duty of care, and
Fulfill the BoT's legal responsibility.

If you are looking for more information or content, check out our email to all Judges [23] that we pray brings some common sense to the judicial System. [24]

Yours faithfully,

Daniel Suter.

Subject: Update from DART

Good Morning John and Sam

Hope you guys are enjoying the winter blast, not!

Just emailing to update you on a few things from the DART side of the line.

Firstly, after a long period of deliberation the Ministry has decided not to take over the collection of public reporting of disinformation from CERT.

I understand that this is opposite to what I had stated at the start of the year and due to the extremely long period between then and now and your extreme patience in this matter I feel you are owed a full explanation for what happened and why this took so long to get resolved.

In essence the reason for the change breaks down to two key factors, which are:

- The transfer of DART from the National Immunisation programme (NIP) to the Office of the Director General (ODG) which was six months of back and forth, and
- The decision by the ODG to refocus DART from acting as a clearinghouse for all of government to only being health focused, which also took several months.

Both of these decisions were rather fraught and took a lot longer than I had hoped and due to that I am offering a sincere apology from DART for the delays and essentially messing you and CERT around for 10 months. I can assure you this is not the outcome I wanted and certainly not the timeframe I had hoped but in the end the decision went all the way to the top and has seen even DART's fate remain uncertain as there is still no full signing of the memo regarding DART and it has been repeatedly chopped and changed so our function, staff and budget is only till the end of the year.

The only thing that is known is that DART will remain with MOH till the end of the year but after that there is no certainty and that is how things have played out despite my best efforts to make it work.

Therefore, as noted please accept my apologies for this shambles of a situation.

I am hopeful that CERT will be able to continue passing on any info of public reporting as it's important for DART work but I am aware that you were as keen to discharge the function as we were to take it on.

If you want to discuss this further I am more than happy.

Secondly, and somewhat sadly and ironically, you are likely to see an increase in reporting of disinformation as Voices for Freedom (VFF) have another public disinformation round of flyers going out so the public are likely to be getting more exposure than normal (and hence reporting it more).

It's likely to be physical reports but you may get some digital as well.

Again my apologies for the endless delays on the first matter.

Sincerely

Daniel

Are we being Mask-winked?

After 4+ jabs, mandates, lockdowns, isolating, and **relentless mask-wearing** we're *STILL* catching it and passing it on.

Is the joke on us?

Are we that gullible or do Kiwis just love faceless oxygen deprivation?

Be courageous! Take off your mask and claim your mask exempt status **NOW!**

Find out the truth about masks, your rights, and how our mask resources can help you at: www.masksmatter.co.nz 🤔

Typical **mask wearing does not reduce SARS-CoV-2 infection** rates (COVID-19).

Evidence shows **masking children is harmful**. (See our video 'Masking Children: All Harm, No Benefit')

KN95 masks showed 46.3% filtration efficacy (*when glued on*) and **only 3.4% efficacy with a gap** in the seal!

Up to **98% of viral particles may pass through cloth masks!**

Masks have been **shown to cause hypoxia** (deprivation of adequate oxygen), bacterial/fungal infection, and other harms.

Disposable face masks can take hundreds of years to break down and threaten to **harm wildlife, litter beaches, and pollute the food chain.**

An estimated **1.5 BILLION** face masks polluted the oceans last year!

Mask exempt status is self-regulated and available to anyone who has a condition (mental or physical) that makes wearing a mask unsuitable.

DID YOU KNOW?

DO YOU QUALIFY FOR MASK EXEMPT STATUS?
www.voicesforfreedom.co.nz/masks-matter

THE LAW SAYS WHAT?

COVID-19 Public Health Response (Protection Framework) Order 2021 (SL 2021/386)

104 Other exemptions

- (l) Nothing in this order applies-
- (q) to Parliament and parliamentary staff in relation to parliamentary business;
- (r) to officers of Parliament in relation to-
 - (i) parliamentary business; or
 - (ii) undertaking their statutory functions:

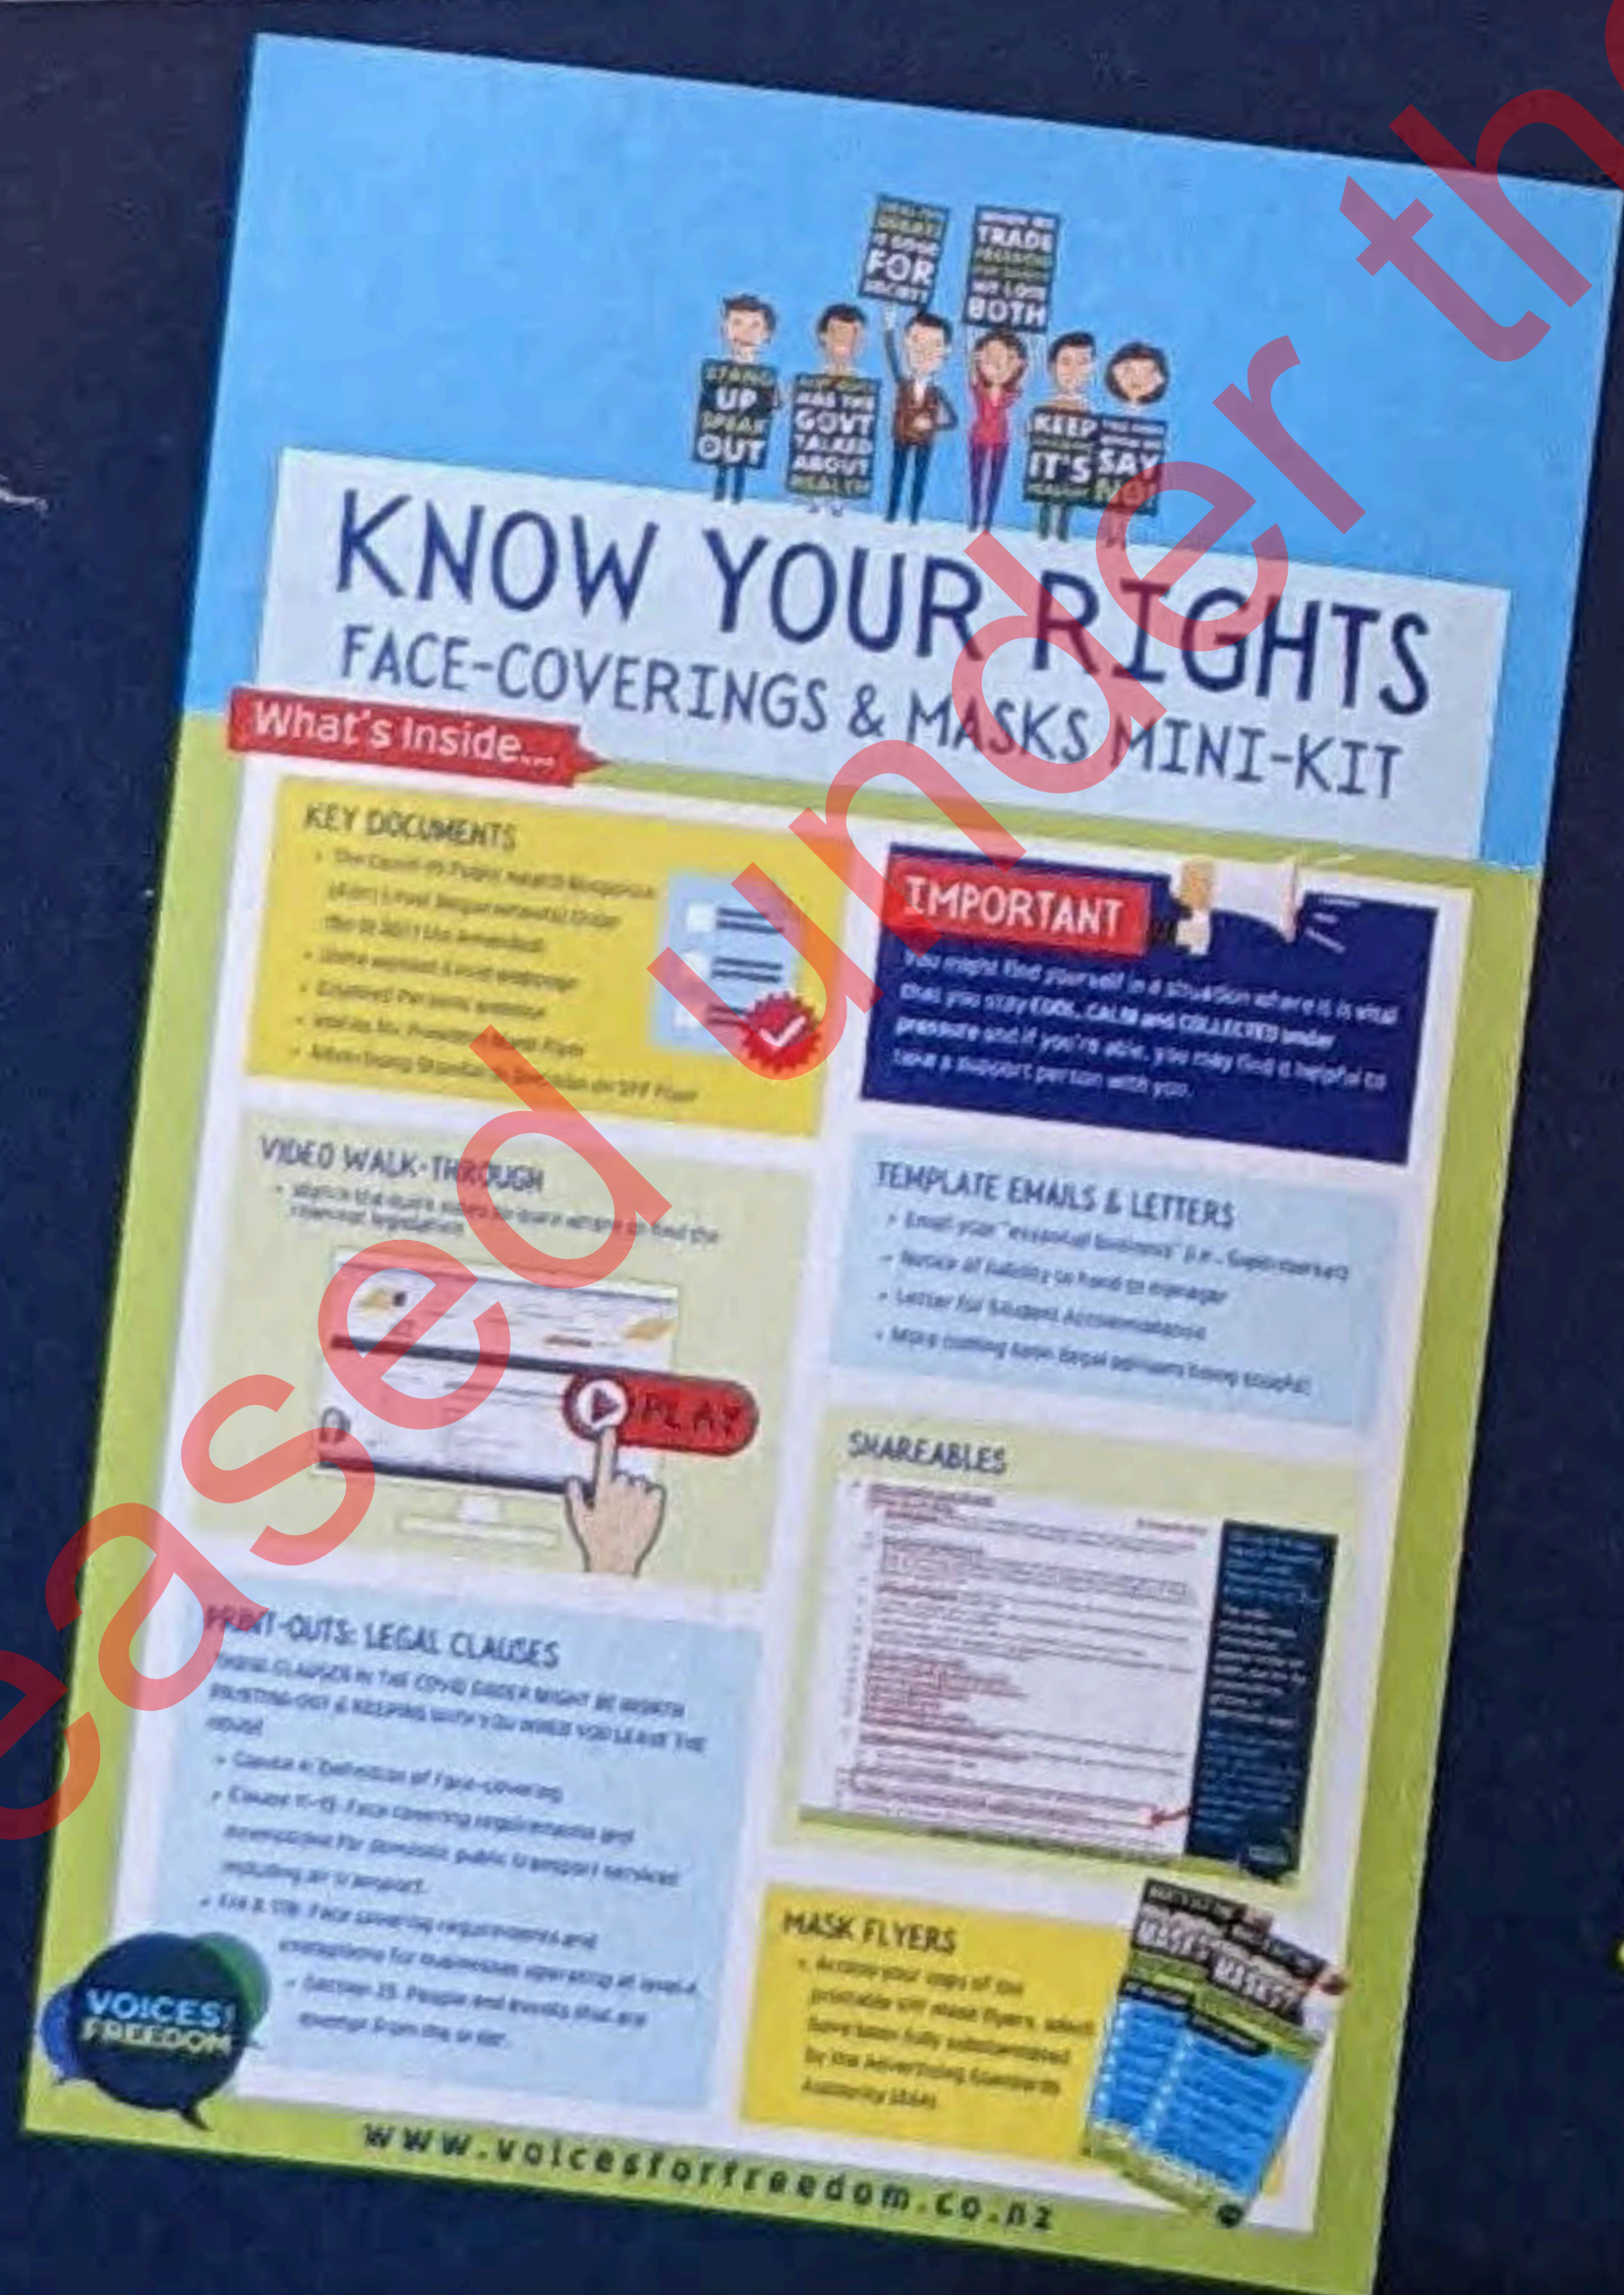

11 Meaning of face covering rule and medical-grade face covering rule

- (3) A person is not required to wear a face covering or medical-grade face covering-
 - (a) if the person-
 - (i) is under the age of 12 years; or
 - (ii) has a physical or mental illness or condition or disability that makes wearing a face covering unsuitable; or
- (4) To avoid doubt, a person does not need an exemption pass to rely on subclause (3)(a)(ii).

The Ministry of Health examples of conditions qualifying for exempt status

Please select which of the following apply to you:

- I have asthma, and this makes wearing a face covering difficult
- I have a skin irritation, eczema, or sensitive skin and this makes wearing a face covering difficult
- I wear hearing aids, and these make wearing a face covering difficult
- I get migraines, and these make wearing a face covering difficult
- I have glasses, dry eyes or contact lenses and these make wearing a face covering difficult
- I get hay fever, and this makes wearing a face covering difficult
- I have difficulty breathing, and this makes wearing a face covering difficult
- I get dizziness, headaches, nausea or tiredness, and these make wearing a face covering difficult
- Wearing a face covering gives me a runny nose
- My child cannot wear a face covering at school
