Information Request – Fleet fire appliance cascade 2023

I refer to your official information request dated 29 January 2023. Your request for a list of appliances nearing the end-of-life service was extended on 27 February to allow time for us to consult with you to clarify your request. We note you have also made a new request for trial locations for Type 3 appliances. We will respond to that separately in due course.

The initial request was to provide a list of appliances nearing the end-of-life service. As we advised this is not a term, however we do use the term 'target asset life'. You confirmed on 27 February that we could proceed with the request using this term and that you were requesting that the target asset life dates should include when an appliance is expected to be replaced.

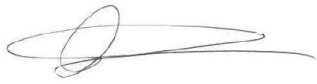

In accordance with the provisions of the Official Information Act I *enclose* a list of the appliances that are within one year of reaching or are over their target asset life.

Other than those identified on the previously released cascade plans and JD8804, NH5290 and OB8603, decisions have not been made on when these particular appliances will be replaced and/or the date when the appliance will be replaced is not current known. Therefore, that aspect of your request is formally refused for the remaining appliances under 18(e) of the OIA because the information does not exist. JD8804 is expected to be replaced in the second quarter of 2023, and NH5920 and OB8603 have already been replaced i.e. they are no longer in operational service but are yet to be disposed.

You have the right to seek an investigation and review by the Ombudsman of this decision. Information about how to make a complaint is available at www.ombudsman.parliament.nz or freephone 0800 802 602.

Note also that this response (with your personal details removed) may be published on the Fire and Emergency website.

Nāku noa nā

Julia McCook-Weir
Manager, Information Requests
