Application Name	Description	Targetted for replacement
Aconex	Aconex is an online (Internet web site) document management, web collaboration and project management software for construction, engineering and facility management. It is being used by the City Housing project management team for the housing upgrade programme of work and is also used by one staff member in Building Consent and Compliance to help Christchurch City Council to process some of their consent backlog. Used by Building Resilience for managing information on the Seismic Upgrade project for the town hall.	Y
Active Network - Recreational Bookings	This is an online recreation facility booking system. It is currently limited to Learn to Swim and Aquatic courses bookings only.	Y
ActiveNetwork - CLASS	CLASS is an application managing Recreational Facilities, including Pools, Recreation Centres and Sports grounds, Memberships, Courses and Enterprise front of house cashiering functions.	Y
ActiveNetwork - Payment Manager	Payment Manager is an application provided by Active Network. It is a module of the ActiveNetwork CLASS system. It is used for secure point of sale and cash receipting. The main users of Payment Manager are the Service Centre, Parks and Recreation.	Y
BO (Housing)	Reporting	Y
BOXI (BPR)		Y
Business Objects BOXI	BOXI is a single reporting platform which can be accessed by all members of a business unit, or across the Council if required. Business Objects InfoView collects and presents business intelligence information and provides: 1) Complete viewing and interaction for query & analysis, reporting, and performance management 2) Integrated collaboration with threaded discussions, intuitive navigation, and support for 3rd party documents 3) Advanced scheduling and distribution capabilities making it easier to share information with others 4) On Demand services that enable users to easily access a wide variety of shared information.	Y
Cemeteries Search	Cemeteries Search is an online service that provides access to burial and cremation records for Bolton Street, Karori and Makara cemeteries. There are Web based search tools that retrieve data from the CMS database.	Y
Cemetery Management System	Cemetery Management system is an MS Access database application written and supported by an external consultant. The database has been converted to a SQL server to provide improved back up functionality.	Y
Closed Landfill	Closed Landfill System is used to manipulate and maintain the data which are related to each physical landfill area in Wellington. Council statutory obligations for providing all possible information relating to the landfills can be met. This is to be achieved by allowing a restricted subset of documents, reports and data held by Closed Landfills to be viewed by Council business units. This application will provide a tool for business units to more easily access closed landfill information, so to integrate its use into their operational procedures.	Y
Community Venues Search	Community Venues Search is an online web application that provides a user-maintained listing of community-based venues.	Y
Confirm - Pitney Bowes Asset Management	Confirm is an asset management system that provides tracking of the Council's assets (lands and facilities) from their creation in the system, through to monitoring contracted work on them and managing payment for that work. Most Maintenace in Confirm - Assets is "reactive". CEM is major system for active maintenance of assets. Confirm is used to record customer enquiries.	Y
Confirm - RAMM	ConfirmRAMM is a Council built batch component, it synchronizes the Confirm Enquiries data with RAMM Jobs.	Y

Confirm Mobile	Asset Management in the field	Y
Confirm-Event Manager Interface	System that City Care uses to manage facilities maintenance jobs. EM integrated with Confirm via Confirm-Em interface. WCC does not support this EM.	Y
CPS (Core Property System)	The Core Property System (CPS) is a centralised repository of all core property data within Wellington City. The CPS is an application developed by the Council to maintain and manage property data that is considered core to the business of Council. It records, relationships between properties and their changes over time. The CPS Maintain Property process enables the user to: 1) Add and Update all types of properties - namely Survey, Valuation, Title and Occupied 2) Maintain and query on addresses 3) Assign addresses to properties 4) Maintain and verify property associations - namely Ancestor-Descendant, Cross Property (type) and Parent-Part (valuation properties).	Y
CRS_PARCEL [2]	This is the data forwarded to WCC from LINZ (via CoreLogic) which is the basis of the GIS survey parcel, i.e. a surveyed boundary line. As I understand there is information is stored as attributes against the Arcview shape file. These attributes are synchronised against the survey parcels in the core property system. Council has already created these properties as it has known about them since the subdivision resource consent and then the subdivision certification process which verifies the intended land transfer plans as being in accordance with the resource consent. And it provides the link between the spatial view and the textual data.	Y
Crystal Reports	report run transaction data - has connections to other databases using ODBC connections	Y
CustomerView	CustomerView is the view of Council's External Customer Database (ECDB). The ECDB stores customer data for all property owners & ratepayers, as well as Building Consent and Compliance (BCC) customers. It is a web application that allows users to search and browse customer information from a number of different applications. Currently it can display information about customers from CPS, TEAMwork and Confirm Call Centre information. It will also link to CityView so users can move between a property centric view of WCC data and a customer centric view of WCC data.	Y
DPS Payment Gateway	DPS is a payment gateway used to provide a secure environment for customers to pay remotely with a credit card. It is used for most credit card payments made via the website (e.g. Home Earthquake Proneness Assessment, Swim Bookings and LIM applications online) and for payments taken over the phone at the Call Centre.	Y
ECDB (External Customer Database)	ECDB is an internally developed application used to manage all customers' information. Customers include all persons and organisations that interact with Council. ECDB is the fundamental source of customer information for rating and regulatory matters linking to the Core Property System (Valuation properties) and TEAMwork (Service Requests) respectively.	Y
ePetitions	ePetitions is used to enable public to petition the Wellington City Council, via the internet, on matters relevant to the Council's business.	Y
eRecruitment	eRecruitment is used to provide a list of job vacancy currently available in the Council.	Y
Face2Face Retention System	Face2Face Retention System is used to manage gyms membership and programme.	Y
Fix It	Fix It is a web form that allows customers to send request repairs to the Council.	Y
FixIT - Mobile App	FixIT is a mobile application (both iOS and Android) used by general public to report problems in Wellington City.	Y
GetSmart	GetSmart is an online survey tool used to conduct marketing research and collect feedback from customers.	Y
Grants Funding	Grants Funding is an online service for applying Council funding for community projects. For more information, visit: http://www.wellington.govt.nz/services/grants/profiles/general.html	Y
Home Assessment Package	Home Assessment Package is a cloud-based application for applying earthquake resilience home assessment. For more information, visit: http://wellington.govt.nz/services/earthquake/safety/reshomeowners.html#resilience-assessment	Y
IBIS Rate Modelling	IBIS Rate Modelling tool is used by the Council to model rating scenarios and assesses alternative funding options for funding our activities. It was also used extensively during the work on potential regional amalgamation to analyse potential impacts of amalgamation.	Y
ICDB (Internal Customer Database)	ICDB application is used to retrieve, add, modify and remove WCC employee and Business Unit details. The database holds information about the location of the employee, their telephone numbers and email details.	Y
InfoCouncil	Infocouncil is a solution for managing electronic agendas and minutes. The application covers all the business processes involved in reporting up to Council, recording decisions and putting them into action.	Y

Infor Pathway	The main functions of Pathway are: 1) Rates 2) Water Billing 3) Encroachments Pathway is the system which handles WCC Rates sending out quarterly rate accounts for approximately 70,000 (properties) Property Information along with Owner/Ratepayers is exported to Pathway from "Valuation" properties managed in the Core Property System. Pathway creates Invoices. Enchroachments functionality has been built using Pathway.	Y
Intranet Phonebook	Intranet Phonebook is a phone book system for searching staff contact information.	Y
IQP Register	IQP Register is a register for Independent Qualified Persons. This is a function managed by BCC for all IQP members covering 9 Councils.	Y
Jira	Jira is a proprietary issue tracking product, used for bug tracking, issue tracking, and project management. In scope for those functions that make sense to move, e.g. As used by the Mayor and CEO.	Y
Kofax Digital Scanning	Kofax Digital Scanning is an application used to enable caption of the paper-based information in software imaging form.	Y
LIM Application Online	LIM Application Online is a web application for applying Land Information Memorandum, Property Report or Building Information Report. This application triggers a business process that automates the handling of LIM request. This includes: 1) Search and match customer details. 2) Link customer to service request.	Y
Link Manager	Link Manager is a system for linking various entities e.g. a property (identified by WUFI) and a specific DM document.	Y
Linking Browser	Linking Browser is an internally developed application used to create links between DM5 documents and various master data (property, customer and service request) stored in WCC. Linking Browser is part of the Cityview application.	Y
Mercury	Mercury is a job dispatching software that delivers records out from the Confirm application to receivers via emails, pagers & mobile phone text messages. It contains data about who should receive notifications.	Y
Mobile Phonebook	Mobile Phonebook is a web application that allows WCC staff to use cell phones to access the internal WCC phonebook.	Y
Northgate First Housing	Northgate Housing is used to manage the tenancy and housing information.	Y
Objectif Lune Planet Press	Planet Press is used to create or design transactional business documents. Documents created with Planet Press Suite can be printed, archived, emailed and/or faxed as part of a sophisticated output management application driven by the Planet Press workflow tools.	Y
OrgPlus	OrgPlus is a tool used by all employees to view organisation structure.	Y
P&G Booking System	Bookings Database is used to record bookings for all the park, reserves and coastal areas excluding artificial turf.	Y
PeopleSoft EPM	PeopleSoft EPM is a tool used by the Council for financial planning and budgeting.	Y
PeopleSoft FMIS	PeopleSoft FMIS is an off-the-shelf financial management solution provided by Oracle. It is the core financial system and is used for WCC and the Council Controlled Organisations (CCO) for: 1) General Ledger 2) Asset Management 3) Accounts Receivable and Debt Management 4) Accounts Payable 5)Purchasing 6) Management of Delegated Financial Authorities 7) Project Costing 8)Financial Reporting	Y

PeopleSoft HRIS	PeopleSoft HRIS is an off-the-shelf Human Resource management system provided by Oracle. It is used by for WCC and the Council Controlled Organisations (CCO) for: 1) Leave and absence management 2) Skills and training management 3)Compensation/Remuneration & Payroll 4)eRecruitment (no longer used?) 5)Position management and budgeting 6)HR reporting	Y
PerfectForm	PerfectForm is an online tool used to automate paper forms.	Y
Pivotal	Pivotal is a tool used for remuneration allocation.	Y
POS Perfect	POS Perfect is a Point of Sale system used by Wellington Zoo.	Y
Print Management System	Print Management System is an internally developed system used by Publication and Design for managing photo catalogues, corporate products (name signs, business cards) and order forms.	Y
ProjectPartner	EnTech ProjectPartner is a tool used by IT/IM, Human Resource and Building Consent and Compliance (BCC) for time sheeting.	Y
Property Search	The Property Search UI part was built by Blair Lundin, and it is maintained by the BIT Application Development Services team. The backend is built and maintained by the BIT integration developers. This application is a viewer to the Pathway database.	Y
Rates Invoices by Email	Rates Invoices by Email is a web form that allows customer to opt-in for electronic mailing of Rates Invoices.	Y
Rates Payment Online	Rates Payment Online is an online payment facility for rates. It relies on external EFTPOS's ePayment System to capture and process the credit card details.	Y
Ratesview	Ratesview is used by WCC staff & authorised parties to view property rating information. It is also used by the contractor Capacity. The information is currently retrieved from the Pathway rates system.	Y
Road Works Notice	A street-opening notice or Road Works Notice (RWN) is taken out by anyone wishing to undertake a range of activities on our roads - as required under a document called the Code of Practice for Working on the Road (WCC).	Y
Shift Report	Shift Report is an android mobile app for local host team to record shift information when they are out in the field that can be used to generate reports against KPIs. WalkWise incident reporting.	Y
Small Plant & Equipment System	Small Plant & Equipment System is used to track plant equipment (weed eaters, chainsaws, etc.) that are under $2000 in value.	Y
Solicitors' Statement of Account Online	Solicitors' Statement of Account Online is an online service used to provide property Statement of Account, and is available only to registered users.	Y
SPM Assets	Used by Strategic Asset Planning team to perform analytic reporting on roading assets.	Y
Stop Tags	Stop Tags is an online (SaaS) application used to manage all aspects of graffiti removal, from incident reporting to clean up details and provides comprehensive statistics.	Y
Street Name History Database	Street Name History Database is an in-house developed PHP application that provides users the ability to search and view land information stored in MYSQL database. The information was previously extracted from Lands application in VAX system. It contains history of names of streets and reasons for change. It is current accessed by a link from CPS, but it is not being updated.	Y
SyncWUFI	SyncWUFI is used to manage the association between the spatial CRS_PARCEL and the WCC CPS (Core Property System) Survey Properties	Y

	TEAMwork is a bespoke workflow and information system used to manage (but is not limited to) regulatory processes such as building and resource consents, health and liquor licenses, and dog registrations etc. TEAMwork has links to property (CPS), customer (External Customer DB, Internal Customer DB) and documents (Document Management System - DM5). The fundamental entity of TEAMwork is a "Service Request". A service request is given a unique number and the system is used to monitor any request for service. The system has searches/reports to find consents by SR#, property or customer. Currently a summary of the main types of service request types that TEAMwork manages are: 1) Building Consents - from application to compliance 2) Building Warrants of Fitness 3) Building Information 4) Building Strength Investigations (Earthquake Proneness of Buildings) 5) Weather Tightness Resolution of Buildings 6) Resource Consents applications- both Land Use and Subdivision 7) Resource Consent monitoring 8) Subdivision and Right of Way Certifications 9) Environmental Complaints 10) Land Information Memoranda applications 11) General Information applications 12) Health Licenses and Inspection 13) Liquor Licenses and Inspections 14) +B97 15) Dogs and Dog Owners 16) Development Contributions The TEAMwork database also records Solicitors Statements of Rate Accounts and Encroachments Service Requests.	
TEAMwork Powerbuilder		Y
TradeWaste Database	Waste products from kitchens etc.	Y
	VisionCRE is a stand-alone property management system containing current and historic data on: 1) legal details 2) information on acquisitions and disposals 3) property and building details e.g. numbers, names and addresses 4) tenant details including leases 5) construction details and date 6) asset, insurance and rating valuations 7) details of which business unit owns and manages the property or building.	
VisionCRE		Y
VMWare Service Manager	VMWare Service Manager is a call and incident management used by IT Helpdesk.	Y
