Hi Ben – hope you had a good weekend 😊.

I meant to copy you into this on Friday. Would be good to get Jordan to focus on this today, so it gets to a point where we can share with the economists and Brendan. It would be good to touch on this in the Market Performance catch-up and if required, a quick chat with Jordan / you / Kate / Mags? / me to give Jordan any steer he needs to complete.

Cheers,
Trish

Thanks Jordan this is definitely shaping up to something much more digestible 😊. Will catch-up when you are back. I've incorporated your attachment into the original version and added a few tabs. Ben is reviewing a (retrospective) output description for this, to get everyone on the same page. There are still some things to clarify – different aspects of the data, at a more detailed level. Magdalena may be able to help with how this is represented more effectively in excel. Anyway, the output description also attached for your reference. We are not far off from being able to share this with the whole team for their views.

Ngā mihi nui,
Trish

Hi Trish

I have made a start updating the RCS data sets spreadsheet by completing the initial colour coding. I'm not sure if I'm going to be able to get through much more today and I'm on leave tomorrow. I can't seem to edit the original sheet so I have attached a new copy. I have also attached a copy of this year's collated industry questionnaire for the team. This might be useful so they know at what level we currently collect information. I have attached a copy of Spark's backhaul questionnaire as well for reference which I think we talked about in a previous meeting.

The two docs for reference can be circulated with the team. Not sure if you want to circulate RCS data sets yet. I can let you and Kate make a decision on that.

Thanks!

Jordan

Hi Trish

Would you be able to send me the location of the data spreadsheet we were working on yesterday?

Cheers
 Jordan

Hi all – thanks for the session just now. Very useful to get some more clarity around the data being sought and the approach to continue to refine this. My notes/actions below:

- Reviewed the RCS Dataset spreadsheet. Key question is what analysis would you want to make in the end report? This should inform the data we want to collect.
- The spreadsheet is a living document and will need to be updated as we learn more (after meetings with providers, WISPA, etc.)
- **Action:** Jordan to confirm of the data we already have in AMR, is it to the level of detail required, current enough?
- **Action:** Jordan to 'own' the Data spreadsheet, tidy up and supplement with required information as things progress. Ideally would share with the wider project team by end of this week, before meeting to discuss next Monday (can defer Monday's meeting if required).
- **Action:** Ben to request Aiden's time to review the proposed dataset - sanity check.
- **Action:** Ben to update output description for Dataset and share.
- **Action:** Trish to prepare container output description for Info Requests and then Ben to supplement and share.
- **Action:** Trish to request section 98 info request sample from Hannah, together with advice to turn into 'voluntary'. Noted that Pip can support getting the template ready.

Of you have anything to add / clarify, please let me know.

Kind regards,
