Subject: Rural review

Hi Brendan & John,

Thanks for the catch-up last week re the upcoming Rural review. I took an action to provide you with a sample of data we could provide. After talking to our data specialists, I completely agree with your proposal to hold a workshop with them to determine the data requirements, challenges with address data, and making sure we are all reading the data in the same way.

Here are some field and data samples – please let me know if you have any questions.

TSO Addresses Data

The TSO data we have is a list of Addresses from 2011 which had a Chorus baseband service.

To determine TSO status, additional information would be required from Spark that would include whether it is a residential or business customer.

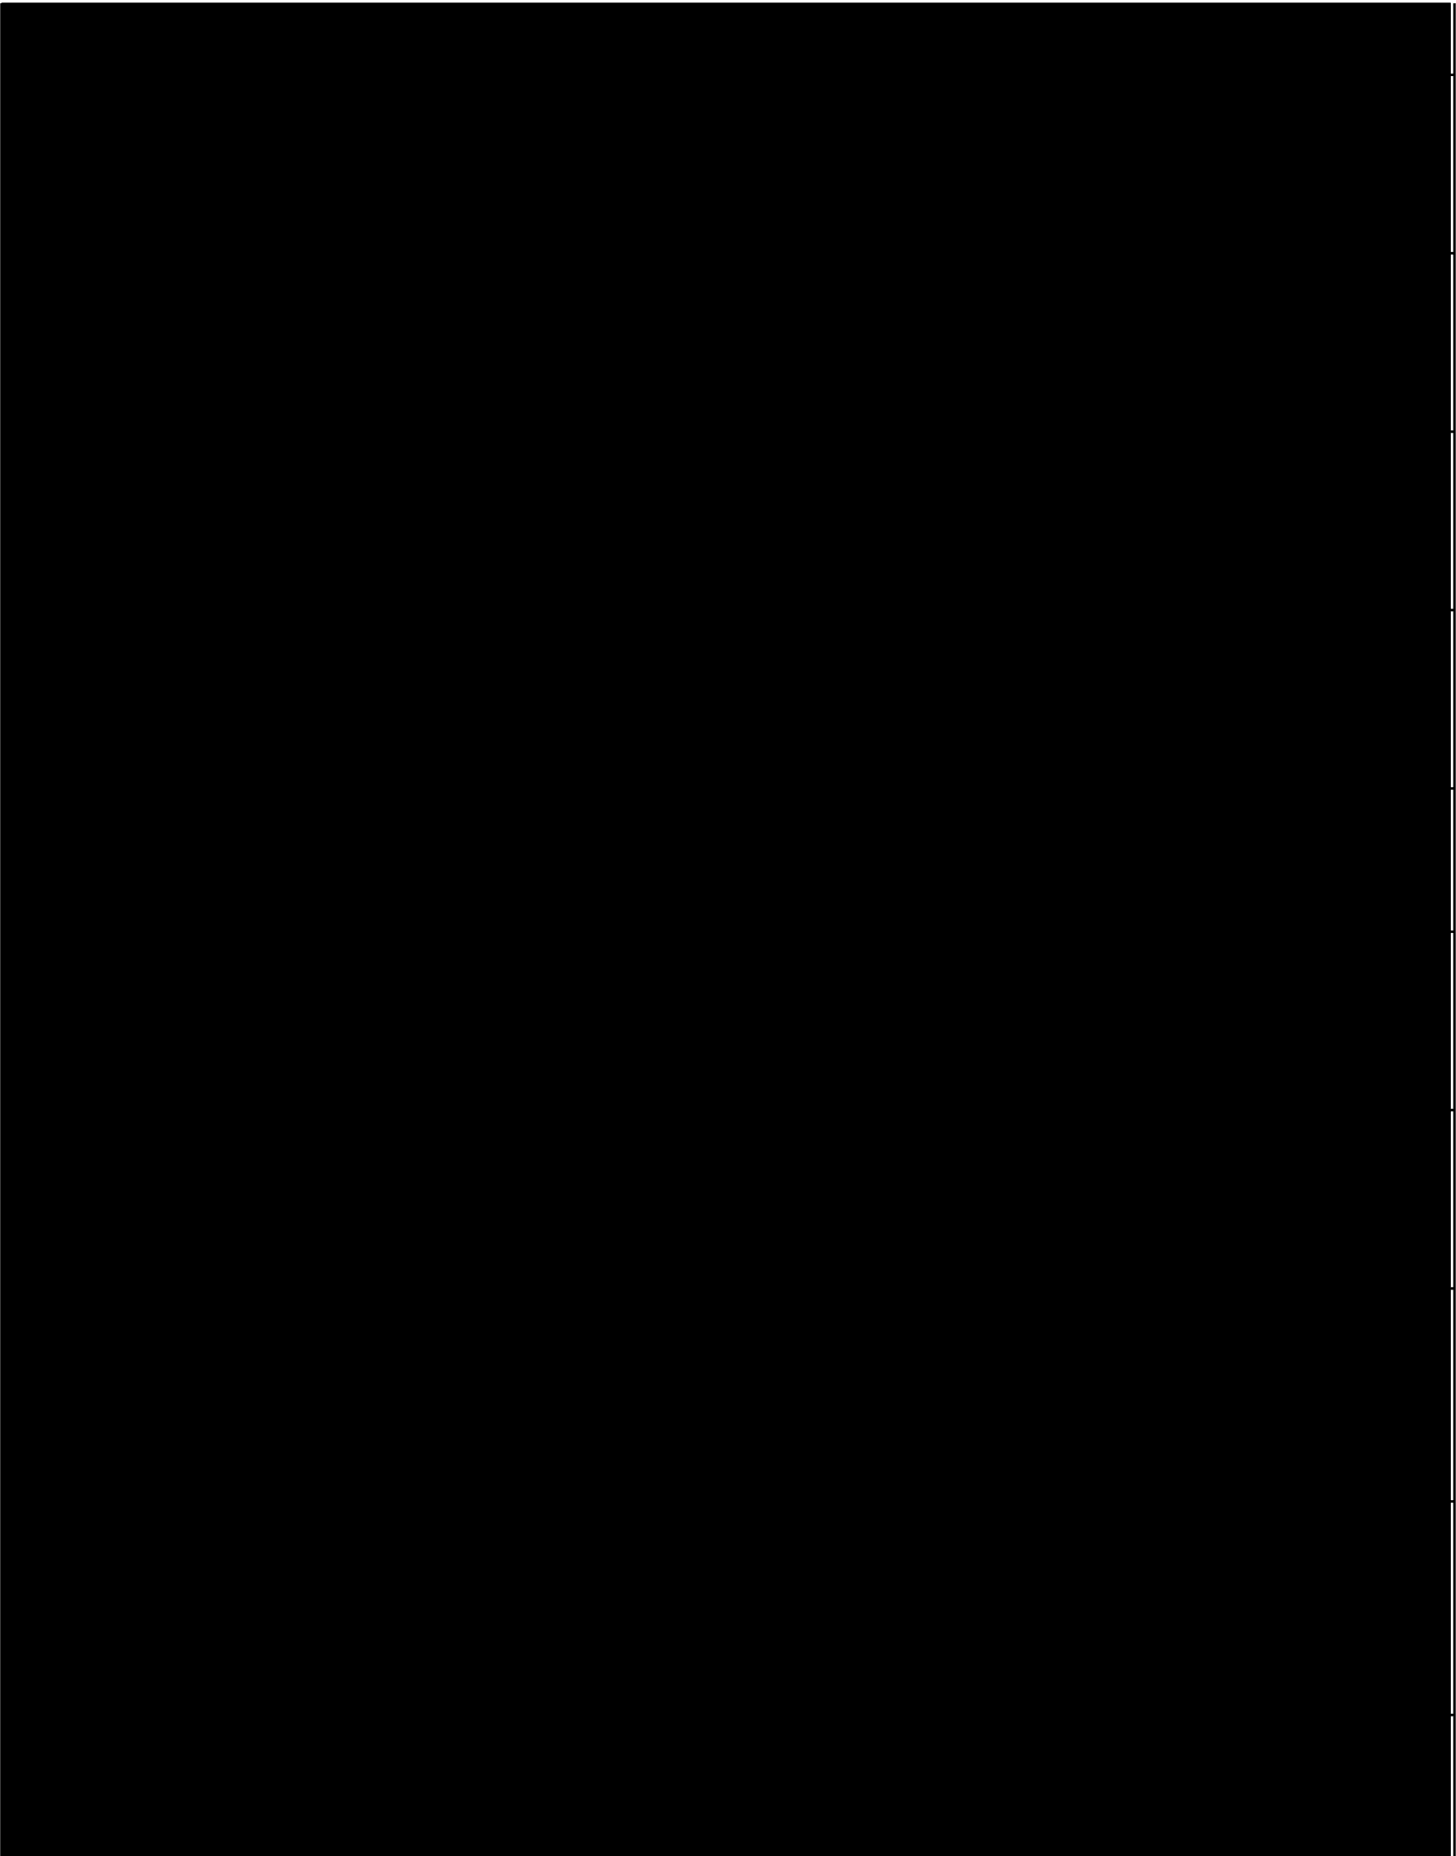

We could provide the following data:

TCL	Formatted Address	SAM No	Non-SFA	Current Baseband Service Flag

Chorus Service Data

For the Chorus service data, we could provide something like the following example for each month of the last 2 years for non-SFA addresses.

Date	ESA Code	ESA Name	Copper Cabinet	Tlc	Formatted Address	Service Id	Chorus Customer L1 Name Short	Prod Level 2 Desc	Prod Level 3 Desc	Clothed With
[REDACTED DATA]										

Please let me know if you need any more information or have any questions.

Have a good weekend,
