Your request for official information, reference: HNZ00037995

Thank you for your email on 13 February 2024, extended on 29 February 2024, asking Health New Zealand | Te Whatu Ora for the following information under the Official Information Act 1982 (the Act):

I have several queries and requests regarding the information provided in HNZ00030152.

Please clarify whether the distribution information provided regarding batch SDYX4 is correct - that 7350 doses were distributed within the South Island. OIA response HNZ00032271 declares that none of the 81,900 doses were dispatched but rather discarded.

I understand that a separate database was utilised prior to the CIR inventory portal becoming fully functional and some distribution data were recorded in a separate database?

- 1. Please include distribution data as per the original request for batches - EP2163, EP9605, ER7449, ET3045, ET9096*
- 2. Please include any distribution data additional to that already provided for the following batches (or distribution data in respect of any other batches additional to those mentioned in this request that may not have been supplied in HNZ00030152 table) to provide a complete response to the initial request. EX2405, FA5833, FC3558, FC5029, FD0927, FD9234, FE2090, FE3064, FE8163, FF2382, FF4206, FG0050, FG3716*

Response

Please note that the distribution data regarding batch SDYX4 is correct. The 81,900 doses noted in OIA response HNZ00032271 was a notation error as 7,350 doses of batch SDYX4 were dispatched, and 74,550 doses were in fact wasted at the warehouse.

The table below shows distribution data of COVID-19 vaccines from the warehouse between February 2021 and June 2021. We are unable to provide receiving location data for this period. No other batches were distributed over this period.
