Dear Mr Apperley

Official Information Request Response

Thank you for your information request, made via the FYI.org.nz website on 12 January 2015, in which you requested the following:

“Can you please provide the ICT Shared Services Feasibility study that provided cost estimates for outsourcing back office processing and ICT infrastructure and also the supporting business case for Shared ICT Infrastructure Services across 4 Wellington Councils.”

Please find attached a copy of the Council’s IT Shared Services – Feasibility Study – Final Report.

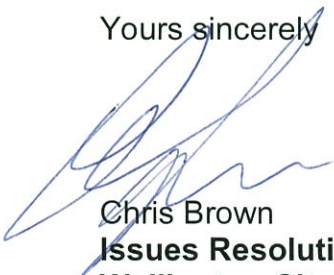

It is important to point out that this report is related to ICT Infrastructure Shared Services (Data Centre, Networks, Servers, Storage, etc) and does not include sharing of core council applications.

Also, Project Odyssey is not covered in this report. The focus of Project Odyssey is to replace a range of legacy council applications with a standard council application platform.

The Council is currently in the development stage of the business case for Shared ICT Infrastructure Services, and as such I am unable to provide you with the information you seek in this part of your request.

Please contact me if you have any questions.

Yours sincerely

Chris Brown
