**Your request for Official information, reference: HN200031597**

Thank you for your email of 20 October 2023, asking for the following information under the Official Information Act 1982 (the Act):

*"In the response to request for Official information, reference: HN200025554 and HN200025920 it was stated:-*

*'In collating this response, we identified six vaccine batches from 2021 that do not match received batch numbers in the data provided to you as Appendix 1 for OIA request H202200175.'*

*Please provide these six identified batch numbers."*

In response to your request, please see the table below which identifies the six batch numbers that were corrected from the data released in **Appendix 1** for **OIA H202200175** and the reasons for the discrepancies.

Batch number	Reason for discrepancy
FF2406 – corrected to FF4206 FG7373 – corrected to FG7372 FG7575 – corrected to FG7372 FK0015 – corrected to FK0115	Discrepancies relate to sub batches in deliveries miskeyed by providers when receipting them in their inventory. All errors were corrected by the National Immunisation Logistics Customer Service Team when identified.
EA0702	This was a made-up batch number used in a dummy order to test systems.
FG3716	This was one of the batches in the Denmark and Spain deliveries which were delivered to the warehouses prior to the CIR inventory portal becoming fully functional and were recorded in a separate database. The batches were retrospectively loaded in the CIR inventory portal as a record only. Batches FG9019 and FG3716 were initially documented as one record and later separated to reflect both batch amounts released into stock at the warehouse.
