SURVEY- YOUR VIEWS ON THE MULTI-VENUE EXCLUSION PROCESS

The Department of Internal Affairs and the Ministry of Health are working with the wider gambling sector including people who have used gambling harm treatment/support services to undertake a review of the multi-venue exclusion process. The purpose of the review is to find out what's working in the exclusion process, what's not working and to make improvements to it going into the future.

To carry out the review we are conducting a survey to get an understanding of what your views of the multi-venue exclusion process are. Your thoughts and opinions are very valuable to us.

How you respond to the questions is open to you. You may choose to answer some with very short responses and to others you may give a more detailed response. We appreciate your time and effort in participating in the survey and are grateful for your feedback.

You may be assured of complete confidentiality and anonymity.
