Subject: ERP abatement

Hi all,

Last week when we requested that agencies continue to quantify abatement for the ERP, we were asked to provide details of what current policies/actions in the discussion document have/have not been quantified. This is summarised below.

Ainsley Smith (Ainsley.smith@mfe.govt.nz) is MfE's point of contact for this work, so please have your teams reach out as needed.

Ngā mihi
Lisa

Initiative	Sector	Status of quantification
Out of Scope		
H1 Energy Efficiency, building code updates	Energy and industry	Included

Out of Scope

Key points:

Included - estimates have been quantified and included in Table 3 on page 11 of the discussion document

Excluded - estimates have not been included in the discussion document, estimates may be produced as the policy is developed

Included in baseline - the impact from the initiative have been included in the baseline projections already and do not represent additional

All estimates are subject to change and high levels of uncertainties, many have been estimated as a package of policies rather than in isolation

Attachments: Out of Scope
Summary of ERP actions for CE board.pdf

Hi everyone,

Thanks to those of you who provided feedback on the draft CRMG slide deck on Friday/weekend/this morning. Apologies that I haven't yet responded to each of you individually yet. Thanks again too for the work of team members to give us the summary view of where policies/actions are likely to be at by December this year.

Attached is:

1. Out of Scope
2. A table/summary view of all of the current policies and actions that are proposed in the ERP – based on info from your agencies. This will be shared with CE Board members, but not with CRMG ministers at this stage. There is a little more analysis and QA to occur we think before it is shared with Ministers. It provides a really good view as to where in the policy development process the various ERP proposals are likely to be by December '21, and what work they will still be subject to in 2022 – so that CEs can elaborate on what policies fall into each of the categories ('Agree' vs 'Agree in principle'), if asked tomorrow.

Kind regards,
Lisa

Subject: Out of Scope DRAFT supporting material for CE Board ahead of CRMG next week

Hi again everyone,

As advised earlier, attached is an outline deck that supports the response to direction from Cabinet on 13 September that: **"the Climate Chief Executives Board to oversee the policy work for the Emissions Reduction Plan and prepare, for the September CRMG, a proposal that will enable final policy decisions for the Emissions Reduction Plan in 2021"**

CRMG is 8.30am Tuesday. We are aiming to get a more complete version of the attached advice to the CE Board members (your CEs) prior to noon on Monday – so **if there's anything in the current attachment (noting it is draft) that you consider is problematic or needs adjusting, please can you get us (me, Sarany, Rachel Ward) that feedback/alternative suggested wording by 10am Monday 20th?**

We've included a timeline outlining what might be possible (it is tight) and brief explanation of the likely nature of December decisions. In terms of the schedule of policies and the 'decision-stage' they are likely to be at in Dec '21, we're still compiling this based on feedback that's come in yesterday and today from your agencies – thanks to those who've responded so far – much appreciated.

Thanks all and have a good weekend.

Subject: RE: DRAFT agenda for CRMG next week Out of

Importance: High

Hi all,

We've received the final agenda and papers for CRMG next week. Please note that the NDC item has now been removed.

I've **attached** relevant documentation that is being circulated to Ministers in weekend bags.

In terms of 'the proposal' mentioned in Rec 2 of the Agenda (*"Note the proposal developed by the Climate Chief Executives Board to oversee the policy work for the Emissions Reduction Plan"*), references to expectations for decisions on the ERP this year, and management of 'overs and unders' in the ERP, following a call with a number of you yesterday afternoon and inputs from your teams, we are working up a few slides that we can share as a work in progress draft later today. We will need to get these to the Climate CE Board Monday for their review/endorsement such that this proposal can be presented Tuesday morning at CRMG.

Thanks,
Ngā mihi

Subject: DRAFT agenda for CRMG next week Out of [redacted]

Kia ora koutou,

I have this morning received the DRAFT agenda for CRMG next week. I understand that this is still to be approved and finalised by PMO today.

Meantime **attached** is:

- DRAFT agenda for CRMG (still to be finalised by PMO)
- Item 2 – NDC supporting information:
 - o Slides commissioned by Minister Shaw that show different illustrative scenarios for domestic and international cooperation investment options and their impacts, for Minister Shaw’s preferred options of 45% (BRF-656)
 - o Updated A3s (appendix 1) – corrected error for ETS linking, now shows that approx. 90MT can be imported via ETS linking, and includes additional row on direct air carbon capture and storage
 - o Updated summary table with added intro points

Thank you to all the work that has gone into the supporting material for this item - particularly on the domestic action ‘Big Plays’. We’ve appreciated your analysis and insights.

As soon as we receive further information about Agenda Item 1 and associated recs and necessary supporting material we will forward that through. I understand that Item 3 will be an oral item (TSY colleagues (@Nicky.Lynch@treasury.govt.nz), please confirm otherwise?); and Item 4 on International Climate Finance will be led by Hon Mahuta with an Aide Memoire to also be circulated in due course.

Ngā mihi
Lisa

Subject: Announcement on ERP Timelines

Kia ora koutou,

Hope that you’re all doing well.

I’m writing to let you know that we understand an announcement/comms is imminent regarding delay to consultation dates on the ERP and final ERP publication. The recent COVID-19 Delta outbreak has led to challenges and delays in launching and implementing consultation and in-person engagement on the first Emissions Reduction Plan – and the resultant changes to Alert Levels have also had a significant impact on those businesses, organisations, iwi, individuals and communities expected to participate in consultation.

Because of this, we understand that the decision has been made by Cabinet to shift the timing of consultation to enable greater participation, and that a legislative change is proposed - to shift the date for final publication of the emissions budgets and final ERP to be by **31 May 2022**.

Consultation will be conducted for six weeks aiming for commencement from October 2021, at a date to be agreed between the Prime Minister and Minister Shaw. However, this decision is dependent on Tāmaki Makaurau moving to Level 2 – so we will await further info as to when that is most likely to be. Our understanding in relation to the 31 May shift is that this will also allow for stronger alignment with B'22 announcements (clearly this should provide greater certainty to agencies as to what within the ERP will be funded next year).

Our understanding of what was agreed at Cabinet is pasted below – noting that we are still awaiting the Cabinet Minute, which we anticipate should be issued in coming days – so the final recs may differ.

Of course, we will be considering (with your teams) what the shift in timing means in terms of both the (already revised) consultation programme we had developed in the past month, as well as timelines for key policy work and deliverables. From our perspective, we are still keen to see where agencies are getting to with chapter outlines (where possible), given that we understand there is a desire from Cabinet to have key policy decisions taken this year.

Until information on timelines is public knowledge, I would appreciate you treating this information as confidential.

Thank you to you and your teams for your continued support – we recognise the ERP development is a big cross-agency effort - and we'll keep you updated if there are any material changes to what I've outlined above.

Ngā mihi
Lisa

1. **Note** the most recent COVID-19 Delta outbreak has led to challenges and delays in commencing consultation and in-person engagement on the emissions budgets and first Emissions Reduction Plan
2. **Note** the most recent COVID-19 Delta outbreak has had an impact on those businesses, organisations, Maori/iwi, individuals and communities expected to make a submission on the Emissions Reduction Plan
3. **Note** that a shift in timing of consultation in these circumstances will enable greater participation by New Zealanders in submitting on the Emissions Reduction Plan
4. **Note** that further delays in consultation on the Emissions Reduction Plan has implications for final decisions and publication of the emissions budgets and Emissions Reduction plan and a legislative amendment will therefore be required to the statutory timelines for those final decisions and publication
5. **Agree** to amend legislation (the Climate Change Response Act) in order to extend the statutory timelines to 31 May 2022 for publication of the first three emissions budgets and first Emissions Reduction Plan
6. **Agree** that consultation on the Emissions Reduction Plan will be conducted for six weeks commencing from early October 2021, at a date to be agreed between the Prime Minister and Minister for Climate Change
7. **Authorise** the Prime Minister, relevant portfolio Minister and Minister for Climate Change to update and agree minor amendments to the Emissions Reduction Plan discussion document, if required
8. **Note** the development of the Emissions Reduction Plan discussion document highlighted the need for further policy interventions in order to ensure the final Emissions Reduction Plan is on the path to achieving the proposed first emissions budget
9. **Note** the consultation process on the Emissions Reduction Plan will seek ideas for further policy interventions in order to enable the Emissions Reduction Plan to be on the path to achieving the proposed first emissions budget
10. **Direct** agencies to further develop and finalise the proposed policies that are included in the discussion document, and undertake further work on new policy interventions so that the final Emissions Reduction Plan outlines how each sector is on the path to achieving the proposed first emissions budget
11. **Invite** the Climate Response Ministerial Group to consider the process for developing further policy options for inclusion in the final Emissions Reduction Plan
12. **Direct** the Climate Chief Executives Board to oversee the policy work for the Emissions Reduction Plan and prepare, for the September CRMG, a proposal that will enable final policy decisions for the Emissions Reduction Plan in 2021

13. *Agree that all final policy decisions for the Emissions Reduction Plan will be taken at or before the last Cabinet meeting of 2021*

Subject: RE: The emissions reduction plan (ERP) Inter-agency team context update. Start of week. Tasks due this week.

Hi,
 We looked at this task tracker together.
[Link -> ERP Inter-agency Daily Task Tracker](#)

Tasks due this week are:

1. Feedback on draft cabinet paper by COB today. [Link here -> <<OLE Object: Picture \(Device Independent Bitmap\) >> CAB-36 Approval to consult on the emissions reduction plan .docx2\)](#)
2. Input into CCC final recs and high level responses by COB today [Link here ->HIGH-LEVEL RESPONSES TO THE CLIMATE CHANGE COMMISSION’S RECOMMENDATIONS](#)
3. Any further edits on your consultation document to Criggy as soon as you can
4. The above three products will get packaged up and returned to Directors/Chapter Leads tomorrow late pm then over to Minister Shaw Thursday 10am

Please let me know if you can't access any of these links and I'll send you a hard copy due to urgency (and I'll work with IT to help resolve issues too) We prefer to collaborate on Teams to manage version control and transparency of feedback. You can imagine how hard it is to compile documents from 10 different agencies together.

The full package for cabinet 23 Aug

Wed 07 Jul pm		By 1pm Directors confirm any further changes to their sections (that need to be reflected in draft going to Minister Shaw on 8 July)		
Thu 08/07 10am	Minister Shaw receives draft consultation document – for feedback and direction			
9 Jul – 19 Jul		Agencies continue to work on sections/get feedback from other agencies/seek ministerial approval as required etc, Other actions: Confirm approach to treaty section, economic quantification, emissions impacts		
Tue 20 /07	Chapter leads Final feedback/comments on cabinet paper	Chapter leads Provide approved content to MfE for respective sections	Chapter leads/NDC Leads Final approved input into table for assigned recs	
Wed- Thu, 21-23 Jul		MfE send whole document to editor (tbc)		
Mon- Tue 26- 27 Jul	Agencies review full package: edited copy of consultation document and confirm any changes required [plus Cabinet paper			
Wed 28 Jul	MfE sign-out of package			
Thu 29 Jul	Package to Minister Shaw and ministerial consultation begins			Chapt
Tue 03 Aug	TBC CRMG meeting – ERP Cabinet paper on agenda			
Tue 10 Aug	Ministerial consultation ends			
Thu 12 Aug	Cabinet paper lodged			
Mon 16 Aug	Cabinet paper to CBC			
Mon 23 Aug	Cabinet paper Cabinet			

In June, we asked you to provide a list of new policies you are working on for the ERP will require a RIA by 1 July, and requested for agencies to provide final RIA information by 29 July. Unfortunately we did not receive many responses – we understand everyone is very busy and our request may not have been crystal clear. The below should clearly lay out what we require in order to help us meet RIA requirements for the ERP and ERP consultation document.

Please see earlier email from Criggy attached to provide additional context. If you have not already, please get in touch with the Treasury **ASAP** for each of your policies in order to determine whether a RIA, or any additional impact analysis is required. When engaging with the Treasury, please indicate that your policy is part of the ERP.

Where you are unable to meet the below timeframes, please let us know. Any information you can provide meanwhile will be helpful.

By **COP Thursday 7 July** (or earlier if possible):

Please enter into the table in this excel spreadsheet Link [ERP Policies RIA Table](#) a list of existing and new regulatory policy proposals in your chapter, and simply input a Y or N to note which of the following applies to each policy:

- Does this policy have an **existing RIA**? (*yes or no*)
- Are the options for this policy narrowed in the consultation document, and therefore a **new RIA/additional impact analysis is required** to support the consultation document? (*yes or no*)
- Are the options for this policy not narrowed in the consultation document, therefore a **RIA will be provided when seeking final decisions**? (*yes or no*)
- Has an **exemption** been provided by Treasury, or is a **RIA not required** for this policy? (*yes or no*)

Note this table is on our ERP teams channel so you can update it at any time – please try to fill it out by the deadline, but if you still in the process of confirming policies or RIA requirements, please list the policies and note it's *to be confirmed*, or get in touch with me. Feel free to add new rows to the table as required.

By **COP Thursday 29 July** (or earlier if possible):

Please either update the table or email me to **provide existing or new RIA, or additional impact analysis** as links or attachments, as well as:

- QA Statements for each RIA
- Wording provided by Treasury's RIA team for any exemptions
- Indicate proposals where separate RIAs will be provided with the Cabinet paper seeking final decisions

Please get in touch if you have any questions or concerns.

Subject: The emissions reduction plan (ERP) Inter-agency team context update. Start of week.

When: Tuesday, 6 July 2021 9:00 am-9:30 am (UTC+12:00) Auckland, Wellington.

Where: Microsoft Teams Meeting

Kia ora,

We would like to increase the virtual Tuesday morning standup from 9.00-9.15 to 9.00-9.30. The last 15 mins we'll confirm the work requests that you have received from MFE.

- **List of work requested for you from whom and their due date.**
- **Q&A from you about the above**

As the ERP inter-agency team grows internally and externally we want to ensure we are joined up and being efficient.

We are proposing putting in another virtual context download for every Friday 9.30-9.45 to give end of weeks summaries or download from governance/minister/CRMG meetings that occurred mid week.

Kia ora,

We invite you to an ERP inter-agency weekly virtual "stand-up" where we'll provide you with ERP context update, downloads from Ministers meetings and heads up on Climate Response Ministers Group Meeting and anything of relevance to the ERP.

Useful links for you

This is where we file all inter-agency documents [ERP External Teams Link](#)

Documents you need to read and keep handy:

- [ERP SPAT Cabinet paper](#) (Scope, process, accountability, timeline) this is paper clearly shows the ERP Chapter structure and the accountability for delivering the chapters by agencies and lead ministers.
- [ERP sector chapter template v2](#)
- [ERP cross-sector chapter template guidance v2](#)
- [Treaty analysis guidance for chapter leads 300421](#)
- [ERP Sectors Quantification Template](#)
- [ERP SPAT table with Chapter structure with scope and final CCC recs](#)

RELEASED UNDER THE OFFICIAL INFORMATION ACT 1982

DRAFT Transitioning to a low-emissions and climate-resilient future

Emissions reduction plan consultation document

What we are doing now

Building for Climate Change

The Building for Climate Change Programme is the Government's key mechanism for reducing emissions from the building and construction sector. For more details, see [MBIE - Building for Climate Change](#)

We are looking at ways to scale up the changes needed for a meaningful impact on our targets. These include regulatory change, incentives, a workforce transformation programme, and influencing the supply chain, consumers and the broader market, via proposed changes to the New Zealand Building Code. Underpinning this work is the principle of the Government leading by example in reducing its building-related emissions.

The programme includes:

- **Regulatory proposals** – We recently consulted on two frameworks for reducing emissions: [Transforming Operational Efficiency](#) and [Whole-of-Life Embodied Carbon Reduction](#). (Read the summary of submissions and other feedback on the [programme website](#).)

New builds are the first priority, because lowering emissions in existing buildings is more complex.

- **New Zealand Building Code Clause H1: proposed changes** – We will start changing the regulations, as we design a broader set of transformation policies. In May 2021 MBIE consulted on updates to the code, to improve energy efficiency, reduce emissions and realise other benefits for housing and small buildings; large buildings; and heating, ventilation and air-conditioning systems in commercial buildings. More details are on [MBIE's website](#).

Subject: Out of Scope ERP Chapter Leads and ERP Directors joint meeting 30/06/21 - Meeting notes and action points to be sent out to attendees
Attachments: Out of Scope
[REDACTED] SECOND DRAFT ERP Consultation Document 29 June.docx; Out of Scope
[REDACTED]

Kia ora colleagues,

The documents we discussed yesterday in our ERP session are re-attached for ease of reference:

- 1) ERP table with Chapter structure, agreed to in the April SPAT cabinet paper high level scope and final CCC assigned to each chapter
- 2) 2nd Draft ERP consultation document
- 3) Though we didn't discuss it, you were shown the table of unassigned recs that have been sent out to specific agencies to be completed and returned to MFE on Friday for DCE's meeting next Wednesday to agree on next steps.
- 4) Table to be filled in with a high-level response to the CCC recommendations (intended to be an appendix to the cabinet paper on the ERP consultation document). Chapter leads have been asked to input directly to the link [Link here ->HIGH-LEVEL RESPONSES TO THE CLIMATE CHANGE COMMISSION'S RECOMMENDATIONS](#)

Summary of next steps:

- 1) There was a general agreement that emissions reduction estimates will be needed in the public consultation document. Ainsley has started this work and will need support from agencies. He sent out an email to agencies yesterday afternoon.
Action: Directors to ensure that modelling estimates are developed. MfE will provide more specificity around what is required and the proposed process, and Ainsley will continue to work with agencies (specifically modellers) to come up with our best set of policy emissions reduction estimates that will be published in the ERP consultation document and also feed into the emissions budgets Cabinet paper. Please get in contact with Ainsley.smith@mfe.govt.nz with any further queries and/or if additional people need to be part of the process.
- 2) All the chapter leads were online (except for Chapter 5 Leads and Transport Leads Jo who had a Minister's meeting). Leads heard your questions and feedback and need some time to process them and come back to

the directors group. There were some key themes re role of regulation, planning chapter and the narrative re overall economic strategy that need to be taken on board.

- 3) Chapter leads process going forward: Chapter leads continue to work on their chapters and have a workshop together on 15/07 for further analysis on cross cutting / tricky recs, developing policy options, map out milestones and decision points with a report back on chapter progress for CE board meeting 22/07.
- 4) There were lots of questions on costs – as currently there is no information on policy costing. **Action:** Lisa and Vicki to speak about this subject and a special directors meeting will be needed to provide directions.
- 5) Public consultation processes/timelines have been updated as a result of today’s meeting and directors feedback, please see the table below that outlines the cabinet package of products with process, timing and what input is needed when from chapter leads/directors. We will not be in a position to send all consultation document chapters to the editor this week, so those other sections will go as they are/wherever they are at, next week.
- 6) A reminder that as per CRMG request, each agency also needs to be undertaking analysis to understand what further opportunities exist for domestic reductions. This is needed both for the emissions budgets work, and NDC.

RELEASED UNDER THE OFFICIAL INFORMATION ACT 1982

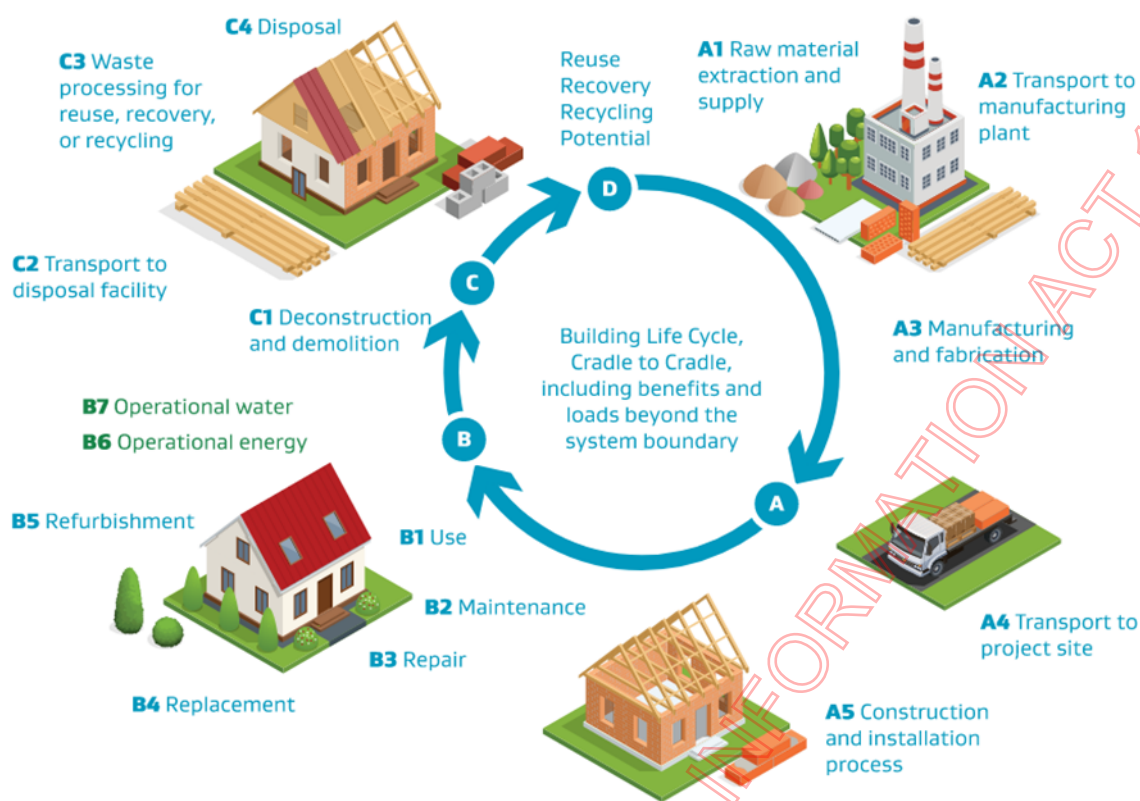

Figure 2: Life cycle stages of a building – sources of embodied and operational emissions

Policies and measures the government has committed to

Building for Climate Change Programme

The [Building for Climate Change programme](#) is the Government's key mechanism for reducing emissions from the building and construction sector. Refer [here](#) for more details including the programme's strategic direction.

The programme is looking at system settings that will be needed for the sector and the market to deliver the scale of change required for meaningful impact on New Zealand's emissions reduction targets. These system settings include regulatory change, incentives, a workforce transformation programme, influencing the supply chain, consumers and the broader market, enabled by proposed changes to the New Zealand Building Code. This work is all underpinned by the principle that Government will lead by example in reducing its building-related emissions. This includes:

- **Regulatory proposals** - The Building for Climate Change programme is considering various regulatory options to facilitate sector transformation. The programme recently consulted on two emissions reduction frameworks: [Transforming Operational Efficiency](#) and [Whole-of-Life Embodied Carbon Reduction](#). The summary report and other feedback are on the [programme's website](#). New builds have been selected as the first priority given the range of additional considerations and complexities in reducing emissions within existing buildings.
- **New Zealand Building Code Clause H1 proposed amendments** - The Building for Climate Change programme aims to start implementing change through the existing regulatory system while it develops a broader transformational policy package. As part

of this, in May 2021 MBIE consulted on proposed updates to the Building Code aimed to improve energy efficiency, reduce emissions and realise other benefits housing and small buildings; large buildings; and heating, ventilation and air-conditioning systems in commercial buildings. More details are on [MBIE's website](#). The findings from this consultation will be available in October 2021 with the proposed changes to the Building Code documents to come into effect in November 2021..
