Hi both

Given the pressure for speed bumps (particularly at Tomahawk) might it worth ordering another (on top of the Caversham one).

Thanks

Hi JB,

I'm expecting we will need to order more in the near future. We already have issues at Pukehiki after the last round of speed limit changes and once the signs start going in from the ISMP school limits I think we will get a lot of requests for traffic calming. It might be worth bringing up with Simon and Jim as to what their expectations might be. I remember the controversy Maori Rd speed humps caused and we could easily get that again if we're not careful.

Cheers

Ian

Subject: Tomahawk Sea Lion Pups

Jeanine

With the recent pupping season female sea lions are very actively moving around the Tomahawk community on the roads. Locals have reported them around the gun emplacements and other parts of the community. The Board has raised this issue with the City Council many times over the last 6 years, especially in the last 2-3 years as mother's and pups have been significantly more active in the Tomahawk and Smalls area.

Other issues around poor driving behaviour have also been raised by the Board in this area and the community were consulted a few years ago about a programme of curb protrusions and judder bars to slow traffic in the area. This programme was never undertaken despite the Board having this request remain in its community plan and long term plan submission. With extensive subdivision in the community the issues around speed and protection of people and animals will accelerate in this area if further work is not undertaken towards change for pups and people.

For that reason I'd like to request a discussion with DoC, the community and the Board to look at seasonal and permanent options for this community as a matter of urgency.

Hi Simon,

Yes happy with your response.

Just for further information, we are regularly asked for speed humps to be installed at various places throughout the city. One topical site at the moment is Pukehiki on Highcliff Rd. The township was part of the Peninsula speed reduction to 40km/h and we seem to be getting quite low compliance to the lowered speed limit. Bearing that in mind, I think it is very likely we will see similar situations through the schools speed reductions. These areas will see traffic calming installed before we would consider places like Tomahawk and obviously these sites can only be done as budgets allow.

Incidentally, there has been little support for safety projects or speed limit reductions from the community board and they haven't done anything to gauge local feeling towards traffic calming for Tomahawk, at least as far as I'm aware.

Cheers
Ian

Hi Ian,

FYI below. Are you comfortable with my response to the Councillor

Hi Councillor

Whilst it is technically possible, the staff time and cost to install, monitor and assess would be diverted away from other sites that have been assessed with a higher risk and therefore higher priority. I would not advocate for this approach.

If this is important to the community, I understand that Tommahawk is covered by the Peninsula Community Board and could be considered for the CB Project Fund.

Hi Simon & Sophie,

Is there any opportunity to put a temporary speed hump in place to see if it has any affect?

With all the development in the Tomahawk area I do think some speed modification needs to be put in place.

Cheers
Andrew

Kia ora Councillor,

I note conversations about speed management in Tomahawk with [REDACTED] have been ongoing for some time. I have previously met with [REDACTED] (at [REDACTED] in Tomahawk) to discuss the LED project and speed management issues.

The Tomahawk area will be included in the DCC Speed Management Plan. Work on this plan has started and will be seen by Council and engaged on with the community later this year. You'll recall Council considered the Interim Speed Management Plan late last year, which was focused on Schools.

There are no immediate plans to install speed management infrastructure in the Tomahawk area. This type of infrastructure is prioritised across the city using a number of factors (accident statistics, vehicles carried per day, measured speeds, etc) against available budgets (Transport Low Cost Low Risk LTP Budgets). You'll note median speeds in Tomahawk are as expected with some 'outliers'. Outliers can also be managed via enforcement.

I'm happy to discuss in further detail.

I'm not aware of the (pending?) sea lion pup but will follow up with Parks and DOC.

Regards
Simon

Kia ora Simon

Is there any work going on around Tomahawk Rd at Ocean Grove to calm traffic?

Its a well known speed area and circuit. I live on a street that part of that circuit so am aware of these issues too.

Seems to be a long-standing issue. I was also sent some documentation of actual vehicle speeds in that area which looked a bit scary.

Is there any work with DOC if there is a sealion pup nearby? Apparently locals are trying to keep that quiet. However would be worth us looking at the area?
I'll forward you the other email with more details

Thanks heaps

And it was part of the DCC annual plan to investigate, but that's ended in a no. With all the new builds and two subdivisions there should be some pūtea in the coffers.

Some simple things, and not costly could be done in the interim, broken yellow lines on the bridge, centre white line and larger 50km signs, a child crossing sign on either side of the playground. Parking directions from the beach carpark to the Rec Centre carpark would also be great and reduce some of the mayhem on sunny days.

As and aside there is the large Tomahawk Beach sign with the interpretive board stating Tomahaka/Tomahawk - maybe time for a sign change to reflect the first naming?

There's a Jim Fyfe sea lion blurb in the files on the Hawk Talk Community fb page, it would be great on the notice board if you have the key still and are passing through.

Are the Board planning a meeting here this year? That would be great.

This issue has been one of frustration for the Board and I as we have presented the Tomahawk case in the Annual Plan and Board's Community Plan for the last 6 years. Similarly, Smalls Beach has also been part of that submission.

What frustrates me is that a consultation process was started by the City Council for protrusions or speed bumps and that was summarily stopped and no progress was made.

I will continue to ask Council that this issue be addressed and resolved for the community. It's remains part of our community plan this year and will remain so until it is completed.
