

Variation 65 - Typical Running Schedule(Schedule 17)

SECTION A DETAILS OF PROPOSED VARIATION (Originator to complete)																																			
Contract Identifier:	Agreement for The Supply of New Electric Multiple Unit (EMU) Vehicles. Contract PT0017																																		
Contract Variation Number:	RM:	GW:																																	
Effective Date of Variation:	Subject to issue of an authorised Variation Order by the Principal, 6 September 2011.																																		
Item under Action:	Typical Schedule Wellington to Johnsonville and return																																		
Description of change:	(a) Change to typical schedule for Johnsonville line																																		
Reason for change:	The mainline tests for journey time have been carried out on Johnsonville line. Test result did not meet the typical schedule due to difference between the current restriction speed of Johnsonville line and the applied restriction speed in SDR document(RM\ 1A-03-01-01\ D0019, Running Simulation). So the typical schedule of Johnsonville line should be amended in consideration of current restriction speed.
