Dear Susan

Subject: Official Information Act request Re: CPAC scores

Thank you for your request for information under the Official Information Act received by Lakes DHB on 15 December 2015. You have asked for:

Statistics on the minimum, average, and maximum CPAC scores for which patients were assessed and scheduled hip and knee total replacement surgery, per DHB around NZ in 2014 and 2015?

Lakes DHB answered a similar request recently and rather than have staff spend more time on collating similar information is responding with this information.

Year (Period ending 30 June)	Average CPAC Score for Hip and Knee Orthopaedic Surgery	Clinical Threshold CPAC for Hip and Knee Orthopaedic Surgery
2012	Data Unavailable	47
2013	69.68	47
2014	67.65	56
2015	70.08	56

The above information is representative of hip and knee joint replacement surgery. Lakes DHB does not currently have a threshold in place for non hip and knee joint procedures as all patients referred by a secondary consultant are accepted on to the waiting list.

We do not currently have the data available for the average CPAC score for the 2012 year although it would not be inconsistent with subsequent years.

Yours sincerely

Ron Dunham
Chief Executive
