Subject: RE: customer query [REDACTED] alberton ave

Categories: Alberton Ave bus stop relocation

Hi Alynne,

Is he referring to outside #75 where the bus stop will be removed? If so then unfortunately no, because visibility will have to be maintained at all times for the zebra crossing. They are able to park at the proposed bus stop outside of the operating hours (i.e outside #67,69 and #65).

Hope this helps.

Cheers,

Rosita

Subject: customer query [REDACTED] alberton ave

Hi Rosita,

Had a customer call in about alberton bus stop relocation, wondering if the broken yellow lines proposed outside their property ([REDACTED]) could be replaced with no stopping restrictions, to limit parking only when the bus stop is operational and not all the time?

Thanks

Subject: Consultation: Alberton Avenue Bus Stop Relocation, Orakei

Dear Colleagues,

We are consulting with you regarding a proposal to relocate the bus stops between No.s 75 and 63 Alberton Avenue, in Orakei.

Please review the attached word document (a brief project description) and drawing describing the changes, and respond to the following:

1. Does this proposal comply with standards and practices within your business area?
2. Does this proposal impact on or interact with any current or planned projects in your business area?

Please ensure your responses are provided by the end of the day on **Friday, 15 January 2016**. If you have any questions, feel free to contact myself or Rosita Chan

Kind Regards,

Hi [REDACTED]

We spoke on the phone a few days ago about the proposal near your property of [REDACTED] Avenue.

I've spoken with the engineer, and unfortunately the proposed broken yellow lines outside No. [REDACTED] Alberton Avenue could not be replaced with time-sensitive No-stopping restrictions. These broken yellow lines are necessary to ensure visibility around the zebra crossing, which could be used at any time.

However, you would be able to park at the proposed bus stop (i.e. outside #65, 67, and 69) outside of the operating hours.

I hope this answers your question, feel free to contact me if you have any more questions.

Hello Rosita,

Thanks for seeking clarification, if this is the only practical option that meets all of the requirements then I can accept that tree removal has to take place. Ideally it would be good to plant new trees in suitable locations along the street as you have suggested to mitigate for the proposed tree removal. You will need to apply for consent for removal and should include the finalised plans depicting the proposal including tree removal.

As noted above I can accept tree removal on the basis that replacement planting is undertaken as part of the projects installation. I have attached a consent form for you to submit once the project plans are finalised. If you require anything further on this please let me know

Subject: Alberton Avenue opposite Marist College

Hi [REDACTED]

Thanks for meeting with us on site for Alberton Avenue. We have had discussion with PT regarding the relocation of the bus stop from the originally proposed location(#24 Alberton Ave) to #28 as you have suggested. Given that this location is directly opposite the school gate and the bus stop will be further away from the zebra crossing , we both have concerns that school children will choose to cross the road directly after disembarking the bus or run across the road to catch the bus during school afternoon peak, instead of using the pedestrian crossing facility. After careful consideration and taking into account the behaviour of school children, we believe that it would be more ideal to keep the original proposal (relocate the bus stop to outside #24). We are happy to plant more trees at other locations on Alberton Ave as a result.

Kind regards,
Rosita

Subject: FW: [REDACTED] Alberton Avenue-driveway location

Hi Mano,

I was wondering if there is a vehicle crossing permit approved for [REDACTED] Alberton Avenue?

We are currently investigating safety of the zebra crossing outside Mt Albert Grammar School and it appears that the resident may be using the existing pram crossing as a vehicle crossing. As shown in the attached photo there is formal driveway adjacent to the crossing and there is also a car parked behind the wooden gate. Looking at the

aerial it appears that a vehicles will need to drive partially / completely over the current pram crossing in order to park inside the wooden gate. However I haven't seen any cars actually doing so when I was on site.

Would you be able to see if there is any vehicle crossing permits approved for this property?

Kind regards,

Rosita

Subject: RE: [REDACTED] Alberton Avenue-driveway location
Importance: Low

Hi Sree, would be able to check with AC or in the council database to see the consented location of the crossing for the above property?

Rosita, it's also worthwhile to check with Compliance Central (Mano) to see if there is a vehicle crossing permit approved for this location (which could supersede that of consent). In any case, it's Mano team who is able to issue an infringement notice for any discrepancy issue to be rectified.

Cheers

Subject: [REDACTED] Alberton Avenue-driveway location

Hi Aut,

Hope you have a good Christmas break!

I was wondering if you can assist on this. Currently we are the bus stops and zebra crossing outside Mt Albert Grammar School on Alberton Avenue and I suspect that the resident may be using the pram crossing as a driveway to park into [REDACTED]. There is already a driveway going into the property but there is also a wooden fence in line with the rock wall with a car parking inside. Please see attached.

Do you think there will be any records showing the actual location of the vehicle crossing in the consent?

Many thanks

Hi Alynne

Some feedback from AT Metro:

There is no indication in the material supplied how many school services we are trying to accommodate here. Do we need all this space? Have we talked to the school around what the actual need is? Without some more clarity on these matters, it is hard to form an opinion on whether we need to take this much kerb space or not.

Kind regards

Margaret

To: Alynne Hendricks (AT) <Alynne.Hendricks@aucklandtransport.govt.nz>
Subject: RE: Consultation: Alberton Avenue Bus Stop Relocation, Orakei

Alynne,

I have just received the following from a customer, via the CRM process:-

Last year, I wrote requesting traffic lights or a traffic-light pedestrian crossing on the south side of the intersection of Mt. Albert Road and Alberton Rd. You said that you couldn't put in traffic lights because of driveways and I accept that. However, I think that a traffic-light pedestrian crossing a little way before the intersection (in the direction of Sandringham, not the Mt. Albert shops) is vital.

With three schools in Alberton, both the vehicular and foot traffic are heavy. Every day, I see school children dodging traffic across Mt. Albert Road and my heart is in my mouth. There is a pedestrian island on the north side of the intersection; however, many children come from the south side or get off the bus on the other side of the road and don't go up to that island to cross.

There was also an island in Mt. Albert Road between Kerr Taylor Ave and Toroa Tce but that has been removed. I understand that there is also a change in bus routes so that many children who caught buses in New North Rd opposite Rocket Park will now have to go up to Mt. Albert Rd and cross it in order to get their buses.

As you know, 2 children were hit by cars on St. Luke's Road last term. I don't want my child or anyone else's child to be put at risk. My daughter and I were hit by a car while crossing to a traffic island in Greenlane a few years ago so they are not ideal.

I am positive that a section of road can be found, on the south side of the Mt. Albert/Alberton intersection, where a pedestrian crossing with lights can be put in. Children's lives should be a high priority, higher than fixing run-down-looking kerbs. I feel that my child's safety is being compromised by there not being a lighted pedestrian crossing at that location. I urge you to reconsider.

This appears to link closely to the measures currently being proposed to improve pedestrian safety in this area. Do you wish me to pass this to Rosita via the same process or ??

Subject: RE: Consultation: Alberton Avenue Bus Stop Relocation, Orakei

Alynne

Thank you for the opportunity to comment on this proposal.

I note that all I have been asked to do is state if the proposal complies with standards and practices Rapid Response use as well as if this impacts on proposals that RR have for the same locations. I am not sure that is what I would term consultation so I will make comments based on my knowledge of the area, on road safety and on the likely responses of customers to these proposals and its implications on consistency across the AT network.

Having identified that parking on the approach to the zebra crossing is an issue, it appears that AT are proposing to actually create a parking space on the approach. From a Rapid Response point of view, I would struggle to defend the retention of this parking space. I also note that two of the three bus stops straddle residential vehicle crossings and the length of bus stop specified in ATCOP (13.5 metres in length) does not match those that it is proposed to be provided.

I note that nothing is proposed to be done on the actual zebra crossing, which is felt to be unsatisfactory from a pedestrian safety and operational point of view, due to the location of vehicle entrance points to residential properties, in particular the vehicle entrances to #71 and #73 Alberton Avenue which utilise the pram crossing at the zebra crossing to access off street parking areas.

Subject: Consultation: Alberton Avenue Bus Stop Relocation, Orakei

Dear Colleagues,

We are consulting with you regarding a proposal to relocate the bus stops between No.s 75 and 63 Alberton Avenue, in Orakei.

Please review the attached word document (a brief project description) and drawing describing the changes, and respond to the following:

1. Does this proposal comply with standards and practices within your business area?
2. Does this proposal impact on or interact with any current or planned projects in your business area?

Please ensure your responses are provided by the end of the day on **Friday, 15 January 2016**. If you have any questions, feel free to contact myself or Rosita Chan

Kind Regards,

Alynne Hendricks | Consultation and Project Administrator
