Section 9(2)(a)

Hi:

Me again. Jeff told me he tried to set up a meeting but the timing was off. I could fill in for Jeff and we could have a meeting to go over a few loose ends?

Would love to show you the product and discuss where we are heading.

Please do let me know how you are placed.

Thanks  
Wasim

Hi Wasim,

I ran this by [redacted] and we're keen to see your presentation. His PA will be in contact to organise a suitable date and time.

Looking forward to the product,

Hi s 9 (2)(a)

If you could set that up for anytime WC 09/05 that would be better for me. Bit busy getting product to market.

Let me know what works.

Thanks  
Wasim

Hi Wasim,

Sounds great, we'd love to see a demo of the product, we're also working on some data-sharing initiatives with the MOE so maybe we can explore some ideas there. Will I set that up for sometime next week or the week after?

The API Gateway project is going well. We're aiming to start work on the Learner API in early June, hopefully this aligns with your own timeframes.

Cheers,

>>> Wasim Talim <wasim.talim@me.com> 28/04/2016 12:58 AM >>>

Hi § 9 (2)(a)

Have been working through the API list and ideally we would like all that is available to us. Things like first and last name where a students privacy is concerned we do not need. But everything else would be good to have access to as we build our product away from counting credits and more towards bridging the gap between secondary school and tertiary. We also have been requested by some tertiary providers if we can adapt our service to their needs. We see potential to do amazing work in this space.

More than happy to come in and speak with you about this. Be good to show you our product and where we are with it. We have an awesome new feature coming out next week where students can connect with tertiary providers and get updates from them. With over 50+ providers and more that 2000+ courses will be available on our app for students to make career decisions once they leave secondary school.

How are you tracking with the API project?

Thanks  
Wasim

Hi Wasim,

Apologies for the delay in response, we've started setting up an API Gateway so events are starting to move fairly quickly - quite exciting!

I've attached the information we have to date on the Learner Data API. Can your dev have a look and work with us to identify the data they wish to call. No probs if they want to come in and talk to our technical people in here. Ideally we'd like a list of the data you need later this month. They'll need to contact me in the first instance.

Kind regards,

Hi 89(2)(a)

Thanks for the update. Really looking forward to integrating this into our product.

I think the best way to move forward with testing is if you could provide documentation or an action plan for my developers and we can go from there?

Once I get a response, I will instruct my developers who will most likely wish to be in contact with someone technical so they can get underway with planning at our end. Would you be the right person that I could direct my developers to?

Thanks again for the update.

Kind regards,  
Wasim

Hi Wasim,

Development work started on the API Gateway last week so we have started our API journey. We have a developer on site who is setting up the gateway and a few developers are working on APIs that will be of interest to you, as previously discussed - quals, standards, qual check, and learner data.

Looking forward to hearing from you to work out testing etc,

Hi Wasim,

We don't have any intentions to do any mail outs at this stage. I will ask to get in touch about the API testing/availability timelines.

s 9 (2)(a)

Thanks

Hi Wasim,

I've just sent an invite to a meeting following the demo.

We're hoping to have the learner IdM solution (using current NZQA learners' authentication system) and the API in test by the end of June. We'll be testing during July and hope to be ready at that point for connection.

We can discuss timeframes at the meeting next month.

Cheers, s9(z)(a)

Hi s9(z)(a)

We have set up a meeting with you guys next month to showcase our new product. Can we also discuss the API integration then as well?

How are you placed with the development to date? When do you think we would be able to start planning to integrate it?

Cheers  
Wasim

Hi 89(2)(a)

Thanks for the prompt response. I will try and make it down because I would really like to be part of the discussion but it will depend on my week.

I was away last week so it may be tricky for me to get time off but I will definitely try. Do you want us to present while we are there?

Also, will Andrea Gray be present at the meeting?

Cheers

Jeff

Hi Jeff,

It's intended to be an awareness session. Last time I talked with Wasim he outlined a very interesting product roadmap for you guys and I think it's important that some key people at NZQA are aware of what you guys are doing and where we are working together (APIs). I think it's just a session to talk about where the product has come from, where to next and what we are working on.

Thanks

89(2)(a)

>>> Jeff King <jeff@blueprintapp.co.nz> 12/06/16 4:07 PM >>>

Hi 89(2)(a)

I was just wondering whether you need me at the meeting on Thursday? I have just spoken to Wasim and he said there are a number of people coming to see what we are doing.

Is there an agenda and an outcome you are wanting from the meeting? Wasim didn't seem to know what the focus is going to be. And did you want any material prepared for it?

If you could get back to me about these points asap, that would be great.

Many thanks

Jeff

Hi s 9 (2)(a)

I will make contact with the developers now and fill them in on what the plan is. I have to book resources with each of our development teams to make sure they have time to work on this project.

There will most likely be two lots of developers involved. s 9 (2)(a) your backend developer and our mobile s 9 (2)(a) developer.

Once I have booked in resources, I will provide you with their contact details and you can take over from there. You may engage with them directly.

Thanks  
Wasim
