Dear Sir or Madam

**Subject: Point Wells Traffic calming
Proposed Installation of speed calming humps**

We are writing to you in response to concerns that have been raised by the residents of Point Wells. Also following a recent traffic speed survey the speeds of vehicles entering Point Wells were found to be exceptionally high.

Vehicles sometimes travel at excessive speed on Point Wells Road, especially during the summer season. To improve road safety on Point Wells Road, Auckland Transport is proposing to introduce several speed humps at approximately 100m intervals, to encourage drivers to reduce vehicle speed and make it safer for local residents and through traffic.

The approximate locations of the proposed humps are shown schematically on the attached plans. Parking will be permitted on the speed humps resulting in no loss of on-street parking. The speed humps have been positioned to avoid interfering with private driveways and to maintain the desired approximate 100m spacing interval.

It is noted that speed humps are generally effective at reducing vehicle speeds. However, they can create discomfort for motorists, and may result in additional traffic noise associated with motorists braking and accelerating in the vicinity of the speed hump devices.

As part of the consultation process, your feedback is being sought from those directly affected by the proposal. Please complete the attached form and return it in the reply paid envelope by 26 October 2012.

If you have any further questions, please do not hesitate to contact Julie Wood 09 355 3553

Yours sincerely
