

9 February 2016

Roman Catholic Bishop of the Diocese of Christchurch  
PO Box 4544  
Christchurch 8140

Dear Property Owner,

**Re: Earthquake prone buildings and public information  
Catholic Basilica - 136 Barbadoes Street, Christchurch**

This letter is to inform you that a list of earthquake prone buildings within the Christchurch District is published on the Council's website. We have information that the building owned by you at the above address is earthquake prone and we will be including it on the list shortly.

We add to the list as information in Detailed Engineering Evaluations (DEE's) is received from CERA or information is received by the Council. Buildings are removed from the list as strengthening work is completed and certified or more detailed engineering studies are undertaken showing the building is not earthquake prone. We recognise that many property owners are taking action to address problems associated with their building and make reference to this on the website.

The list will be posted on the Council's website as a PDF at this address: [www.ccc.govt.nz/eqpronebuildings](http://www.ccc.govt.nz/eqpronebuildings), if you think your property has been placed on the list in error or you want to provide further information, please contact (03) 941 8999 or email [customerliaison@ccc.govt.nz](mailto:customerliaison@ccc.govt.nz)

The Council is committed to helping you stay informed about this issue. We will make further contact with you in the future, notifying you of changes to the legislation and any time frames for increasing the strength of buildings or requiring their demolition.

Yours sincerely

Robert Wright
