Description:			
Client has rung today to inform transport that he has been living here for 18 years. the road has been repaired 3 times and it the worse it has been this time due to considerable increase in truck movements between 50kmph-80kmph/hour. There are no major signs exiting the m/way into beach road stating its a residential area as a result there should be no Engine Braking. Engine Braking is a constant issue on this street which has led to the roads deterioration even further this happens all hours of day and night. Client has notice his roof tiles are cracked because of the constant vibration caused by heavy truck and trailer traffic in his area. Client has requested for a Road Inspector to contact him as he is really tired if noise and so are the neighbours. The main reason there are Truck and Trailer movements from ■■■■■ ; ; Preferred Method of Contact: E-mail			

Progress Notes

23/09/2016 06:42 ■■■ No Action Required - Noise control is not Roadings responsibility - Refer to AT
